Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

System of National Accounts,
Gross National Product Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 995-0611) or to the Statistics Canada reference centre in:

| | | | |

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Système de comptabilité nationale,
Division du produit national brut,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-0611) ou au centre de consultation de Statistique Canada à:

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services in current and constant prices, is portrayed in the Input-Output tables of the System (Catalogue with prefix 15). The Catalogue Nos. carrying the prefix 61 provide constant dollar measures of the contribution of each industry to total Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue with prefix 14).

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by Financial Flow Accounts (Catalogue with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Levels of outstanding financial assets and liabilities are published annually as a major contribution towards a complete national balance sheet.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, *A System of National Accounts* (Studies in Methods, Series F, No. 2, Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le n° de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (n° de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services aux prix du marché et en dollars constants figure dans les tableaux d'entrées-sorties du système (n° de catalogue commençant par 15). Les publications dont les numéros de catalogue commencent par 61 comprennent les mesures en dollars constants de l'apport de chaque branche d'activité au total du produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le n° de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut par activité économique. Les comptes de flux financiers (publications dont les n°s de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les niveaux des actifs et passifs financiers en circulation sont disponibles annuellement; ils constituent un élément important d'un bilan national exhaustif.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, n° 2, rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

NOTE

In order to obtain a complete quarterly historical record of the National Income and Expenditure Accounts, the following publications should be consulted:

National Income and Expenditure Accounts, Volume 2, The Quarterly Estimates, 1947-1974, Catalogue 13-533, for the years 1947 - 1970.

National Income and Expenditure Accounts, First Quarter 1978, Catalogue 13-001 for the years 1971 - 1973.

National Income and Expenditure Accounts, First Quarter 1981, Catalogue 13-001 for the years 1974 and 1975.

NOTA

Pour disposer d'un dossier trimestriel historique complet des comptes nationaux des revenus et des dépenses, le lecteur est prié de consulter les publications suivantes:

Comptes nationaux des revenus et des dépenses, volume 2, Les estimations trimestrielles, 1947-1974, n° 13-533 au catalogue, pour la période 1947 - 1970.

Comptes nationaux des revenus et des dépenses, premier trimestre 1978, n° 13-001 au catalogue, pour la période 1971 - 1973.

Comptes nationaux des revenus et des dépenses, premier trimestre 1981, n° 13-001 au catalogue, pour la période 1974 - 1975.

Gross National Product rose 3.4% the first quarter of 1983 to reach a level of \$374.5 billion, seasonally adjusted at annual rates; after allowing for price rises real G.N.P. rose 1.8%.

Après désaisonnalisation aux taux annuels, le produit national brut accuse une augmentation de 3.4% au premier trimestre de 1983 pour atteindre \$374.5 milliards; après correction de la variation des prix, le PNB a augmenté de 1.8% en termes réels.

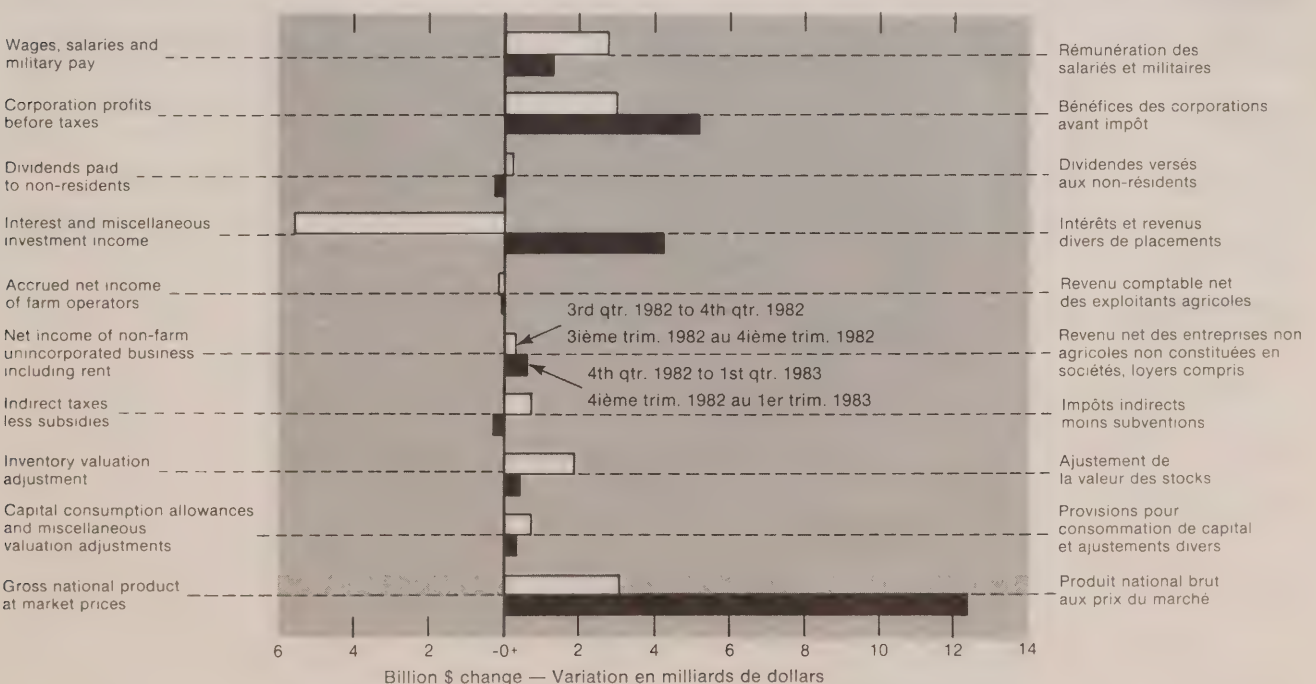

Wages, salaries and supplementary labour income and military pay and allowances increased 0.5% in the first quarter compared to 1.3% in the fourth quarter 1982. Corporation profits before taxes rose 22.5% the second consecutive quarterly increase.

La rémunération des salariés et militaires a augmenté de 0.5% au premier trimestre de 1983, comparativement à 1.3% au quatrième de 1982. Les bénéfices des sociétés avant impôt ont augmenté de 22.5%, la deuxième hausse trimestrielle consécutive.

Quarterly changes in GNP and components

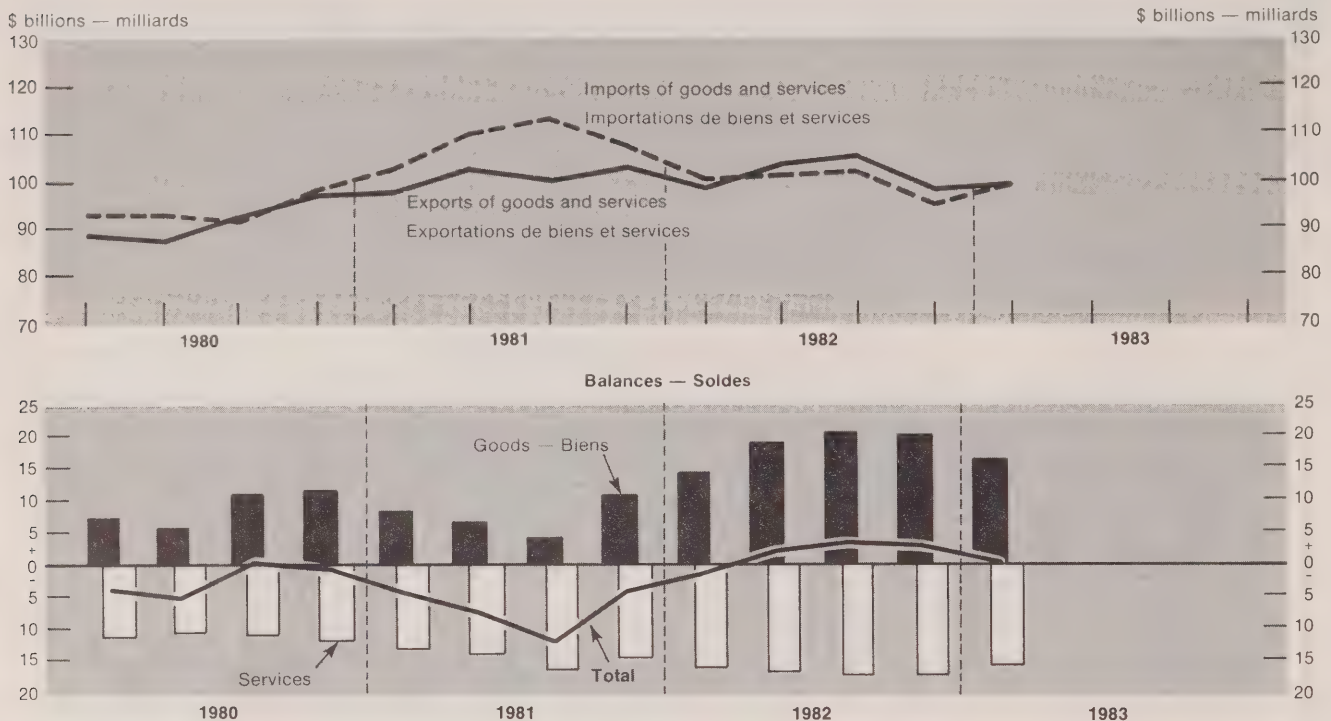

Mouvements trimestriels du PNB et de ses composantes

All quarterly data adjusted for seasonal variation and at annual rates. — Toutes les séries trimestrielles sont corrigées des variations saisonnières, aux taux annuels.

In the first quarter, exports and imports of goods and services increased 1.1% and 4.2% respectively. The nominal trade surplus in goods and services decreased to \$40 million largely because of the more rapid increase in imports.

Au premier trimestre, les exportations et les importations des biens et services ont augmenté respectivement de 1.1% et 4.2%. L'excédent en valeur nominale du commerce en biens et services a diminué à \$40 millions principalement à cause d'une augmentation plus rapide des importations.

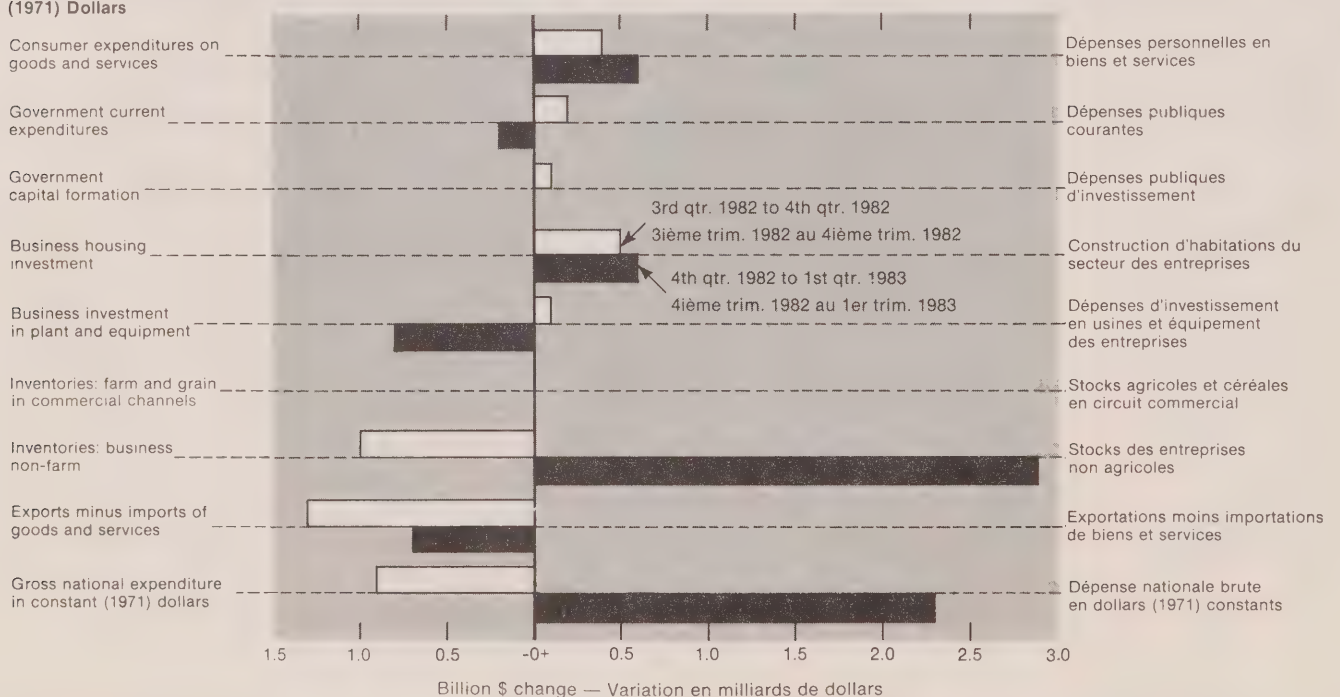

In real terms, the first quarter growth was concentrated mainly in personal expenditure on goods and services and investment in residential construction; a slowdown in the rate of liquidation of non-farm business inventories was a noticeable feature of the quarter.

En termes réels, la croissance au premier trimestre s'est surtout concentrée dans les dépenses personnelles en biens et services et les investissements dans la construction résidentielle; il faut aussi noter le ralentissement du taux de liquidation des stocks commerciaux non agricoles.

Quarterly Changes in GNE and Components in Constant (1971) Dollars

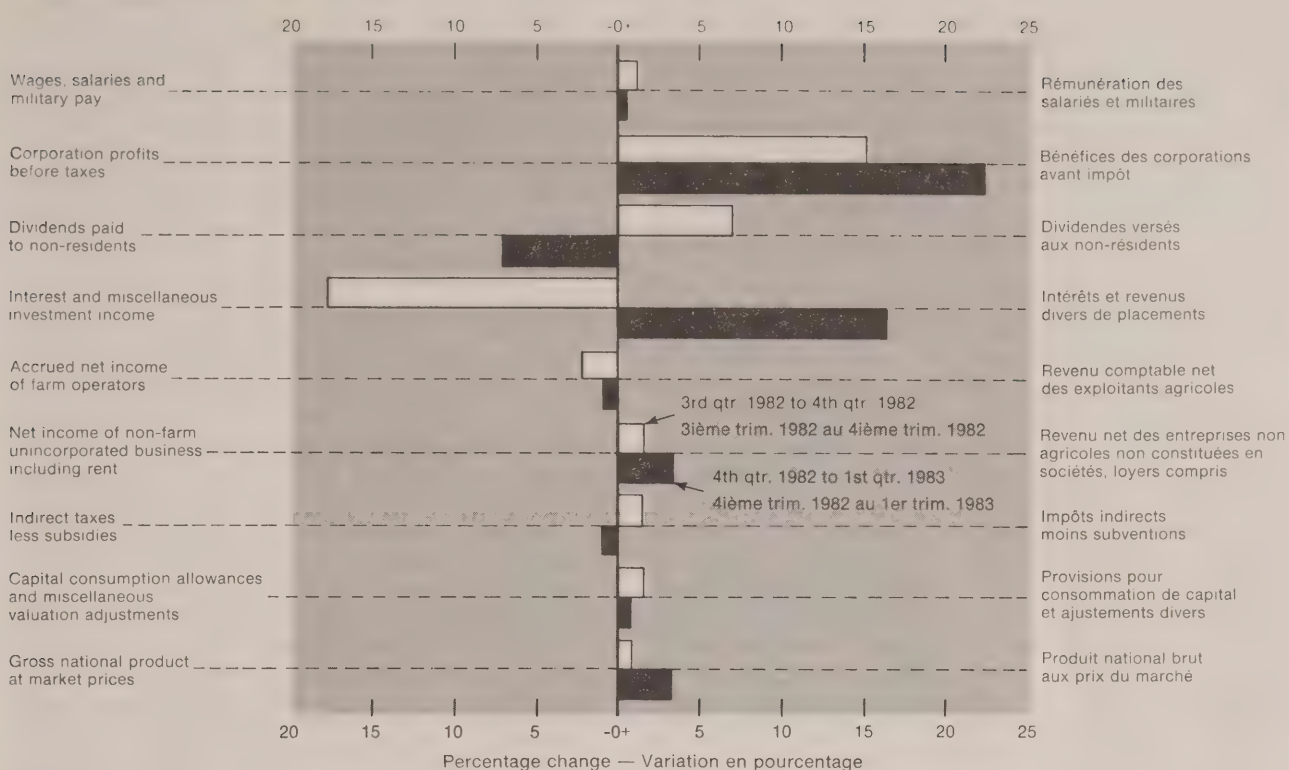

Mouvements trimestriels de la DNB et de ses composantes en dollars (1971) constants

GROSS NATIONAL PRODUCT

First Quarter 1983

Gross National Product rose 3.4% in the first quarter of 1983 to a level of \$374.5 billion, seasonally adjusted at annual rates. After allowing for an overall price increase of 1.6%, real GNP rose 1.8%. This growth follows a 6.5% decline in the volume of GNP from the peak in the second quarter of 1981 to the fourth quarter of 1982.

Evidence that a recovery of economic activity had begun to take shape in the fourth quarter of 1982 was confirmed in the first quarter of 1983. Final domestic demand rose 0.2% in volume, the second consecutive increase following five quarterly declines. The recovery in consumer expenditure, which was concentrated in interest-rate sensitive durable goods in the fourth quarter, was diffuse in the first quarter. Residential investment continued to recover at rapid rates with the source of strength switching from increased sales of existing homes in the fourth quarter to increased construction of new homes in the first quarter. The sharp inventory liquidation of \$4.19 billion in real terms in the fourth quarter set the stage for a recovery in production as industrial production rose 6.0% in the first quarter, the first quarterly increase since the second quarter of 1981. As a result of faster recovery of sales relative to overall production, however, inventories were drawn down a further \$1.23 billion in real terms in the first quarter, bringing stock-to-sales ratios down significantly. Early indications are that the recovery in production continued into the second quarter as the labour force survey has estimated sharp increases in employment for April and May.

Personal expenditure rose 0.7% in volume terms in the first quarter, the second quarterly increase following a decline of 3.1% over five quarters. The widespread recovery reflected improved financial positions and employment prospects of consumers. Purchases of durable goods rose a further 1.2% in the first quarter, the strength originating in expenditure on cars. The recovery of expenditures on semi-durable goods accelerated and services increased a further 0.9%.

Residential investment recorded a robust volume increase of 13.9% following a similar increase in the fourth quarter of 1982. The strength was due to increased construction activity following a 43% jump in housing starts in the fourth quarter. Housing starts have continued to climb in the first five months of 1983 reaching 254,000 units at annual rates in May the highest level recorded since 1978 and indicating a continuation of increased activity in this sector.

PRODUIT NATIONAL BRUT

Premier trimestre 1983

Le produit national brut augmente de 3.4 % au premier trimestre de 1983 pour atteindre \$374.5 milliards après désaisonnalisation au taux annuel. En termes réels, c'est-à-dire en tenant compte d'une augmentation de l'indice d'ensemble de prix de 1.6 %, le PNB enregistre une hausse de 1.8 %. Cette croissance fait suite à une diminution de 6.5 % du volume du PNB entre son sommet du deuxième trimestre de 1981 et le quatrième trimestre de 1982.

Les indices qu'une reprise de l'activité économique avait commencé à se manifester au cours du quatrième trimestre de 1982 se confirment au premier trimestre de 1983. Le volume de la demande intérieure finale augmente de 0.2 %, la seconde augmentation consécutive après cinq trimestres de baisse. La reprise des dépenses de consommation, qui s'était concentrée au quatrième trimestre sur les biens durables sensibles aux taux d'intérêt, se généralise au premier trimestre. L'investissement résidentiel continue de se redresser rapidement, l'origine du mouvement ascendant passant de l'augmentation des ventes de maisons existantes au quatrième trimestre à une augmentation de la construction de maisons neuves au premier trimestre. La forte liquidation des stocks de \$4.19 milliards en termes réels au quatrième trimestre a préparé la reprise de la production alors que la production industrielle s'accroît de 6.0 % au premier trimestre, la première augmentation trimestrielle depuis le deuxième trimestre de 1981. À cause de la remontée plus rapide des ventes par rapport à la production globale, cependant, les stocks affichent une baisse supplémentaire de \$1.23 milliard en termes réels au premier trimestre, ce qui réduit fortement les ratios des stocks aux ventes. Les premières indications laissent croire que la reprise de la production se poursuit au deuxième trimestre, l'enquête sur la population active enregistrant de fortes augmentations de l'emploi en avril et en mai.

Le volume des dépenses personnelles augmente de 0.7 % au premier trimestre, la seconde augmentation trimestrielle après une diminution de 3.1 % en cinq trimestres. La reprise généralisée est imputable à une amélioration de la situation financière et des perspectives d'emploi des consommateurs. Les achats de biens durables augmentent encore, de 1.2 % au premier trimestre, la croissance provenant des achats de voitures. La reprise des dépenses en biens semi-durables s'accélère et les dépenses en services augmentent encore, de 0.9 %.

L'investissement résidentiel accuse une forte augmentation de 13.9 % en volume après une augmentation semblable au quatrième trimestre de 1982. Cette vigueur est imputable à un regain d'activité dans la construction après un bond de 43 % des mises en chantier au quatrième trimestre. Les mises en chantier ont continué à augmenter au cours des cinq premiers mois de 1983, pour atteindre 254,000 au taux annuel en mai, un sommet depuis 1978, ce qui indique que le regain d'activité se poursuit dans ce secteur.

Business fixed investment in plant and equipment was a major restraining factor in final domestic demand. The volume of non-residential construction fell 4.8% to a level 17.5% below the peak of the fourth quarter of 1981. Investment in machinery and equipment fell 3.3% in real terms, a deceleration from the average quarterly declines of 1982. Demand for new motor vehicles has picked up, although demand for industrial and agricultural machinery remains weak.

The volume of non-farm business inventories was reduced by \$1.45 billion, a slowdown of \$2.93 billion in the rate of decumulation from the fourth quarter. One third of the slowdown can be accounted for by a swing from a large reduction in stocks of automobiles at the retail level in the fourth quarter, to a small accumulation in the first. Most of the run-down of stocks in the first quarter was recorded in those manufacturing and wholesale industries which produce and sell goods related to business fixed investment. In these industries the realignment of stocks with sales has lagged due to continued weak demand. In the remainder of industries the rate of decumulation slowed significantly.

The merchandise trade surplus weakened as the volume of merchandise imports rose more rapidly than merchandise exports. Increased purchases of motor vehicle products accounted for most of the 12.9% recovery in imports. Exports of merchandise recovered 5.9% in volume in the quarter, with the increase also largely originating in the auto industry. Partially offsetting the lower merchandise trade surplus was an improvement in the non-merchandise deficit as imports of services declined more rapidly than exports of services.

The major source of strength on the income side of the Accounts came from the sharp increase in corporate profits. Following a decline of 46.7% from the first quarter of 1981 to the third quarter of 1982, profits recovered 15.1% in the fourth quarter and 22.5% in the first. A large reduction in interest costs (due to lower interest rates and sharply lower inventories) and higher sales combined to improve the financial position of firms. The largest profit gains were made in merchandising and financial industries. Despite the two quarterly increases, profits remain below pre-recession levels.

Wages, salaries and supplementary labour income rose 0.6% in the first quarter. Wages and salaries were virtually unchanged in the quarter despite the small increase in paid worker employment

Les immobilisations des entreprises en usines et matériel constituent un important facteur de freinage de la demande intérieure finale. Le volume de la construction non résidentielle baisse de 4.8 %, à un niveau de 17.5 % inférieur au sommet du quatrième trimestre de 1981. Les investissements en machines et matériel baissent en termes réels de 3.3 %, un ralentissement par rapport aux taux de diminution trimestriels moyens en 1982. La demande de véhicules automobiles neufs a repris, alors que la demande de machines industrielles et agricoles demeure faible.

Le volume des stocks commerciaux non agricoles baisse de \$1.45 milliard, ce qui représente un ralentissement de \$2.93 milliards du taux de liquidation par rapport à celui du quatrième trimestre. Un tiers de ce ralentissement est imputable à un revirement dans les stocks d'automobiles au niveau de détail, d'une forte réduction au quatrième trimestre à une faible accumulation au premier trimestre. La plus grande partie de la baisse des stocks au premier trimestre a été enregistrée dans les industries de la fabrication et du commerce de gros qui produisent et vendent des biens reliés aux immobilisations des entreprises. Dans ces industries, on a tardé à ramener les stocks à un niveau acceptable par rapport aux ventes parce que la demande demeure faible. Dans les autres industries, le taux de liquidation des stocks a beaucoup ralenti.

L'excédent du commerce des marchandises diminue, alors que le volume des importations de marchandises s'accroît plus rapidement que celui des exportations de marchandises. L'augmentation des achats de produits automobiles compte pour la plus grande partie de cette remontée de 12.9 % des importations. Les exportations de marchandises sont en hausse de 5.9 % en volume au cours du trimestre, et l'augmentation est également imputable pour l'essentiel à l'industrie automobile. La baisse de l'excédent au titre du commerce des marchandises a été partiellement neutralisée par une amélioration au titre des invisibles, les importations de services ayant diminué plus rapidement que les exportations de services.

La principale source de vigueur du côté du revenu des comptes provient de la montée en flèche des bénéfices des sociétés. Après une diminution de 46.7 % entre le premier trimestre de 1981 et le troisième trimestre de 1982, les bénéfices accusent une augmentation de 15.1 % au quatrième trimestre et de 22.5 % au premier. Une forte réduction des frais d'intérêt (imputable à la baisse des taux d'intérêt et à la forte réduction des stocks) ainsi qu'une augmentation des ventes ont amélioré la situation financière des entreprises. Les secteurs du commerce et des finances enregistrent les plus fortes hausses de bénéfices. Malgré ces deux augmentations trimestrielles, les bénéfices demeurent au-dessous de leur niveau d'avant la récession.

La rémunération des salariés augmente de 0.6 % au premier trimestre. Les salaires et traitements demeurent virtuellement inchangés au cours du trimestre, la faible augmentation de l'emploi de travailleurs rémunérés et du

and average hours worked. The wage roll-back in January and civil service strikes in February in Quebec were the major offsetting factors. Supplementary labour income increased due to higher employer contributions to unemployment insurance.

The slowing of inflation evident throughout 1982 continued into the first quarter of 1983. The revaluation of inventories owned by Canadair had the effect of lowering the implicit price index in the fourth quarter and therefore understating the slowing of the underlying rate of inflation in the first quarter. The implicit price index excluding inventory change rose only 0.5%, slowing from a 2.5% increase in the fourth quarter of 1982. The implicit price deflator for final domestic demand also slowed, showing an increase of 0.7%. A substantial deceleration of the prices of consumer services and non-durable goods was recorded in the first quarter. The implicit deflator for personal expenditure recorded a moderate 1.1% increase compared to 1.5% in the fourth quarter of 1982.

Federal Government Petroleum-related Revenues and Expenditures

The petroleum-related programs of the federal government continued to have a significant effect on the movement of some of the federal income and expenditure items. The following table provides quarterly estimates, seasonally adjusted at annual rates, for 1982 and 1983 of the major petroleum-related programs.

Revisions

The following is a description of the revisions made to the National Income and Expenditure Accounts with the release of the first quarter 1983 estimates. Revisions fall into two categories. With the release of the first quarter of each year, following normal practice, data are revised for the previous four years. These revisions are necessary because many of the estimates are based on preliminary survey information. Subsequently, revised surveys or benchmarks become available which result in changes to the figures. The components generally most affected by these revisions are labour income, corporate profits and depreciation, provincial government expenditure on goods and services, and gross fixed capital formation. In addition, major revisions covering a longer time span are made periodically. These may reflect revisions based on decennial census information or new information sources. They may also result from changes in treatment of specific items or changes in the method of estimation. This year it was decided to incorporate some major revisions which have been completed as part of the ongoing historical revision. These revisions were carried

nombre moyen d'heures de travail étant largement compensée par les coupures de salaires en janvier et les grèves dans le secteur public en février au Québec. Le revenu supplémentaire du travail augmente à la suite des cotisations accrues des employeurs à l'assurance-chômage.

Le ralentissement de l'inflation, manifeste tout au long de 1982, se poursuit au premier trimestre de 1983. La réévaluation à la baisse des stocks de Canadair a eu pour effet d'abaisser l'indice implicite de prix au quatrième trimestre et par conséquent d'atténuer le ralentissement du taux d'inflation sous-jacent au premier trimestre. L'indice implicite de prix excluant les variations des stocks n'augmente que de 0.5 %, en baisse comparativement à 2.5 % au trimestre précédent. L'indice de déflation implicite de la demande intérieure finale ralentit également, enregistrant une hausse de 0.7 %. Les prix des biens non durables et des services de consommation accusent un ralentissement marqué au premier trimestre. L'indice de déflation implicite des dépenses personnelles affiche une augmentation modérée de 1.1 %, comparativement à 1.5 % au quatrième trimestre de 1982.

L'administration fédérale et le pétrole - Recettes et dépenses

Les programmes reliés au pétrole de l'administration fédérale ont continué d'influencer fortement les taux de variation de certaines rubriques de ses revenus et dépenses. Le tableau suivant montre les estimations trimestrielles de 1982 et 1983, après désaisonnalisation au taux annuel, pour les principaux programmes reliés au pétrole.

Révisions

Voici une description des révisions apportées aux comptes nationaux des revenus et des dépenses avec la publication des estimations pour le premier trimestre de 1983. Ces révisions se classent dans deux catégories. Lors de la publication du premier trimestre d'une année, selon la pratique courante, on procède à la révision des données pour les quatre années précédentes. Ces révisions sont nécessaires parce qu'un grand nombre d'estimations se fondent sur des résultats d'enquêtes provisoires. Ensuite, on dispose de résultats révisés provenant d'enquêtes ou de repères, qui se traduisent par des changements dans les chiffres. Les composantes qui sont généralement les plus touchées par ces révisions sont le revenu du travail, les bénéfices des sociétés et l'amortissement, les dépenses des administrations publiques provinciales en biens et services et la formation brute de capital fixe. De plus, on effectue régulièrement des révisions couvrant une période plus longue. Ces dernières peuvent traduire des révisions fondées sur les recensements décennaux ou des renseignements communiqués par de nouvelles sources d'information. Elles peuvent également provenir de changements dans le traitement de certains postes précis ou de changements dans la méthode d'estimation. Cette année, on a décidé d'incorporer certaines ré-

back to 1976 to minimize statistical breaks in the time series.

The description is organized as follows: the first section documents the source and nature of the major revisions to the annual estimates, the second section describes the effects of the normal annual revisions, and the last section details the major sources of revisions to the quarterly methodologies incorporated in this revision.

Major Annual Revisions

The largest of the major revisions was made to the estimates of supplementary labour income where it was found that the existing data sources and methodology did not adequately estimate the welfare component. Welfare supplementary labour income is defined as payments made by the employer for the future benefit of the employee such as payments for health services, group life insurance, Blue Cross, provincially-operated hospital and medical care insurance plans, and non-profit organization insurance plans. The past methodology had been to move the national total welfare component on the movement of wages and salaries and selected Public Accounts data. A reworking of existing data and the incorporation of information from the Survey of Health Insurance Benefits resulted in upward revisions to supplementary labour income ranging from \$1.1 billion in 1976 to \$4.2 billion in 1982.

Information from the 1981 Census and a re-examination of data sources resulted in revisions to the gross and net residential rent series. The reworking of these estimates resulted in revisions to personal expenditure on services, net income of unincorporated business including rent, capital consumption allowances and the implicit deflator for personal expenditure on rent. The upward revision to current dollar expenditure on gross rent ranged from \$836 million in 1976 to \$2.9 billion in 1982. However, the net rent portion of net income of non-farm unincorporated business was revised downward in all years except 1982, due to revised estimates of space expenses which arose from the reworking of the data. The housing portion of capital consumption allowances was also revised upward as a result of the reworking of the data and the incorporation of new housing stock estimates from the 1981 Census.

The calculation of interest payments on outstanding Canadian bonds held by non-residents was changed from a cash to an accrual basis during 1982; this was made possible through the use of a

visions majeures effectuées dans le cadre de la révision historique en cours. Ces révisions remontent jusqu'en 1976 afin de minimiser les solutions de continuité statistiques dans les séries chronologiques.

La première partie de cette description documente l'origine et la nature des révisions majeures apportées aux estimations annuelles, la seconde décrit les effets des révisions annuelles courantes et la dernière partie, enfin, examine en détail les causes principales des révisions des méthodologies trimestrielles retenues dans la présente révision.

Révisions annuelles majeures

La plus importante des révisions majeures touche les estimations du revenu supplémentaire du travail. On a constaté que les sources de données existantes et la méthodologie n'estimaient pas de façon adéquate la composante bien-être. Le revenu supplémentaire du travail du bien-être se définit comme les paiements effectués par l'employeur pour l'avantage futur de l'employé, tels que les paiements au titre des services de santé, l'assurance-vie collective, la Croix bleue, les régimes provinciaux d'assurance hospitalisation, d'assurance-maladies et les régimes d'assurance des organismes à but non lucratif. La méthodologie utilisée dans le passé consistait à aligner la composante bien-être totale nationale sur le mouvement des salaires et traitements et de certaines données des comptes publics. Le retraitement des données existantes et l'incorporation de renseignements provenant de l'Enquête sur les prestations d'assurance-maladie se sont traduites par des révisions à la hausse du revenu supplémentaire du travail comprises entre \$1.1 milliard en 1976 et \$4.2 milliards en 1982.

Les renseignements provenant du recensement de 1981 et un nouvel examen des sources de données ont entraîné la révision des séries des loyers résidentiels bruts et nets. Le retraitement des estimations des loyers s'est traduit par la révision des dépenses personnelles en services, du revenu net des entreprises individuelles, loyers compris, des allocations de coût en capital et de l'indice implicite de déflation des dépenses personnelles en loyers. L'estimation des dépenses en dollars courants en loyers bruts a été révisée en hausse de \$836 millions en 1976 et de \$2.9 milliards en 1982. La partie loyers nets du revenu net des entreprises individuelles non agricoles a été révisée en baisse pour toutes les années à l'exception de 1982 en raison des nouvelles estimations des dépenses engagées au titre de l'espace obtenues par le retraitement des données. La partie logement des allocations de coût en capital a aussi été révisée en hausse à la suite du retraitement des données et de l'incorporation des nouvelles estimations du stock de logements provenant du recensement de 1981.

Le calcul des paiements d'intérêts sur les obligations canadiennes en cours détenues par les non-résidents a été changé d'une base de comptabilité de caisse en une base de comptabilité d'exercice en 1982, grâce à l'utilisation

new computerized system to process bond transactions. This improvement was carried back to 1976 and accounts for the major part of the revisions to non-merchandise imports on the expenditure side of the accounts and to the investment income estimates on the income side of the accounts.

In the process of reworking the balance of payments data on merchandise exports, a doublecounting of freight and shipping costs for exports of lumber products was uncovered. Since freight and shipping costs are subtracted from merchandise export estimates, the elimination of the doublecount resulted in an upward revision for the 1976-1982 period.

The value of physical change in inventories was revised due to level adjustments of the book value of wholesale inventories to the 1971, 1973, 1975, 1977 and 1979 Biennial Censuses of Wholesale Trade. In addition, during the compilation of the 1979 Biennial Census under-coverage was discovered and appropriate adjustments were made. The result of these revisions was to raise book values throughout the period. New deflators were also calculated for some series, reflecting more precisely the commodity content of these series.

A re-examination of the data sources for personal expenditure on nondurable goods resulted in a revision to the annual estimates. Food expenditures were revised downward back to 1976 to exclude sales of alcoholic beverages in grocery stores which had been included both in the food and alcoholic beverage components. The estimate of sales of tobacco products was revised to include new information on provincial price indices. Purchases of electricity were revised to include only 50% of expenditures by the farm sector; the remaining 50% is attributed to the cost of farm operations. Natural gas expenditure was revised up to reflect sales of natural gas to apartment dwellers which had previously been excluded. The net result of these changes was to revise expenditure on non-durable goods downward over the period.

Gross fixed capital formation was revised upwards based on a re-estimation of major alterations and repair expenditures. In addition, the constant dollar series were revised for 1976 and 1977 as methodological improvements in the deflators, which had been incorporated from 1978 on, were linked back to 1975; both the Paasche and Laspeyres price deflators were affected.

Changes were also made to other deflation methodologies. The implicit price indices for personal expenditure on financial services and welfare and government expenditure on goods and services were revised to reflect revisions in the industry real output measures. Deflators for other components of personal

d'un nouveau système informatisé pour traiter les transactions obligataires. Les estimations ainsi effectuées remontent jusqu'en 1976 et représentent l'essentiel des révisions aux importations d'invisibles du côté dépense des comptes et aux revenus de placements du côté revenu des comptes.

À la suite du retraitement des données de la balance des paiements des exportations de marchandises, on a constaté un double compte des coûts du transport des exportations des produits du bois. Comme ces coûts sont déduits des estimations des exportations de marchandises, il y a ainsi eu une révision en hausse pour la période allant de 1976 à 1982.

La valeur de la variation matérielle des stocks a été révisée en raison des corrections de niveau de la valeur comptable des stocks de gros en fonction des recensements biennaux du commerce de gros de 1971, 1973, 1975, 1977 et 1979. De plus, lors du rassemblement des données du recensement biennal de 1979, on a constaté un problème de sous-représentation, qui a été corrigé en conséquence. À la suite de ces révisions, les valeurs comptables ont été relevées pour toute la période en question. On a calculé également de nouveaux indices de déflation pour quelques séries, qui traduisent de façon plus précise leur contenu en marchandises.

Un nouvel examen des projecteurs des dépenses personnelles devait se traduire par la révision des estimations annuelles. Les dépenses alimentaires ont été révisées en baisse jusqu'en 1976 afin d'exclure les ventes de boissons alcooliques dans les épiceries, qui avaient été prises en compte dans les composantes aliments et boissons alcooliques. L'estimation des ventes de produits du tabac a été révisée afin d'inclure de nouveaux renseignements sur les indices de prix provinciaux. Les achats d'énergie électrique ont été révisés de façon à inclure seulement 50 % des dépenses du secteur agricole, les 50 % restants étant imputés au coût de l'exploitation agricole. Les dépenses en gaz naturel ont été révisées en hausse afin de saisir les ventes de gaz naturel aux locataires d'appartements, auparavant exclues. Ces changements se sont soldés par une révision en baisse des dépenses en biens non durables au cours de la période en question.

La formation brute de capital fixe a été révisée en hausse à la suite d'une nouvelle estimation des dépenses en modifications et réparations importantes. De plus, les séries en dollars constants ont été révisées pour 1976 et 1977, les améliorations méthodologiques apportées aux indices de déflation, incorporées à partir de 1978, ayant été raccordées à 1975. Les indices de déflation Paasche et Laspeyres ont été tous les deux touchés.

D'autres méthodes de déflation ont également été modifiées. Les indices implicites de prix des dépenses personnelles au titre des services financiers et du bien-être et ceux des dépenses publiques en biens et services ont été révisés afin de saisir les révisions des mesures de la production industrielle réelle. Les indices de déflation des autres composantes

expenditure were revised to include the new 1978 weights used in the Consumer Price Index; these revisions affected the period 1978 - 1982.

Usual Annual Revisions

Revisions to the annual estimates for the 1979-1982 period also reflected the normal revision practice. The most significant revisions were as follows:

Wages and salaries were adjusted to incorporate the Department of National Revenue tabulation of wages and salaries from "T-4" forms submitted by employers for 1981; this resulted in an upward revision of about \$3.7 billion. In addition, upward revisions resulted from the incorporation of additional information for the 1979 and 1980 "T-4" benchmarks and more recent data on supplementary labour income.

Revisions to corporate profits and capital consumption allowances, and portions of interest and miscellaneous investment income resulted from the incorporation of 1980 taxation data benchmarks and revised 1981 and 1982 projections.

The value of physical change in inventories was revised to incorporate the book value estimates from the 1979 Census of Manufacturing. Book values for 1981 and 1982 were also revised to reflect the new sample weighting diagram. In addition, the 1982 estimates were revised to reflect the downward revaluation of the December inventory book values by Canadair.

The estimates of gross fixed capital formation were revised for 1981 and 1982, based on the results of the Private and Public Investment Survey in Canada.

Government revenues and expenditures, particularly at the provincial level, incorporate the latest Public Accounts information.

Tables 1 and 2, which follow, quantify the revisions made to the current dollar levels of the major aggregates. The effect of the revisions was to revise the annual growth rates of real GNE as follows:

des dépenses personnelles ont été révisés afin d'inclure les nouvelles pondérations de 1978 utilisées dans l'indice des prix à la consommation; ces révisions touchent la période allant de 1978 à 1982.

Révisions annuelles courantes

Les révisions des estimations annuelles pour la période 1979-1982 rendent compte également des pratiques normales de révision. Voici les principales révisions:

Les salaires et traitements ont été ajustés afin d'incorporer la totalisation de Revenu Canada des salaires et traitements à partir des formules T-4 soumises par les employeurs pour 1981; cet ajustement s'est traduit par une révision en hausse du niveau d'environ \$3.7 milliards. De plus, il y a eu des révisions en hausse à cause de renseignements supplémentaires pour les repères T-4 1979 et 1980 et de renseignements plus récents sur le revenu supplémentaire du travail.

Les révisions des bénéfices des sociétés et des allocations de coût en capital, ainsi que d'une partie des revenus d'intérêts et des revenus divers de placements sont imputables à l'incorporation des données repères fiscales de 1980 et des projections révisées pour 1981 et 1982.

La valeur de la variation matérielle des stocks a été révisée afin d'incorporer les estimations de la valeur comptable provenant du recensement des manufactures de 1979. Les valeurs comptables pour 1981 et 1982 ont également été révisées afin de saisir les nouvelles pondérations de l'échantillon. De plus, les estimations de 1982 ont été révisées afin de prendre en compte la réévaluation en baisse des valeurs comptables des stocks de décembre par Canadair.

Les estimations de la formation brute de capital fixe ont été révisées pour 1981 et 1982 selon les résultats de l'enquête sur les investissements privés et publics au Canada.

Les recettes et les dépenses des administrations publiques, en particulier au niveau provincial, incorporent les derniers renseignements des comptes publics.

Les tableaux 1 et 2, ci-après, quantifient les révisions apportées aux niveaux en dollars courants des principaux agrégats. Les révisions décrites dans les parties précédentes se sont traduites par les taux de croissance annuels de la DNB réelle révisés comme suit:

| | 1976 | 1977 | 1978 | 1979 | 1980 | 1981 | 1982 |
|---------------------|------|------|------|------|------|------|-------|
| Published — Publiés | 5.5 | 2.1 | 3.6 | 2.9 | 0.5 | 3.1 | - 4.8 |
| Revised — Révisés | 5.8 | 2.0 | 3.6 | 3.2 | 1.0 | 3.4 | - 4.4 |

Revisions to Quarterly Patterns

In conjunction with the major revisions outlined at the beginning of the note, some quarterly methodologies were also revised. The effect of these revisions was to change the quarterly distribution of data rather than to change the annual level.

The methodology used to derive quarterly personal expenditure on goods from the Retail Trade Survey was revised. In the past, a series of projectors based on the retail trade “kind of business” classification was used to estimate personal expenditure which is classified by type of commodity. The year-over-year movement of each projector was applied to the appropriate commodity group. The new methodology uses weights derived from the 1974 Retail Commodity Survey to convert the quarterly retail sales estimates from the “kind of business” classification to a “commodity” breakdown. The movement of these projectors is then applied on a quarter-over-quarter basis. The effect of this change on the seasonally unadjusted quarterly estimates was to revise down the fourth quarter and up, to a lesser extent, each of the first three quarters; the effect on the seasonally adjusted estimates was minor.

Two methodological changes were incorporated in the quarterly estimates of the Balance of Payments data. Due to the use of seasonally unadjusted deflators for exports and imports of merchandise, residual seasonality was present in the overall merchandise trade deflators. In 1982, when this residual seasonality was causing swings in the constant dollar data, the calculation of the implicit price indices was changed to reflect seasonally adjusted component prices. This change has now been carried back to 1976. The revision had the largest effect on the quarterly estimates of constant dollar exports of merchandise and a smaller effect on the import counterpart. Residual seasonality was also present in the current dollar estimates of merchandise trade due to the addition of the Balance of Payments adjustments, which were not adjusted for seasonal variation, to the seasonally adjusted “customs” trade series. This problem was alleviated by seasonally adjusting the Balance of Payments adjustments at the total level, before adding them to the seasonally adjusted series.

Révisions trimestrielles

Dans le cadre des révisions majeures décrites au début de l'article, on a procédé également à la révision de quelques méthodologies trimestrielles. L'effet principal de ces révisions a été de changer la répartition trimestrielle des données plutôt que d'en changer le niveau annuel.

La méthodologie qui sert à calculer les dépenses personnelles trimestrielles en biens à partir de l'enquête sur le commerce de détail a été révisée. Dans le passé, on utilisait une série de projecteurs basés sur la classification du “genre de commerce” du commerce de détail pour estimer les dépenses personnelles qui sont classées par type de marchandises. Le mouvement d'une année à l'autre de chaque projecteur était appliqué au groupe de marchandises approprié. En vertu de la nouvelle méthodologie, on utilise des pondérations obtenues de l'enquête sur les marchandises vendues au détail de 1974 pour convertir les estimations des ventes au détail de la classification par “genre de commerce” en une classification par “marchandises”. On applique ensuite le mouvement de ces projecteurs sur une base d'un trimestre sur l'autre. Les estimations trimestrielles brutes sont ainsi révisées à la baisse chaque quatrième trimestre, et dans une moindre mesure, à la hausse pour chacun des trois trimestres précédents; l'effet sur les estimations désaisonnalisées est négligeable.

Les estimations trimestrielles des données de la balance des paiements incorporent deux changements de nature méthodologique. En raison de l'emploi d'indices de déflation non désaisonnalisés pour les exportations et les importations de marchandises, les indices de déflation implicites du commerce de marchandises conservaient une saisonnalité résiduelle. En 1982, lorsque cette saisonnalité résiduelle entraînait des variations dans les données en dollars constants, on a changé le calcul des indices implicites de prix afin de prendre en compte les prix des composantes après désaisonnalisation. Ce changement a été effectué jusqu'en 1976. Cette révision affecte principalement les estimations trimestrielles des exportations de marchandises en dollars constants, et a des effets moindres sur les importations. Une saisonnalité résiduelle se trouvait également dans les estimations en dollars courants du commerce de marchandises en raison de l'addition de corrections non désaisonnalisées de la balance des paiements aux séries désaisonnalisées du commerce sur une base douanière. On a réduit ce problème en procédant à la désaisonnalisation des corrections de la balance des paiements au niveau total, avant de les ajouter aux séries désaisonnalisées du commerce.

Petroleum-related Revenues and Expenditures

(Seasonally Adjusted at Annual Rates)

Recettes et dépenses reliées au pétrole

(Après désaisonnalisation au taux annuel)

| | 1982 | | | | 1983 | |
|---------------------------------------------------------------------------------------------------------------|-------|-------|-------|-------|---------------|-------|
| | I | II | III | IV | Year Année | I |

(1) Actual change in millions of dollars. — Variation absolue en millions de dollars. (2) Implicit price indexes are currently weighted (Paasche) and therefore reflect changes in expenditure patterns as well as price changes of individual items. — Les indices implicites de prix sont des indices à pondération courante (Paasche); ils traduisent par conséquent les changements dans la structure des dépenses ainsi que les variations de prix individuelles des éléments.

(1) Excludes profits of government business enterprises. (2) Includes the withholding tax applicable to this item. (3) Includes profits (net of losses) of government business enterprises and other government investment income. (4) Includes value of physical change in farm inventories as shown in line 14, Table 5. An adjustment has been made to take account of the accrued earnings of farm operators arising out of the operations of the Canadian Wheat Board. (5) Includes net income of independent professional practitioners and imputed net rent on owner-occupied dwellings. (6) See footnote 4, Table 2.

(1) Sans les bénéfices des entreprises commerciales publiques. (2) Y compris les retenues fiscales. (3) Y compris les bénéfices (pertes déduites) des entreprises commerciales publiques ainsi que les autres revenus de placements des administrations. (4) Y compris la valeur de la variation des stocks agricoles telle qu'elle figure à la rubrique 14 du tableau 5. Un ajustement a été effectué pour tenir compte des gains comptables découlant des activités de la Commission canadienne du blé. (5) Y compris le revenu net des personnes exerçant une profession pour propre compte et les loyers nets imputés des logements occupés par leur propriétaire. (6) Voir note 4, tableau 2.

(1) Includes defence expenditures. For amounts see line 45, Table 6. (2) Includes outlays on new durable assets such as building and highway construction by government, other than government business enterprises. Excludes defence construction and equipment which are defined as current expenditure. (3) Comprises capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. (4) The book value of inventories is deflated to remove the effect of price changes and the derived 'physical' change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment (see line 8, Table 1).

(1) Y compris les dépenses militaires présentées à la ligne 45, tableau 6. (2) Y compris les dépenses en biens durables neufs, comme les immeubles et les routes, des administrations publiques, sauf celles de leurs entreprises commerciales publiques. Ne comprend par les installations et le matériel militaires, considérés comme dépenses courantes. (3) Comprend les dépenses d'investissement des entreprises privées, des entreprises commerciales publiques et des institutions non commerciales privées, ainsi que les dépenses de construction résidentielle neuve des particuliers. Par définition, les dépenses d'investissement comprennent tous les frais de mutation relatifs à la vente et à l'achat d'immobilisations existantes. (4) La valeur comptable des stocks est déflatée de façon à supprimer l'effet des variations de prix. La variation 'matérielle' ainsi obtenue est ensuite évaluée aux prix moyens de la période courante, ce qui permet d'obtenir la valeur de la variation matérielle. La différence entre cette valeur de la variation matérielle et la variation de la valeur comptable est appelée ajustement de la valeur des stocks (voir ligne 8, tableau 1).

(1) The implicit price deflators of the seasonally unadjusted components of Gross National Expenditure, derived by dividing the value figures in Table 2 by the constant dollar figures in Table 10, are not suitable as indicators of quarter-to-quarter price change. This is because they are currently weighted and therefore are affected by compositional shifts which occur within the unadjusted components of Gross National Expenditure on a quarter-to-quarter basis. Quarter-to-quarter movement in the implicit price deflators based on seasonally adjusted data are less subject to the problem of shifting weights and may be used as a measure of price change.

(1) Les indices implicites de déflation de prix des composantes non désaisonnalisées de la dépense nationale brute, obtenus en divisant les valeurs en dollars courants du tableau 2 par les valeurs en dollars constants du tableau 10, ne sont pas de bons indicateurs de la variation des prix d'un trimestre à l'autre car ils sont à pondération courante et, par conséquent, sensibles aux changements de composition d'un trimestre à l'autre des diverses composantes non désaisonnalisées de la dépense nationale brute. Toutefois, les indices implicites de déflation de prix basés sur les séries désaisonnalisées sont moins sujets à ces changements de pondération et peuvent donc servir à mesurer les variations de prix.

(1) See footnote 1, Table 1.

(2) See footnote 2, Table 1.

(3) See footnote 3, Table 1.

(4) Includes an arbitrary smoothing of crop production, and standard seasonal adjustments for withdrawals of grain from farm stocks and for the change in farm-held livestock and other inventories. Because of the arbitrary element, too precise an interpretation should not be given the seasonally adjusted figures of accrued net income of farm operators.

(5) See footnote 5, Table 1.

(6) See footnote 4, Table 2.

(1) Voir note 1, tableau 1.

(2) Voir note 2, tableau 1.

(3) Voir note 3, tableau 1.

(4) Comprend un lissage arbitraire de la production culturale et des ajustements saisonniers normalisés visant les prélèvements de céréales sur les stocks agricoles et la variation des cheptels et des autres stocks détenus dans les fermes. En raison de cet élément arbitraire, on ne devrait pas donner une interprétation trop rigoureuse des chiffres désaisonnalisés du revenu comptable net des exploitants agricoles.

(5) Voir note 5, tableau 1.

(6) Voir note 4, tableau 2.

(1) Includes defence expenditures. For amounts see line 45, Table 16. (2) See footnote 2, Table 2. (3) See footnote 3, Table 2. (4) See footnote 4, Table 2. (5) In the seasonally adjusted series, the value of grain crop production in each quarter is taken as one-fourth of the estimated value of crop production for the year as a whole (see footnote 4, Table 11). All other items in the farm inventories series are seasonally adjusted by standard techniques.

(1) Y compris les dépenses militaires. Pour les montants, voir rubrique 45, tableau 16. (2) Voir note 2, tableau 2. (3) Voir note 3, tableau 2. (4) Voir note 4, tableau 2. (5) Dans les séries désaisonnalisées, on suppose que la valeur de la production céréalière de chaque trimestre est égale au quart de la production totale de l'année (voir note 4 au bas du tableau 11). Tous les autres éléments de la série sur les stocks agricoles sont désaisonnalisés à l'aide de méthodes normalisées.

(1) See footnote 1, Table 6.

(2) The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four since real property taxes accrue uniformly throughout the taxation year. Because in recent years, changes in real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted taxes series.

(3) Includes capital consumption allowances as shown in line 92.

(1) Voir note 1, tableau 6.

(2) Les estimations trimestrielles des impôts fonciers, à la fois non désaisonnalisées et désaisonnalisées, sont obtenues en divisant les chiffres annuels par quatre, étant donné que ces impôts s'accumulent de façon uniforme tout au long de l'année d'imposition. Toutefois, comme les révisions ont en général relevé le niveau des impôts immobiliers au cours des dernières années, il en est résulté une saisonnalité fictive entre le quatrième et le premier trimestre dans les séries désaisonnalisées.

(3) Comprennent les provisions pour consommation de capital figurant à la ligne 92.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

System of National Accounts,
Gross National Product Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 995-0611) or to the Statistics Canada reference centre in:

| | | | |

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Système de comptabilité nationale,
Division du produit national brut,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-0611) ou au centre de consultation de Statistique Canada à:

| | | | |

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services in current and constant prices, is portrayed in the Input-Output tables of the System (Catalogue with prefix 15). The Catalogue Nos. carrying the prefix 61 provide constant dollar measures of the contribution of each industry to total Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue with prefix 14).

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by Financial Flow Accounts (Catalogue with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Levels of outstanding financial assets and liabilities are published annually as a major contribution towards a complete national balance sheet.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, *A System of National Accounts* (Studies in Methods, Series F, No. 2, Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le n° de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (n° de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services aux prix du marché et en dollars constants figure dans les tableaux d'entrées-sorties du système (n° de catalogue commençant par 15). Les publications dont les numéros de catalogue commencent par 61 comprennent les mesures en dollars constants de l'apport de chaque branche d'activité au total du produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le n° de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut par activité économique. Les comptes de flux financiers (publications dont les n°s de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les niveaux des actifs et passifs financiers en circulation sont disponibles annuellement; ils constituent un élément important d'un bilan national exhaustif.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, n° 2, rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

NOTE

In order to obtain a complete quarterly historical record of the National Income and Expenditure Accounts, the following publications should be consulted:

National Income and Expenditure Accounts, Volume 2, The Quarterly Estimates, 1947-1974, Catalogue 13-533, for the years 1947 - 1970.

National Income and Expenditure Accounts, First Quarter 1978, Catalogue 13-001 for the years 1971 - 1973.

National Income and Expenditure Accounts, First Quarter 1981, Catalogue 13-001 for the years 1974 and 1975.

NOTA

Pour disposer d'un dossier trimestriel historique complet des comptes nationaux des revenus et des dépenses, le lecteur est prié de consulter les publications suivantes:

Comptes nationaux des revenus et des dépenses, volume 2, Les estimations trimestrielles, 1947-1974, n° 13-533 au catalogue, pour la période 1947 - 1970.

Comptes nationaux des revenus et des dépenses, premier trimestre 1978, n° 13-001 au catalogue, pour la période 1971 - 1973.

Comptes nationaux des revenus et des dépenses, premier trimestre 1981, n° 13-001 au catalogue, pour la période 1974 - 1975.

Gross National Product, seasonally adjusted at annual rates rose 2.5% to a level of \$384.4 billion. After allowing for price increase real G.N.P. increased 1.8%.

Après désaisonnalisation au taux annuel, le produit national brut augmente de 2.5% pour atteindre \$384.4 milliards. Compte tenu d'une augmentation de l'indice général de déflation, le PNB réel augmente de 1.8%.

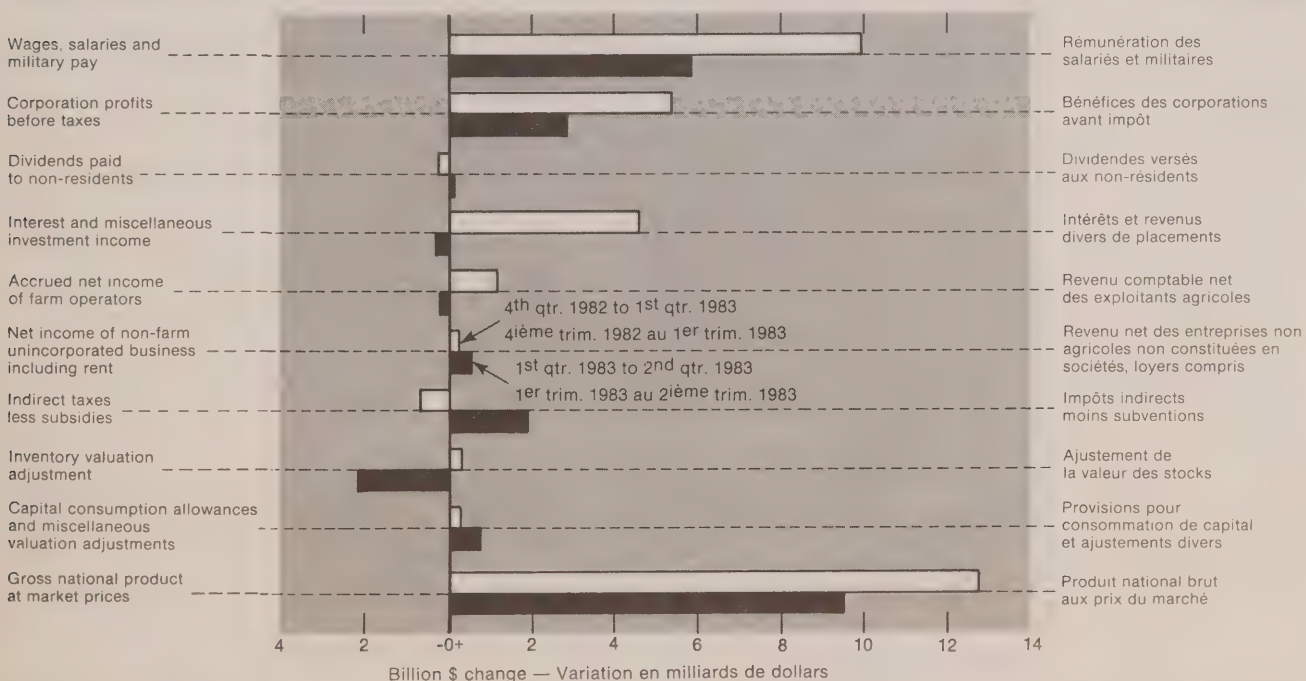

Wages, salaries and supplementary labour income and military pay and allowances advanced 2.7% in the second quarter, following an increase of only 0.5% in the first. Corporation profits before taxes rose 9.9%, the third consecutive quarterly increase.

La rémunération des salariés et solde et indemnité militaires augmente de 2.7% au deuxième trimestre, après une augmentation de seulement 0.5% au premier. Les bénéfices des sociétés avant impôts augmentent de 9.9%, la troisième hausse trimestrielle consécutive.

Quarterly changes in GNP and components

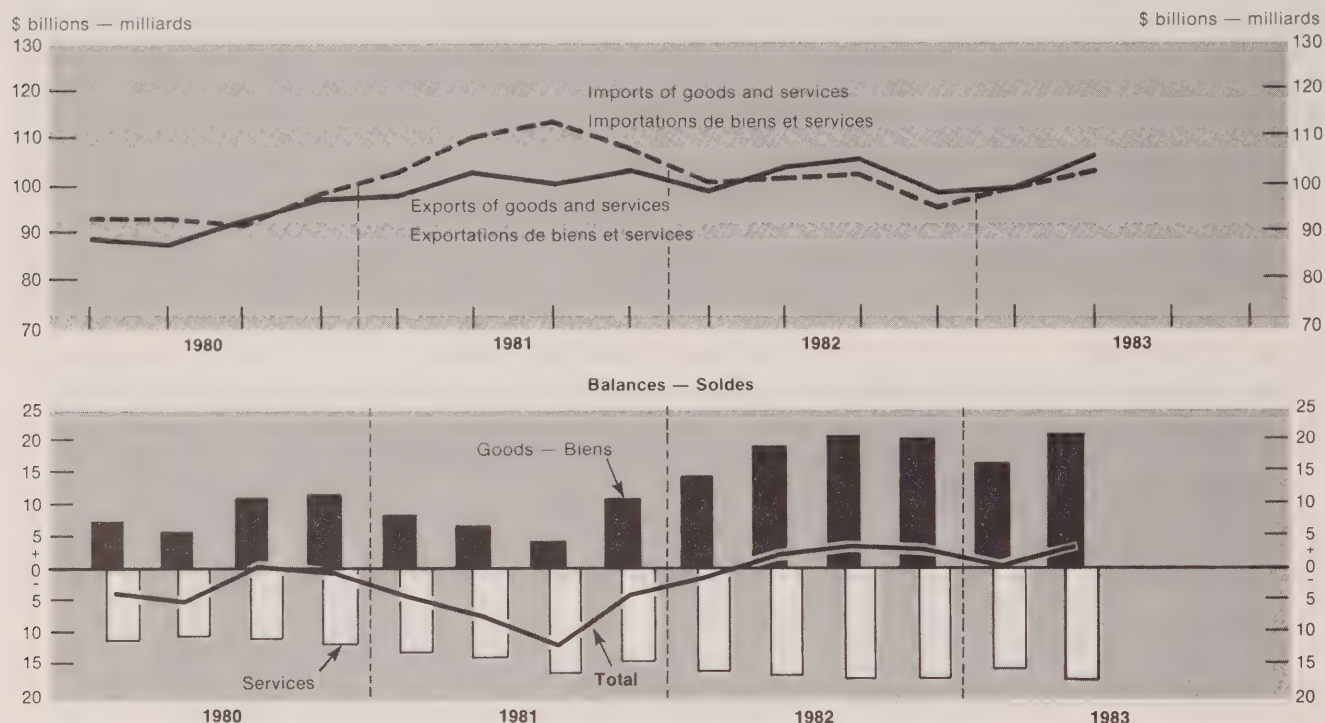

Mouvements trimestriels du PNB et de ses composantes

All quarterly data adjusted for seasonal variation and at annual rates. — Toutes les séries trimestrielles sont corrigées des variations saisonnières, aux taux annuels.

Exports and imports of goods and services increased 6.8% and 3.4% respectively. The nominal balance of trade in goods and services rose \$3.4 billion over the first quarter.

Les exportations et les importations de biens et services augmentent de 6.8% et 3.4% respectivement. L'excédent en valeur nominale du commerce en biens et services augmente de \$3.4 milliards par rapport au premier trimestre.

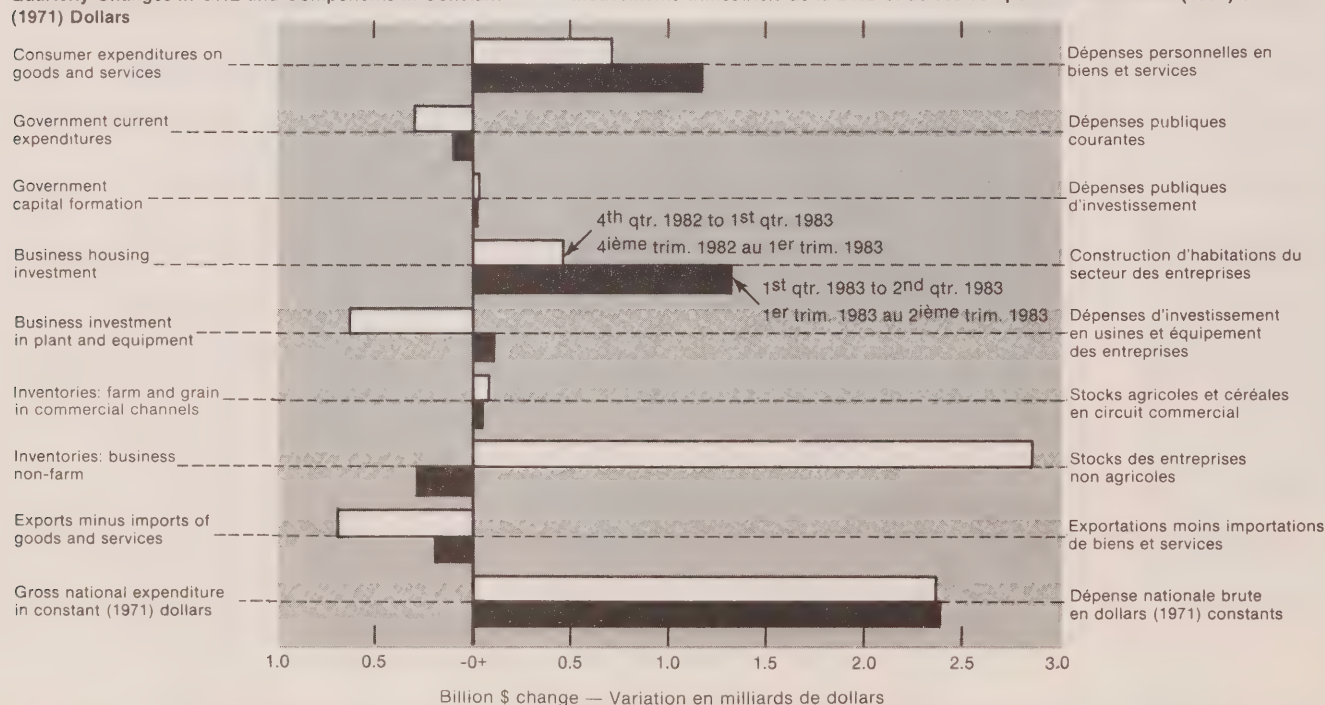

In real terms, the major source of strength was export demand as exports of goods and services rose 6.6%. Personal expenditure on goods and services and investment in residential construction continued to be areas of growth in the quarter.

La principale cause de fermeté au deuxième trimestre est la demande à l'exportation, qui augmente de 6.6% en termes réels. Les dépenses personnelles de consommation en biens et services et les investissements au titre de la construction résidentielle restent encore des sources de croissance durant le trimestre.

Introduction

GROSS NATIONAL PRODUCT

Second Quarter 1983

Gross National Product rose 2.5% in the second quarter of 1983 to a level of \$384.4 billion, seasonally adjusted at annual rates. After allowing for a small quarterly increase in the overall price deflator of 0.7%, real GNP rose 1.8%.

The recovery of economic activity maintained the momentum established in the first quarter and became more widespread as increases were recorded for all major categories of final demand except government expenditure and non-residential construction. This was reflected in an acceleration in employment growth as Labour Force Survey employment rose 1.4% in the second quarter after advancing only 0.2% in the first. The major source of strength in the second quarter was export demand as merchandise exports rose 8.8% in real terms. This was largely attributable to the robust 2.2% increase in real GNP in the United States in the second quarter as nearly 70% of the increase in merchandise exports was accounted for by increased shipments to the U.S.. The rate of growth of the volume of final domestic demand rose in the second quarter, to an increase of 1.7%. Personal expenditure rose 1.4% in real terms largely due to higher spending on durable goods. Gross fixed capital formation rose 4.5% in volume due to strong increases in residential investment and a pick-up in business spending on machinery and equipment. Despite the diffuse nature of the recovery in final demand, production did not recover as rapidly and the stock of business non-farm inventories was reduced by a further \$1.8 billion at annual rates. There has now been a cumulative decline of over 14% in the volume of business inventories since the fourth quarter of 1981. At this stage in the recovery, the continuation of inventory decumulation, particularly at the manufacturing level, may reflect a cautious attitude of producers to keep inventories in line with sales. This has helped to rebuild profit margins by keeping inventory financing costs down.

PRODUIT NATIONAL BRUT

Deuxième trimestre 1983

Après désaisonnalisation au taux annuel, le produit national brut augmente de 2.5 % au deuxième trimestre de 1983 pour atteindre \$384.4 milliards. Compte tenu d'une légère augmentation trimestrielle de 0.7 % de l'indice général de déflation, le PNB réel augmente de 1.8 %.

La reprise de l'activité économique s'est poursuivie au même rythme qu'au premier trimestre et s'est généralisée, alors que l'on observe des augmentations pour toutes les principales catégories de demande finale à l'exception des dépenses publiques et de la construction non résidentielle. Ce mouvement se retrouve dans l'accélération de la croissance de l'emploi, qui, mesuré par l'enquête sur la population active, progresse de 1.4 % au deuxième trimestre après s'être accru de 0.2 % seulement au premier. La principale cause de fermeté du deuxième trimestre est la demande à l'exportation, alors que les exportations de marchandises s'accroissent de 8.8 % en termes réels. Ceci s'explique dans une large mesure par la vigoureuse progression de 2.2 % du PNB réel aux États-Unis au deuxième trimestre, près de 70 % de l'augmentation des exportations de marchandises étant attribuable à l'accroissement des livraisons vers les États-Unis. Le taux de croissance du volume de la demande intérieure finale s'est accéléré au deuxième trimestre (+ 1.7 %). Les dépenses personnelles progressent de 1.4 % en termes réels, principalement à cause d'une augmentation des dépenses en biens durables. La formation brute de capital fixe s'accroît de 4.5 % en volume en raison des fortes progressions des investissements dans le secteur résidentiel et du redressement des dépenses des entreprises en machines et matériel. Malgré la nature générale de la reprise de la demande finale, la production ne s'est pas redressée aussi rapidement, et les stocks commerciaux non agricoles ont baissé une nouvelle fois (- \$1.8 milliard au taux annuel). Le volume des stocks commerciaux a ainsi baissé de plus de 14 % au total depuis le quatrième trimestre de 1981. À cette étape de la reprise, la poursuite de la décumulation des stocks, en particulier au niveau de la fabrication, dénote peut-être une attitude prudente des fabricants qui cherchent à maintenir les stocks à un niveau acceptable par rapport aux ventes. Ceci a permis la reconstitution des marges bénéficiaires en comprimant le coût de financement des stocks.

The merchandise trade surplus increased by \$0.8 billion to \$5.2 billion in volume. The strength in international demand was spread across commodity groups, as an acceleration of trade in crude and fabricated materials offset a slowing in the rate of increase of motor vehicle product exports. The easing in the auto sector was the major contributor to the slowing in the rate of increase of merchandise imports in the second quarter. An increase in the non-merchandise deficit partially offset the strength in merchandise trade, such that the current account balance rose to \$3.5 billion. An increase of \$1.2 billion was recorded for the deficit of service transactions. Slightly more than half of the increase was due to a combination of lower dividend receipts and higher payments on dividends and interest on bond borrowings from abroad. The remainder was largely attributable to higher payments by Canadians on travel abroad.

Personal expenditure rose 1.4% in volume in the second quarter following a 0.9% increase in the first. As in the previous two quarters, much of the increase in consumer demand was for durable goods. Sales of new passenger cars have recovered 26% since the trough in the third quarter of 1982. Expenditure on furniture and appliances rose sharply in the second quarter, bolstered by increased activity in the housing market and by the removal of Ontario sales tax on these items in mid May. The recovery of demand for semi- and non-durable goods has showed less vigor as the sum of expenditure on these goods rose only 0.5% following a 0.2% increase in the first quarter. In the second quarter, increases in clothing and hardware purchases offset declines in other semi-durables. Within the non-durable category, higher purchases of energy products as a result of an unusually cold spring, offset a drop in expenditures on food. The rate of increase of purchases of services slowed to a 0.6% increase in the second quarter, from a 1.4% increase in the first. The slowing was wide-spread including unusually small increases for rents.

Residential investment recorded its third consecutive rapid quarterly increase, up 25.9% in volume in the second quarter. New home construction rose sharply in the quarter as housing starts rose 25% in the second quarter, following a similar increase in the first quarter. The number of housing starts peaked in May with the ending of the federal incentives for the construction of new homes. Residential investment has also been stimulated by falling mortgage rates as the average five-year conventional mortgage rate dropped from 15% in the fourth quarter of 1982 to 13% in the second of 1983. Sales of existing homes and expenditures on repairs and alterations also rose sharply in the second quarter.

L'excédent du commerce de marchandises augmente de \$0.8 milliard pour atteindre \$5.2 milliards en volume. La fermeté de la demande internationale touche tous les groupes de marchandises, une accélération du commerce des matières brutes et travaillées compensant un ralentissement du taux d'augmentation des exportations de produits automobiles. Le ralentissement dans le secteur automobile est la cause principale du taux d'augmentation plus faible des importations de marchandises au deuxième trimestre. Une hausse du déficit sur invisibles a contre-balançé en partie la fermeté du commerce de marchandises, et le solde du compte courant augmente ainsi à \$3.5 milliards. Le déficit des opérations au titre des services augmente de \$1.2 milliard. Un peu plus de la moitié de cette augmentation est imputable à une baisse des recettes sous forme de dividendes et à une augmentation des paiements au titre des dividendes et des intérêts sur les emprunts obligataires de l'étranger. Le reste s'explique principalement par une hausse des dépenses des Canadiens en voyage à l'étranger.

Les dépenses personnelles augmentent de 1.4 % en volume au deuxième trimestre, après s'être accrues de 0.9 % au premier. Comme au cours des deux trimestres précédents, une grande partie de l'augmentation de la demande des consommateurs a porté sur les biens durables. Les ventes de voitures neuves ont progressé de 26 % depuis le creux du troisième trimestre de 1982. Les dépenses en meubles et articles ménagers augmentent fortement au deuxième trimestre, encouragées par l'accroissement de l'activité sur le marché du logement et par la suppression de la taxe de vente en Ontario sur ces articles au milieu de mai. La reprise de la demande de biens semi- et non durables est moins vigoureuse, alors que la somme des dépenses à ce titre n'augmente que de 0.5 %, après une hausse de 0.2 % au premier trimestre. Au deuxième trimestre, l'augmentation des achats de vêtements et d'articles de quincaillerie a compensé une diminution pour les autres biens semi-durables. S'agissant des biens non durables, l'augmentation des achats des produits de l'énergie à cause d'un printemps inhabituellement froid a compensé une chute des dépenses alimentaires. Le taux d'augmentation des achats de services s'est ralenti pour ne faire ressortir qu'une augmentation de 0.6 % au deuxième trimestre, comparativement à une progression de 1.4 % au premier. Le ralentissement a été généralisé et traduit des hausses inhabituellement faibles pour les loyers.

Les investissements résidentiels enregistrent leur troisième augmentation consécutive importante, progressant de 25.9 % en volume au deuxième trimestre. La construction de nouveaux logements augmente fortement au cours du trimestre, avec une augmentation des mises en chantier de 25 % qui survient après une progression semblable au premier trimestre. Le nombre de mises en chantier de logements a atteint un sommet en mai avec l'expiration des programmes d'encouragement fédéraux pour la construction de nouvelles maisons. Les investissements résidentiels ont également été stimulés par la baisse des taux hypothécaires, le taux moyen de l'hypothèque conventionnelle de cinq ans passant de 15 % au quatrième trimestre de 1982 à 13 % au second trimestre de 1983. Les ventes de maisons existantes et les dépenses au titre des réparations et des modifications progressent également fortement au deuxième trimestre.

The rate of decline in the volume of business fixed investment in plant and equipment slowed to a drop of 0.6% in the second quarter. The deceleration was largely the result of a 2% upturn in expenditures on machinery and equipment, reflecting higher motor vehicle sales, following five consecutive quarterly declines. Business spending on non-residential construction fell 3.2%, slowing from the 4.8% decline in the first quarter. The results of the mid-year Public and Private Investment Intentions Survey indicate that firms had not revised their investment plans substantially from the forecast of December 1982; the major source of weakness is expected to continue to be non-residential construction for the remainder of 1983.

The volume of non-farm business inventories was reduced a further \$1.8 billion in the second quarter, a rate of decline similar to that of the first quarter. Irregularly large decumulations were recorded for petroleum and primary metals industries at the manufacturing stage and for the mining and utilities industries. The large decumulation in petroleum industries follows an extended period of weak demand and may have reflected the expectation by oil companies that the Petroleum Compensation charge was to be reduced substantially on July 1. Excluding the effect of this irregular movement, the decumulation of stocks at the manufacturing level continued to slow, although declines were recorded for the majority of industries. Sizeable reductions for primary metals, paper and wood product industries reflected robust export activity for their products. This increase in export demand also resulted in large declines in inventories of the forestry and mining industries. The decumulation of inventories in the utilities industries followed four quarters of unusually large increases. The inventory correction in the retail industry may be complete as stocks have increased slightly for two consecutive quarters.

The overall implicit deflator continued to rise at moderate rates, up 0.7% in the second quarter. The slowing in the rate of increase was largely attributable to weight shifts in the change in inventories, due to the large decumulations recorded in inventories of the high-priced energy products. The implicit deflator excluding inventory change rose 1.7% compared to 0.5% in the first quarter. An acceleration was recorded for the implicit deflator of government expenditure due to the reversal of the wage roll-back in the Quebec civil service in the first quarter.

Wages, salaries and supplementary labour income rose 2.7% in the second quarter, following an increase of only 0.4% in the first quarter. The acceleration was mostly due to faster employment growth

Le taux de diminution du volume des dépenses en immobilisations des entreprises en usines et matériel ralentit pour accuser un repli de 0.6 % au deuxième trimestre. Cette décélération s'explique surtout par une progression de 2 % des dépenses en machines et matériel, traduisant l'augmentation des achats de véhicules automobiles, après cinq baisses trimestrielles consécutives. Les dépenses des entreprises au titre de la construction non résidentielle diminuent de 3.2 %, soit moins qu'au premier trimestre (- 4.8 %). Les résultats de l'enquête de la mi-année sur les intentions d'investissements privés et publics indiquent que les entreprises n'ont pas sensiblement révisé leurs projets d'investissements par rapport aux prévisions de décembre 1982. On s'attend à ce que la principale cause de faiblesse pour le restant de 1983 soit toujours la construction non résidentielle.

Le volume des stocks commerciaux non agricoles a baissé une nouvelle fois (- \$1.8 milliard) au deuxième trimestre, ce qui représente un taux de diminution semblable à celui du premier. On note d'importantes décumulations irrégulières dans les secteurs du pétrole et de la première transformation des métaux au niveau de la fabrication, ainsi que dans les mines et les services publics. L'importante décumulation des branches d'activité du secteur pétrolier survient après une longue période de faible demande et peut traduire l'attente des compagnies pétrolières d'une réduction appréciable le 1^{er} juillet du prélèvement d'indemnisation pétrolière. Si l'on exclut l'effet de ce mouvement irrégulier, la décumulation des stocks au niveau de la fabrication reste lente, bien que l'on observe des baisses pour la plupart des branches d'activité. Les baisses appréciables dans le cas des branches de la première transformation des métaux, du papier et des produits du bois traduisent la vigueur des exportations de ces produits. Cette augmentation de la demande à l'exportation a également pour conséquence une baisse importante des stocks des branches des secteurs des forêts et des mines. La décumulation des stocks dans le secteur des services publics fait suite à quatre trimestres d'augmentations inhabituellement importantes. La correction des stocks pour le secteur du commerce de détail a peut-être pris fin, car les stocks n'ont augmenté que légèrement pendant deux trimestres consécutifs.

L'indice implicite général de déflation continue de progresser à des taux modérés (+ 0.7 %) au deuxième trimestre. Le ralentissement du taux d'augmentation est surtout imputable à des changements de pondération au sein de la variation des stocks, attribuables aux fortes décumulations enregistrées dans les stocks de produits énergétiques à prix élevés. L'indice implicite de déflation, excluant les variations de stocks, progresse de 1.7 %, comparativement à une hausse de 0.5 % au premier trimestre. On note une accélération de l'indice implicite de déflation des dépenses publiques en raison de la fin des coupures de salaires imposées dans le secteur public du Québec au premier trimestre.

La rémunération des salariés augmente de 2.7 % au deuxième trimestre, après une augmentation de seulement 0.4 % au premier. Cette accélération est imputable principalement à une croissance plus forte de l'emploi, bien que la

although the recovery from strike activity and the wage rollback in Quebec in the first quarter also contributed. A notable gain was recorded for wages and salaries in goods-producing industries which rose 4.2% in the second quarter compared to 0.7% growth in the first, in accordance with production. Over the course of the most recent recession wages and salaries of goods-producing industries declined nearly 6% from the fourth quarter of 1981 to the fourth quarter of 1982, and are now 0.7% below their most recent peak.

Corporate profits rose 9.9% in the second quarter, bringing the cumulative increase to 56% since the trough of the third quarter of 1982. Widespread increases recorded for industrial corporations were dampened by a decline in finance, insurance and real estate. Higher profits have resulted from increased sales and improved profit margins. A combination of lower interest rates and continued sharp reductions in the volume of inventories held have lowered short-term interest costs per dollar of sales.

The total government sector deficit was \$16.1 billion on a National Accounts basis, in the second quarter, down \$6.2 billion from the first quarter. Revenues rose 4.7% largely due to increased net income tax collections, although a large portion of this increase was due to the fact that income tax refunds which usually occur in the second quarter, were delayed. Petroleum related taxes and subsidies showed continued weakness in the second quarter. Government expenditures on goods and services rose 2.3%, recovering from the effects of strike activity and wage roll-backs in the first quarter.

The personal saving rate declined sharply in the second quarter, to 10.4% of personal disposable income, down from 12.5% in the first quarter of 1983 and 14.3% in the fourth quarter of 1982. Much of the decline in personal savings, however, is attributable to large increases in income tax collections, caused by the delay in personal income tax refund payments until the third quarter of 1983. The sharp increase in the ratio of personal income taxes to personal income to 15.8% from an average of 13.5% over the period of 1971 to 1982 indicates that the magnitude of the irregular tax collections is considerable. On this account, much of the apparent decline in the personal savings rate will likely be reversed in the third quarter.

reprise après les grèves et les coupures de salaires au sein du secteur public du Québec au premier trimestre ait également joué un rôle. On enregistre une hausse marquée de 4.2 % des salaires et traitements dans les branches d'activité productrices de biens au deuxième trimestre, comparativement à 0.7 % au premier, en accord avec l'évolution de la production. Au cours de la dernière récession, les salaires et traitements dans les branches d'activité productrices de biens ont baissé de près de 6 % entre le quatrième trimestre de 1981 et le quatrième de 1982, et se situent maintenant à un niveau inférieur de 0.7 % à leur dernier sommet.

Les bénéfices des sociétés augmentent de 9.9 % au deuxième trimestre, ce qui porte l'augmentation cumulative depuis le creux du troisième trimestre de 1982 à 56 %. Les hausses générales observées dans le cas des sociétés industrielles ont été atténuées par une baisse dans les finances, assurances et affaires immobilières. L'augmentation des bénéfices s'explique par une progression des ventes et l'amélioration des marges bénéficiaires. La diminution des taux d'intérêt et de fortes réductions continues du volume des stocks ont réduit les frais d'intérêts à court terme par dollar de vente.

Le déficit total du secteur des administrations publiques s'élève à \$16.1 milliards sur la base des comptes nationaux au deuxième trimestre, en baisse de \$6.2 milliards par rapport au premier. Les recettes s'accroissent de 4.7 %, surtout à cause de l'augmentation des perceptions nettes de l'impôt sur le revenu, bien qu'une importante partie de cette hausse s'explique par le fait que les remboursements d'impôts, habituellement versés au deuxième trimestre, aient été retardés. Les impôts et subventions reliés au pétrole demeurent faibles au deuxième trimestre. Les dépenses publiques en biens et services augmentent de 2.3 %, reprenant de la vigueur à la suite des grèves et des coupures de salaires au premier trimestre.

Le taux d'épargne personnelle baisse fortement au deuxième trimestre pour s'inscrire à 10.4 % du revenu personnel disponible, contre 12.5 % au premier trimestre de 1983 et 14.3 % au quatrième trimestre de 1982. Une grande partie de la diminution de l'épargne personnelle s'explique par les fortes hausses des perceptions de l'impôt sur le revenu des particuliers imputables au report des remboursements à ce titre jusqu'au troisième trimestre de 1983. Le ratio des impôts sur le revenu des particuliers au revenu personnel augmente fortement à 15.8 % au deuxième trimestre comparativement au ratio moyen de 13.5 % observé entre 1971 et 1982. Cette forte augmentation du ratio signifie que les perceptions fiscales irrégulières sont considérables. A cet égard, on peut s'attendre à ce que la tendance à la baisse du taux d'épargne personnelle soit en grande partie renversée au troisième trimestre.

Federal Government Petroleum-related Revenues and Expenditures

The petroleum-related programs of the federal government continued to have a significant effect on the movement of some of the federal income and expenditure items. The following table provides quarterly estimates, seasonally adjusted at annual rates, for 1982 and 1983 of the major petroleum-related programs.

L'administration fédérale et le pétrole - Recettes et dépenses

Les programmes reliés au pétrole de l'administration fédérale ont continué d'influencer fortement les taux de variation de certaines rubriques de ses revenus et dépenses. Le tableau suivant montre les estimations trimestrielles de 1982 et 1983, après désaisonnalisation au taux annuel, pour les principaux programmes reliés au pétrole.

Petroleum-related Revenues and Expenditures

(Seasonally Adjusted at Annual Rates)

Recettes et dépenses reliées au pétrole

(Après désaisonnalisation au taux annuel)

| | 1982 | | | 1983 | | |
|---------------------------------------------------------------------------------------------------------------|-------------------------------------------|-------|-------|---------------|-------|-------|
| | II | III | IV | Year Année | I | II |
| | millions of dollars – millions de dollars | | | | | |
| Revenues – Recettes | | | | | | |
| Direct taxes – Corporations – Impôts directs – sociétés: | | | | | | |
| Petroleum and gas revenue tax ¹ – Impôt sur les recettes du pétrole et du gaz naturel ¹ | 1,396 | 1,632 | 1,744 | 1,613 | 1,792 | 1,636 |
| Incremental oil revenue tax ¹ – Impôt sur les recettes pétrolières supplémentaires ¹ | 248 | 92 | 104 | 205 | 96 | 104 |
| Indirect taxes – Impôts indirects: | | | | | | |
| Oil export charge – Taxe à l'exportation du pétrole | 588 | 772 | 632 | 670 | 328 | 292 |
| Gasoline excise tax – Taxe d'accise sur l'essence | 380 | 432 | 452 | 408 | 448 | 252 |
| Natural gas and gas liquids excise tax – Taxe d'accise sur le gaz naturel et les liquides tirés du gaz | 1,428 | 1,016 | 1,300 | 1,238 | 1,128 | 876 |
| Petroleum compensation charge – Prélèvement d'indemnisation du pétrole | 3,048 | 3,372 | 3,160 | 3,283 | 1,828 | 1,308 |
| Canadian ownership charge – Prélèvement de participation canadienne | 876 | 880 | 908 | 908 | 856 | 692 |
| Expenditures – Dépenses | | | | | | |
| Subsidies – Subventions: | | | | | | |
| Importers' compensation – Versements de compensation aux importateurs | 1,680 | 1,828 | 1,144 | 1,744 | 1,048 | 212 |
| Syncrude subsidies – Subventions Syncrude | 1,316 | 1,296 | 1,928 | 1,298 | 1,556 | 1,340 |

¹ Estimated liabilities: collections include the incremental oil revenue tax and were \$1,552 million in the second quarter of 1982, \$1,368 million in the third quarter of 1982, \$1,320 million in the fourth quarter of 1982, \$2,936 million in the first quarter of 1983, and \$2,120 million in the second quarter of 1983.

¹ Créances estimatives: les perceptions comprennent l'impôt sur les recettes pétrolières supplémentaires et se sont élevées respectivement à \$1,552 millions au deuxième trimestre de 1982, à \$1,368 millions au troisième trimestre de 1982, à \$1,320 millions au quatrième trimestre de 1982, à \$2,936 millions au premier trimestre de 1983, et à \$2,120 millions au deuxième trimestre de 1983.

(1) Excludes profits of government business enterprises. (2) Includes the withholding tax applicable to this item. (3) Includes profits (net of losses) of government business enterprises and other government investment income. (4) Includes value of physical change in farm inventories as shown in line 14, Table 5. An adjustment has been made to take account of the accrued earnings of farm operators arising out of the operations of the Canadian Wheat Board. (5) Includes net income of independent professional practitioners and imputed net rent on owner-occupied dwellings. (6) See footnote 4, Table 2.

(1) Sans les bénéfices des entreprises commerciales publiques. (2) Y compris les retenues fiscales. (3) Y compris les bénéfices (pertes déduites) des entreprises commerciales publiques ainsi que les autres revenus de placements des administrations. (4) Y compris la valeur de la variation des stocks agricoles telle qu'elle figure à la rubrique 14 du tableau 5. Un ajustement a été effectué pour tenir compte des gains comptables découlant des activités de la Commission canadienne du blé. (5) Y compris le revenu net des personnes exerçant une profession pour propre compte et les loyers nets imputés des logements occupés par leur propriétaire. (6) Voir note 4, tableau 2.

(1) Includes defence expenditures. For amounts see line 45, Table 6. (2) Includes outlays on new durable assets such as building and highway construction by government, other than government business enterprises. Excludes defence construction and equipment which are defined as current expenditure. (3) Comprises capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. (4) The book value of inventories is deflated to remove the effect of price changes and the derived 'physical' change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment (see line 8, Table 1).

(1) Y compris les dépenses militaires présentées à la ligne 45, tableau 6. (2) Y compris les dépenses en biens durables neufs, comme les immeubles et les routes, des administrations publiques, sauf celles de leurs entreprises commerciales publiques. Ne comprend par les installations et le matériel militaires, considérés comme dépenses courantes. (3) Comprend les dépenses d'investissement des entreprises privées, des entreprises commerciales publiques et des institutions non commerciales privées, ainsi que les dépenses de construction résidentielle neuve des particuliers. Par définition, les dépenses d'investissement comprennent tous les frais de mutation relatifs à la vente et à l'achat d'immobilisations existantes. (4) La valeur comptable des stocks est déflatée de façon à supprimer l'effet des variations de prix. La variation 'matérielle' ainsi obtenue est ensuite évaluée aux prix moyens de la période courante, ce qui permet d'obtenir la valeur de la variation matérielle. La différence entre cette valeur de la variation matérielle et la variation de la valeur comptable est appelée ajustement de la valeur des stocks (voir ligne 8, tableau 1).

(1) The implicit price deflators of the seasonally unadjusted components of Gross National Expenditure, derived by dividing the value figures in Table 2 by the constant dollar figures in Table 10, are not suitable as indicators of quarter-to-quarter price change. This is because they are currently weighted and therefore are affected by compositional shifts which occur within the unadjusted components of Gross National Expenditure on a quarter-to-quarter basis. Quarter-to-quarter movement in the implicit price deflators based on seasonally adjusted data are less subject to the problem of shifting weights and may be used as a measure of price change.

(1) Les indices implicites de déflation de prix des composantes non désaisonnalisées de la dépense nationale brute, obtenus en divisant les valeurs en dollars courants du tableau 2 par les valeurs en dollars constants du tableau 10, ne sont pas de bons indicateurs de la variation des prix d'un trimestre à l'autre car ils sont à pondération courante et, par conséquent, sensibles aux changements de composition d'un trimestre à l'autre des diverses composantes non désaisonnalisées de la dépense nationale brute. Toutefois, les indices implicites de déflation de prix basés sur les séries désaisonnalisées sont moins sujets à ces changements de pondération et peuvent donc servir à mesurer les variations de prix.

(1) See footnote 1, Table 1.

(2) See footnote 2, Table 1.

(3) See footnote 3, Table 1.

(4) Includes an arbitrary smoothing of crop production, and standard seasonal adjustments for withdrawals of grain from farm stocks and for the change in farm-held livestock and other inventories. Because of the arbitrary element, too precise an interpretation should not be given the seasonally adjusted figures of accrued net income of farm operators.

(5) See footnote 5, Table 1.

(6) See footnote 4, Table 2.

(1) Voir note 1, tableau 1.

(2) Voir note 2, tableau 1.

(3) Voir note 3, tableau 1.

(4) Comprend un lissage arbitraire de la production culturelle et des ajustements saisonniers normalisés visant les prélèvements de céréales sur les stocks agricoles et la variation des cheptels et des autres stocks détenus dans les fermes. En raison de cet élément arbitraire, on ne devrait pas donner une interprétation trop rigoureuse des chiffres désaisonnalisés du revenu comptable net des exploitants agricoles.

(5) Voir note 5, tableau 1.

(6) Voir note 4, tableau 2.

(1) Includes defence expenditures. For amounts see line 45, Table 16. (2) See footnote 2, Table 2. (3) See footnote 3, Table 2. (4) See footnote 4, Table 2. (5) In the seasonally adjusted series, the value of grain crop production in each quarter is taken as one-fourth of the estimated value of crop production for the year as a whole (see footnote 4, Table 11). All other items in the farm inventories series are seasonally adjusted by standard techniques.

(1) See footnote 1, Table 6.

(2) The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four since real property taxes accrue uniformly throughout the taxation year. Because in recent years, changes in real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted taxes series.

(3) Includes capital consumption allowances as shown in line 92.

(1) Voir note 1, tableau 6.

(2) Les estimations trimestrielles des impôts fonciers, à la fois non désaisonnalisées et désaisonnalisées, sont obtenues en divisant les chiffres annuels par quatre, étant donné que ces impôts s'accumulent de façon uniforme tout au long de l'année d'imposition. Toutefois, comme les révisions ont en général relevé le niveau des impôts immobiliers au cours des dernières années, il en est résulté une saisonnalité fictive entre le quatrième et le premier trimestre dans les séries désaisonnalisées.

(3) Comprennent les provisions pour consommation de capital figurant à la ligne 92.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

System of National Accounts,
Gross National Product Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 995-0611) or to the Statistics Canada reference centre in:

| | | | |

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Système de comptabilité nationale,
Division du produit national brut,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-0611) ou au centre de consultation de Statistique Canada à:

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services in current and constant prices, is portrayed in the Input-Output tables of the System (Catalogue with prefix 15). The Catalogue Nos. carrying the prefix 61 provide constant dollar measures of the contribution of each industry to total Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue with prefix 14).

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by Financial Flow Accounts (Catalogue with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Levels of outstanding financial assets and liabilities are published annually as a major contribution towards a complete national balance sheet.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, *A System of National Accounts* (Studies in Methods, Series F, No. 2, Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le n° de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (n° de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services aux prix du marché et en dollars constants figure dans les tableaux d'entrées-sorties du système (n° de catalogue commençant par 15). Les publications dont les numéros de catalogue commencent par 61 comprennent les mesures en dollars constants de l'apport de chaque branche d'activité au total du produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le n° de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut par activité économique. Les comptes de flux financiers (publications dont les n°s de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les niveaux des actifs et passifs financiers en circulation sont disponibles annuellement; ils constituent un élément important d'un bilan national exhaustif.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, n° 2, rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

NOTE

In order to obtain a complete quarterly historical record of the National Income and Expenditure Accounts, the following publications should be consulted:

National Income and Expenditure Accounts, Volume 2, The Quarterly Estimates, 1947-1974, Catalogue 13-533, for the years 1947-1970.

National Income and Expenditure Accounts, First Quarter 1978, Catalogue 13-001 for the years 1971-1973.

National Income and Expenditure Accounts, First Quarter 1981, Catalogue 13-001 for the years 1974 and 1975.

NOTA

Pour disposer d'un dossier trimestriel historique complet des comptes nationaux des revenus et des dépenses, le lecteur est prié de consulter les publications suivantes:

Comptes nationaux des revenus et des dépenses, volume 2, Les estimations trimestrielles, 1947-1974, n° 13-533 au catalogue, pour la période 1947-1970.

Comptes nationaux des revenus et des dépenses, premier trimestre 1978, n° 13-001 au catalogue, pour la période 1971-1973.

Comptes nationaux des revenus et des dépenses, premier trimestre 1981, n° 13-001 au catalogue, pour la période 1974-1975.

Gross National Product rose 3.2% in the third quarter of 1983 to a level of \$396.7 billion, seasonally adjusted at annual rates. After allowing for price change, G.N.P. increased 2.0%.

Après désaisonnalisation au taux annuel, le produit national brut augmente de 3.2% au troisième trimestre de 1983 pour atteindre \$396.7 milliards. Après correction de la variation des prix, le PNB s'accroît de 2.0%.

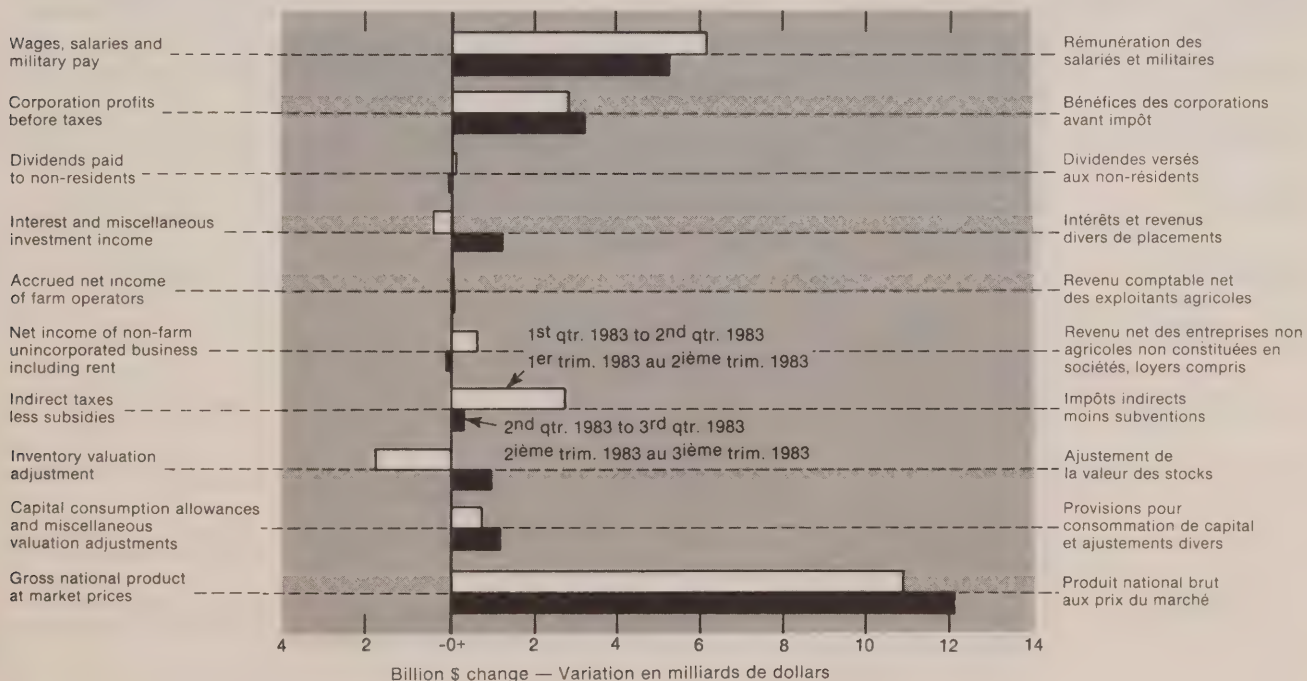

Wages, salaries and supplementary labour income and military pay and allowances increased 2.4% compared to 2.9% in the second quarter. Corporation profits before taxes rose 10.5% and interest and miscellaneous investment income advanced 4.1%.

La rémunération des salariés et militaires a augmenté de 2.4%, comparativement à 2.9% au deuxième trimestre. Les bénéfices des sociétés avant impôts se sont accrus de 10.5% pendant que les intérêts et revenus divers de placements montaient de 4.1%.

Quarterly changes in GNP and components

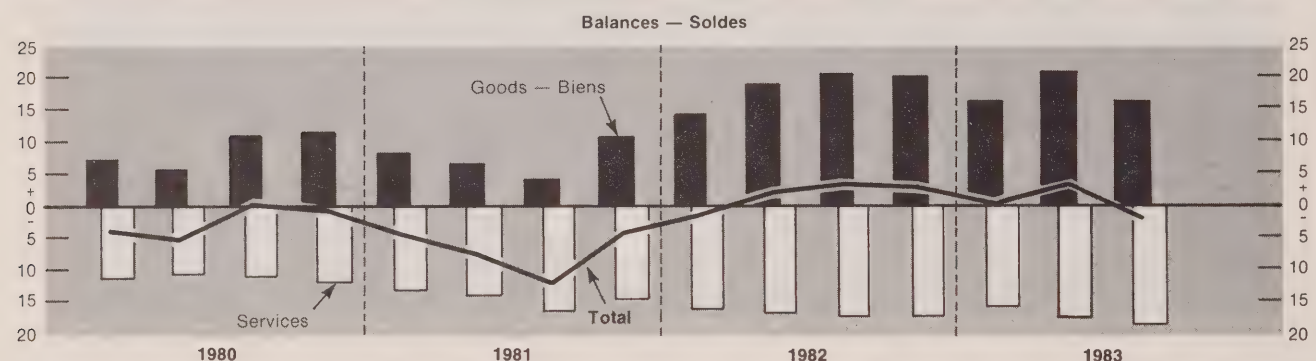

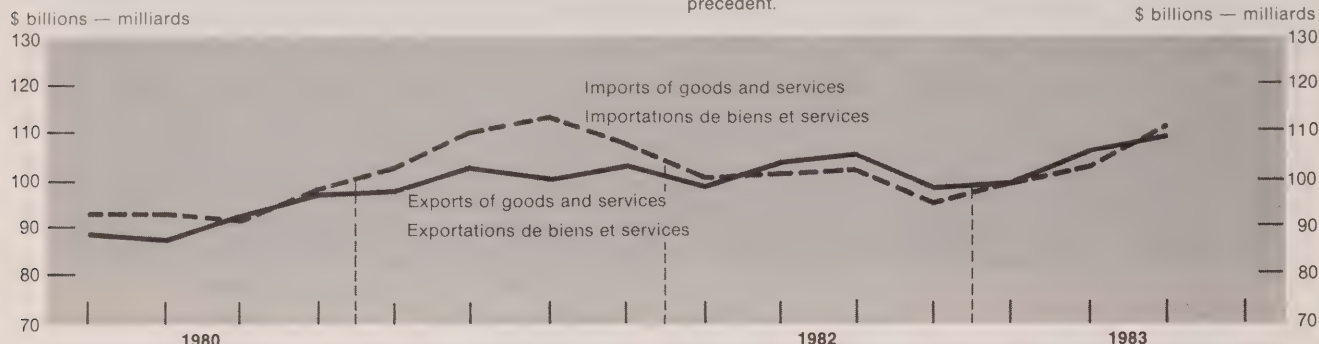

Mouvements trimestriels du PNB et de ses composantes

All quarterly data adjusted for seasonal variation and at annual rates. — Toutes les séries trimestrielles sont corrigées des variations saisonnières, aux taux annuels.

Exports and imports of goods and services recorded increases of 2.2% and 7.3% respectively. The nominal merchandise trade balance fell by \$4.7 billion in the third quarter to a level of \$16.3 billion, while the non merchandise trade deficit increased slightly resulting in a deficit in the balance of trade in goods and services of \$1.6 billion compared to a surplus of \$3.7 billion in the previous quarter.

Les exportations et importations de biens et services ont augmenté respectivement de 2.2% et 7.3%. Le solde nominal du commerce de marchandises a diminué de \$4.7 milliards au troisième trimestre pour s'établir à \$16.3 milliards, ce qui, avec l'augmentation légère du déficit sur invisibles, devait entraîner un déficit de \$1.6 milliard du solde du commerce en biens et services, comparativement à un surplus de \$3.7 milliards au trimestre précédent.

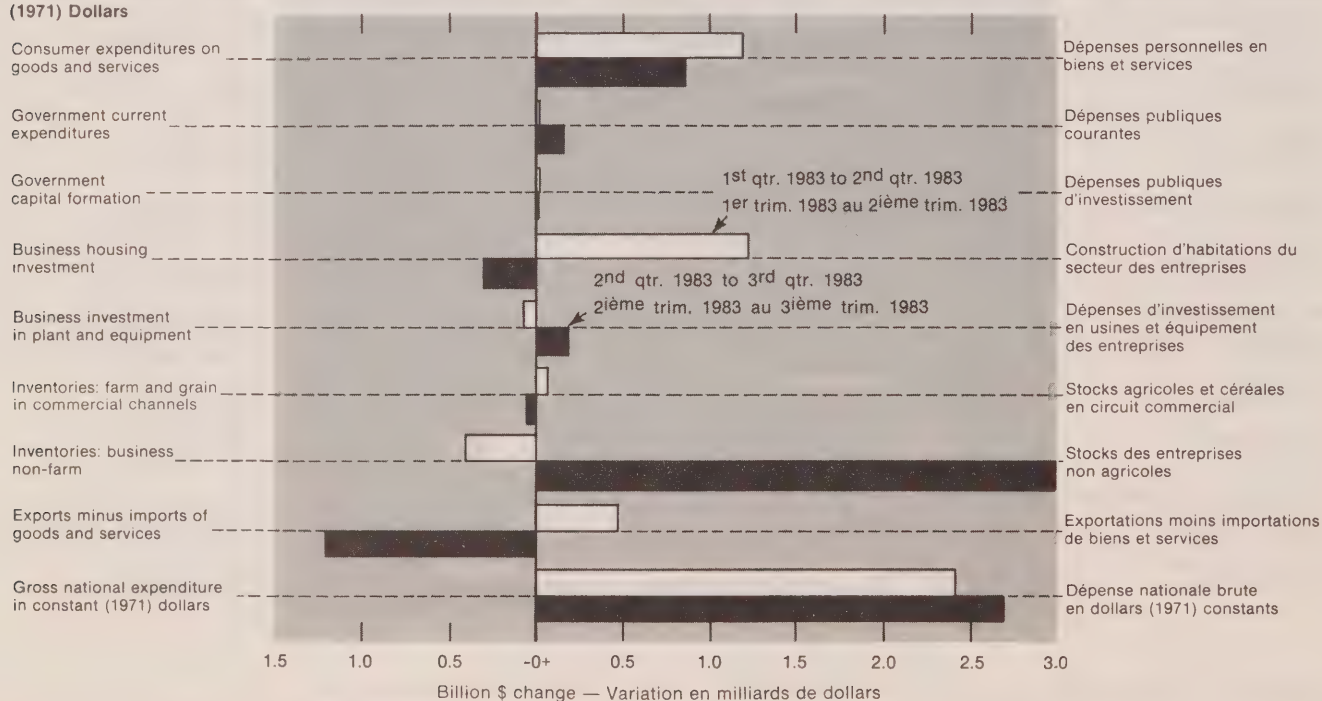

The major source of growth was a sharp swing in the volume of physical change in non-farm business inventories. Investment in residential construction declined while expenditure on business plant and equipment rose 0.9%. The rate of increase in personal expenditure on goods and services slowed slightly in the third quarter.

La croissance au troisième trimestre a été principalement attribuable au revirement important de la variation matérielle des stocks réels des entreprises non agricoles. L'investissement au titre de la construction résidentielle a baissé pendant que les dépenses en immobilisations des entreprises en usines et matériel montaient de 0.9%. Le taux d'augmentation des dépenses personnelles en biens et services a diminué légèrement au troisième trimestre.

Introduction

GROSS NATIONAL PRODUCT

Third Quarter 1983

Gross National Product rose 3.2% in the third quarter of 1983 to a level of \$396.7 billion, seasonally adjusted at annual rates. After allowing for a 1.1% increase in the overall price deflator, real GNP recorded the third consecutive increase, up 2.0%. This brings the recovery to date to 5.6% since the trough in the fourth quarter of 1982, although real GNP remains below the level recorded at the peak of activity in the second quarter of 1981.

The major source of growth in economic activity in the third quarter was a sharp swing in the volume of physical change in inventories to an accumulation of \$1.0 billion, following a decumulation of stocks through each of the previous seven quarters. Final domestic demand continued to recover, up 0.7% after an increase of 1.8% in the second quarter. The slowing was largely attributable to a decline in residential investment following the high rate of activity in the second quarter. Consumer demand slowed slightly in the third quarter. Purchases of durable goods continued to be the major source of growth, partially due to accelerated purchases of furniture and appliances. Business expenditure on machinery and equipment rose 4.1% following a 1.9% upturn in the second. The increase, which had been concentrated in motor vehicles in the second quarter, spread to include office and industrial machinery. In tandem with the increase in final domestic demand and inventories, imports rose a further 5.4% in real terms. The volume of export demand slowed to an increase of 2.0%.

The \$2.9 billion swing in the volume of physical change in inventories to an accumulation brings to an end the large 15% reduction in the volume of stocks which began in the fourth quarter of 1981. Most of the upswing can be accounted for by changes in four commodity groups: a reversal of the irregularly large decumulations of petroleum in the second quarter, and accumulations of automobiles, wood products, and primary metals.

PRODUIT NATIONAL BRUT

Troisième trimestre 1983

Après désaisonnalisation au taux annuel, le produit national brut augmente de 3.2 % au troisième trimestre de 1983 pour atteindre \$396.7 milliards. Compte tenu d'une augmentation de 1.1 % de l'indice global de déflation, le PNB réel affiche une troisième hausse consécutive (+ 2.0 %). La progression du PNB depuis le début de la reprise, après le creux du quatrième trimestre de 1982, s'établit à 5.6 %, mais le PNB réel n'a toujours pas atteint son sommet du deuxième trimestre de 1981.

La croissance au troisième trimestre est principalement attribuable à un revirement important de la variation matérielle des stocks réels, laquelle montre une accumulation de \$1.0 milliard, après une décumulation au cours de chacun des sept trimestres précédents. La demande intérieure finale continue de se redresser (+ 0.7 %), après avoir augmenté de 1.8 % au deuxième trimestre. Ce ralentissement s'explique dans une large mesure par la baisse des investissements dans le secteur résidentiel après le taux d'activité élevé du deuxième trimestre. La demande des consommateurs ralentit légèrement au troisième trimestre. Les achats de biens durables continuent à être la principale source de croissance, en partie à cause de l'accélération des achats de meubles et d'appareils ménagers. Les dépenses des entreprises en machines et matériel augmentent de 4.1 %, après s'être accrues de 1.9 % au deuxième trimestre. Cette augmentation, qui avait surtout touché les véhicules automobiles au deuxième trimestre, s'étend maintenant aux machines de bureau et industrielles. Parallèlement à l'augmentation des stocks et de la demande intérieure finale, on note une autre augmentation (+ 5.4 %) des importations en termes réels. La croissance en volume de la demande à l'exportation s'est ralentie (+ 2.0 %).

Le revirement de \$2.9 milliards de la variation matérielle des stocks réels qui a laissé une accumulation met fin à l'importante réduction de 15 % du volume des stocks qui avait commencé au quatrième trimestre de 1981. La plus grande partie de cette progression peut s'expliquer par les changements touchant quatre groupes de marchandises, soit un revirement après des décumulations exceptionnellement fortes de pétrole au deuxième trimestre et des accumulations dans le cas des automobiles, des produits du

There were indications that some of the accumulation in wood and primary metals was involuntary as export markets weakened during the quarter. There was little change in inventories of most other commodities, indicating that the period of large inventory correction is virtually complete. Although stock-to-sales ratios remain below pre-recession levels, there was little evidence of a concerted effort to re-build stocks. The accumulations were spread across industry groups. Most of the increase in retail stocks was accounted for by the accumulation in automobiles. The increases in petroleum, wood and primary metals was evident in both wholesale and manufacturing inventories. Over the past two years there has been evidence of changing seasonal patterns in inventory changes. This has resulted in large revisions to the inventory change at the time of the annual estimate, when the seasonal factors are updated. In accordance, the seasonal factors were updated during the year to try and estimate as best as possible the most current seasonal pattern.

Expenditure on business plant and equipment rose 0.9% in volume in the quarter following declines in the first half of 1983. Investment in machinery and equipment recorded a second consecutive increase and the rate of decline of non-residential construction slowed slightly. These indicators of business fixed investment are consistent with the results of the Mid-Year Public and Private Investment Intentions Survey for 1983. These results imply that non-residential construction will remain weak for the duration of 1983 and that machinery and equipment purchases will record a modest recovery in the latter half of 1983, but on average would remain below the weak levels recorded in 1982.

Personal expenditure on goods and services rose 1.0% in real terms in the quarter bringing the cumulative recovery to 3.8% since the trough of the third quarter of 1982. Expenditures on durable goods continued to outpace other categories, up 3.7% in the third quarter. Furniture and appliance purchases rose sharply in the quarter reflecting the removal of the Ontario sales tax during the May to August period and increased activity in residential investment in the previous quarters. Purchases of automobiles fell slightly in the third quarter following an exceptional increase in the order of 20% in the second quarter. Expenditure on non-durable goods continued to increase at moderate rates while small increases in purchases of semi-durables and services were recorded. Within the semi durable category, clothing sales continued to be the major

bois et des produits de la première transformation des métaux. Étant donné l'affaiblissement des marchés à l'exportation durant le trimestre, il se pourrait qu'une partie de l'accumulation des produits du bois et de la première transformation des métaux soit involontaire. Les stocks de la plupart des autres marchandises sont restés pratiquement inchangés, ce qui signifie que la période d'importantes corrections des stocks est pratiquement terminée. Même si les ratios des stocks aux ventes n'ont pas retrouvé leurs niveaux d'avant la récession, il ne semble pas exister d'efforts délibérés pour reconstituer les stocks. Les accumulations touchent tous les groupes d'industries. La plus grande partie de l'augmentation des stocks au niveau de détail est imputable à l'accumulation des stocks d'automobiles. Des hausses dans les cas du pétrole, des produits du bois et des produits de la première transformation des métaux ont été enregistrées autant dans les stocks du commerce de gros que dans le secteur manufacturier. Au cours des deux dernières années, on a noté des changements dans la structure saisonnière des variations de stocks, d'où les grandes révisions au temps de la révision annuelle lors de la mise à jour des facteurs saisonniers. Les facteurs saisonniers ont donc été révisés durant l'année pour estimer le plus fidèlement possible le modèle saisonnier actuel.

Les dépenses des entreprises en usines et matériel augmentent de 0.9 % en volume au troisième trimestre, après avoir baissé au cours du premier semestre de l'année. Les investissements en machines et matériel augmentent pour la deuxième fois consécutive, tandis que le taux de diminution de la construction non résidentielle ralentit quelque peu. Ces indicateurs des dépenses en immobilisations des entreprises sont conformes aux résultats de l'enquête sur les intentions d'investissements privés et publics de la mi-année pour 1983. D'après ces résultats, la construction non résidentielle devrait demeurer faible pour l'ensemble de 1983 tandis que les achats de machines et de matériel enregistreraient une modeste reprise au second semestre de 1983, mais dans l'ensemble resteraient inférieurs aux faibles niveaux enregistrés en 1982.

Les dépenses personnelles en biens et services augmentent de 1.0 % en termes réels au cours du troisième trimestre, ce qui porte le total de la reprise depuis le creux du troisième trimestre de 1982 à 3.8 %. Les dépenses en biens durables ont continué à dépasser celles des autres catégories, en progressant de 3.7 %. Les achats de meubles et d'appareils ménagers augmentent fortement au troisième trimestre, ce qui traduit la suppression de la taxe de vente de l'Ontario entre mai et août et l'accroissement des investissements résidentiels aux trimestres précédents. Les achats d'automobiles diminuent légèrement au cours du troisième trimestre, après avoir exceptionnellement augmenté de l'ordre de 20 % au second. Les dépenses en biens non durables continuent d'augmenter à des taux modérés, tandis que l'on observe de légères augmentations des achats de biens semi-durables et de services. Dans la catégorie des biens semi-durables, les ventes de vêtements

source of weakness. Service expenditures consisted of moderate increases in imputed and paid rents and declines in travel and transportation expenditures.

Residential investment fell 5.1% in the third quarter. This was partially due to the cutback in housing construction activity. Housing starts declined 41% in the third quarter following the sharp increase in the second corresponding with the ending of the Canadian Home Ownership Stimulation Program in May. Purchases of existing homes have followed a similar pattern to new housing investment, falling in the third quarter after a surge of activity earlier in the year.

The nominal merchandise trade balance fell by \$4.7 billion in the third quarter to a level of \$16.3 billion. Strong import demand reflected increased purchases by businesses of machinery and equipment and the build-up in petroleum and motor vehicle stocks in the quarter. Export demand slowed substantially, due to declines in shipments of most crude materials. Motor vehicle product shipments, which account for nearly one-quarter of Canadian exports, rose marginally due to higher shipments of trucks and automotive parts although passenger car export sales were down from the high levels of the first and second quarters. The non-merchandise deficit increased slightly in the third quarter; this, combined with a large deterioration of the merchandise trade surplus, resulted in a swing in the current account balance to a deficit of \$0.7 billion from a surplus of \$4.6 billion, seasonally adjusted at annual rates.

The overall implicit price index rose 1.1%, virtually the same rate of growth as recorded in the second quarter. This pattern of inflation was evident for prices of both consumer and producer goods and was reflected in the stable pattern of increases recorded for the implicit deflator for final domestic demand. The implicit deflator for merchandise imports rose 2.3% in the third quarter following three consecutive quarterly declines. The increase however, largely reflected weight shifts mostly due to increased imports of high-priced crude petroleum.

Labour income rose 2.4% in the third quarter compared to an increase of 2.9% in the second. Excluding the effect of strikes and special payments however, labour income growth accelerated from an increase of 2.3% in the second quarter to 2.5% in the third. Wages and salaries in the goods-producing industries grew 3.1%, largely attributable

continuent d'être la principale cause de faiblesse. Dans les services, on note une augmentation modérée au titre des logements payés et imputés et une baisse des dépenses reliées au transport et aux voyages.

Les investissements résidentiels se replient de 5.1 % au troisième trimestre. La baisse traduit en partie la réduction de la construction de logements, les mises en chantier de logements diminuant de 41 % au troisième trimestre après la forte augmentation du deuxième, ce qui correspond à l'expiration du programme canadien d'encouragement d'accession à la propriété en mai. Les achats de maisons construites ont suivi une tendance semblable à celle des investissements en logements neufs, baissant au troisième trimestre après avoir progressé plus tôt au cours de l'année.

Le solde nominal du commerce de marchandises diminue de \$4.7 milliards au troisième trimestre pour s'établir à \$16.3 milliards. La forte demande d'importations traduit l'accroissement des achats par les entreprises de machines et de matériel et l'accumulation des stocks de pétrole et de véhicules automobiles au cours du trimestre. La demande à l'exportation s'est ralentie de façon appréciable en raison d'une diminution des livraisons de la plupart des matières brutes. Les livraisons de produits de véhicules automobiles, qui comptent pour près du quart de toutes les exportations canadiennes, augmentent faiblement en raison d'une hausse des livraisons de camions et de pièces automobiles, bien que les exportations de voitures aient baissé par rapport aux niveaux élevés des premier et deuxième trimestres. Le déficit sur invisibles augmente légèrement au troisième trimestre, ce qui avec l'importante détérioration de l'excédent du commerce de marchandises, devait entraîner un revirement du solde du compte courant qui devait dégager un déficit de \$0.7 milliard comparativement à un excédent de \$4.6 milliards le trimestre précédent, après désaisonnalisation au taux annuel.

L'indice implicite d'ensemble de prix augmente de 1.1 %, soit pratiquement au même rythme qu'au deuxième trimestre. Cette tendance de l'inflation s'observe dans le cas des prix des biens de consommation et de production et se retrouve dans la stabilité des augmentations relevées pour l'indice implicite de déflation de la demande intérieure finale. L'indice implicite de déflation des importations de marchandises augmente de 2.3 % au troisième trimestre, après avoir baissé pendant trois trimestres consécutifs. Cette augmentation cependant traduit dans une large mesure les changements de pondération imputables en grande partie à l'accroissement des importations de pétrole brut à prix élevés.

Le revenu du travail augmente de 2.4 % au troisième trimestre, après s'être accru de 2.9 % au second. Si l'on exclut les effets des grèves et des paiements spéciaux, cependant, la croissance de revenu du travail s'est accélérée, de 2.3 % au deuxième trimestre à 2.5 % au troisième. Les salaires et traitements des branches productrices de biens augmentent de 3.1 %, principalement à cause de la hausse

to employment gains in manufacturing industries. In the service-producing industries most of the increase was recorded in the commercial industries.

Corporate profits rose a further 10.5% in the third quarter. Profits are now 74% higher than the trough in the third quarter of 1982 but remain below pre-recession levels. Higher sales and lower interest costs continue to contribute to the recovery of corporate balance sheets. The largest increases were recorded in the manufacturing and trade industries.

The personal saving rate rose to 14.2% of personal disposable income in the third quarter, up from 11.0% in the second. The irregular quarterly pattern of saving flows is largely attributable to the delay of income tax refunds, which are generally received in the first half of the year. The average of the saving rate for the first three quarters of 1983, 12.6%, is down substantially from the 15.1% recorded in 1982. This decline reflects a combination of a recovery of consumer expenditures, slow growth in wages and salaries and lower interest income.

The total government sector deficit, on a national accounts basis and seasonally adjusted at annual rates, rose \$7.3 billion to a level of \$25 billion in the third quarter. Much of the increase can be accounted for by the delayed payments of income tax refunds which resulted in an irregularly large decrease in net income tax receipts.

de l'emploi dans le secteur de la fabrication. Du côté des services, la plus grande partie de l'augmentation s'observe dans le cas des services commerciaux.

Les bénéfices des sociétés augmentent une nouvelle fois (+ 10.5 %) au troisième trimestre. Les bénéfices dépassent maintenant de 74 % leurs niveaux du creux du troisième trimestre de 1982, mais demeurent toujours inférieurs à leurs niveaux d'avant la récession. L'augmentation des ventes et la baisse des coûts sous forme d'intérêts ont continué de contribuer à l'amélioration des bilans des sociétés. Les augmentations les plus fortes s'observent dans les secteurs du commerce et de la fabrication.

Le taux de l'épargne personnelle passe à 14.2 % du revenu personnel disponible au troisième trimestre, comparativement à 11.0 % au second. La nature trimestrielle irrégulière des flux d'épargne est attribuable principalement aux retards des remboursements d'impôts sur le revenu, qui sont habituellement faits au premier semestre de l'année. La moyenne du taux d'épargne pour les trois premiers trimestres de 1983, soit 12.6 %, est sensiblement inférieure à celle de 1982, qui était de 15.1 %. Cette baisse traduit à la fois la reprise des dépenses des consommateurs, la lente croissance des salaires et traitements et la diminution des revenus sous forme d'intérêts.

Le déficit total du secteur des administrations publiques sur la base des comptes nationaux, après désaisonnalisation au taux annuel, augmente de \$7.3 milliards pour atteindre \$25 milliards au troisième trimestre. La plus grande partie de cette augmentation peut s'expliquer par le retard des remboursements d'impôts sur le revenu qui s'est traduit par une diminution inhabituellement importante des recettes fiscales nettes.

Federal Government Petroleum-related Revenues and Expenditures

The petroleum-related programs of the federal government continued to have a significant effect on the movement of some of the federal income and expenditure items. The following table provides quarterly estimates, seasonally adjusted at annual rates, for 1982 and 1983 of the major petroleum-related programs.

L'administration fédérale et le pétrole-Recettes et dépenses

Les programmes reliés au pétrole de l'administration fédérale ont continué d'influencer fortement les taux de variation de certaines rubriques de ses revenus et dépenses. Le tableau suivant montre les estimations trimestrielles de 1982 et 1983, après désaisonnalisation au taux annuel, pour les principaux programmes reliés au pétrole.

Petroleum-related Revenues and Expenditures (Seasonally Adjusted at Annual Rates)

Recettes et dépenses reliées au pétrole (Après désaisonnalisation au taux annuel)

| | 1982 | | | 1983 | | |
|---------------------------------------------------------------------------------------------------------------|-------------------------------------------|-------|---------------|-------|-------|-------|
| | III | IV | Year Année | I | II | III |
| | millions of dollars – millions de dollars | | | | | |
| Revenues – Recettes | | | | | | |
| Direct taxes – Corporations – Impôts directs – sociétés: | | | | | | |
| Petroleum and gas revenue tax ¹ – Impôt sur les recettes du pétrole et du gaz naturel ¹ | 1,632 | 1,744 | 1,613 | 1,792 | 1,596 | 1,728 |
| Incremental oil revenue tax ¹ – Impôt sur les recettes pétrolières supplémentaires ¹ | 92 | 104 | 205 | 96 | 104 | 76 |
| Indirect taxes – Impôts indirects: | | | | | | |
| Oil export charge – Taxe à l'exportation du pétrole | 772 | 632 | 670 | 328 | 224 | 392 |
| Gazoline excise tax – Taxe d'accise sur l'essence | 432 | 452 | 408 | 448 | 252 | 444 |
| Natural gas and gas liquids excise tax – Taxe d'accise sur le gaz naturel et les liquides tirés du gaz | 1,016 | 1,300 | 1,238 | 1,128 | 876 | 656 |
| Petroleum compensation charge – Prélèvement d'indemnisation du pétrole | 3,372 | 3,160 | 3,283 | 1,828 | 1,404 | 1,956 |
| Canadian ownership charge – Prélèvement de participation canadienne | 880 | 908 | 908 | 856 | 692 | 868 |
| Expenditures – Dépenses | | | | | | |
| Subsidies – Subventions: | | | | | | |
| Importers' compensation – Versements de compensation aux importateurs | 1,828 | 1,144 | 1,744 | 1,048 | 112 | 564 |
| Syncrude subsidies – Subventions Syncrude | 1,296 | 1,928 | 1,298 | 1,556 | 1,340 | 1,720 |
| Capital assistance – Subventions d'équipement: | | | | | | |
| Petroleum incentives program – Programme d'encouragement du secteur pétrolier | 1,980 | 1,760 | 935 | 1,720 | 1,812 | 1,528 |

¹ Estimated liabilities: collections include the incremental oil revenue tax and were \$1,368 million in the third quarter of 1982, \$1,320 million in the fourth quarter of 1982, \$2,936 million in the first quarter of 1983, \$2,120 million in the second quarter of 1983, and \$1,756 million in the third quarter of 1983.

¹ Créances estimatives: les perceptions comprennent l'impôt sur les recettes pétrolières supplémentaires et se sont élevées respectivement à \$1,368 millions au troisième trimestre de 1982, à \$1,320 millions au quatrième trimestre de 1982, à \$2,936 millions au premier trimestre de 1983, à \$2,120 millions au deuxième trimestre de 1983, et à \$1,756 millions au troisième trimestre de 1983.

(1) Excludes profits of government business enterprises. (2) Includes the withholding tax applicable to this item. (3) Includes profits (net of losses) of government business enterprises and other government investment income. (4) Includes value of physical change in farm inventories as shown in line 14, Table 5. An adjustment has been made to take account of the accrued earnings of farm operators arising out of the operations of the Canadian Wheat Board. (5) Includes net income of independent professional practitioners and imputed net rent on owner-occupied dwellings. (6) See footnote 4, Table 2.

(1) Sans les bénéfices des entreprises commerciales publiques. (2) Y compris les retenues fiscales. (3) Y compris les bénéfices (pertes déduites) des entreprises commerciales publiques ainsi que les autres revenus de placements des administrations. (4) Y compris la valeur de la variation des stocks agricoles telle qu'elle figure à la rubrique 14 du tableau 5. Un ajustement a été effectué pour tenir compte des gains comptables découlant des activités de la Commission canadienne du blé. (5) Y compris le revenu net des personnes exerçant une profession pour propre compte et les loyers nets imputés des logements occupés par leur propriétaire. (6) Voir note 4, tableau 2.

(1) Includes defence expenditures. For amounts see line 45, Table 6. (2) Includes outlays on new durable assets such as building and highway construction by government, other than government business enterprises. Excludes defence construction and equipment which are defined as current expenditure. (3) Comprises capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. (4) The book value of inventories is deflated to remove the effect of price changes and the derived 'physical' change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment (see line 8, Table 1).

(1) Y compris les dépenses militaires présentées à la ligne 45, tableau 6. (2) Y compris les dépenses en biens durables neufs, comme les immeubles et les routes, des administrations publiques, sauf celles de leurs entreprises commerciales publiques. Ne comprend pas les installations et le matériel militaires, considérés comme dépenses courantes. (3) Comprend les dépenses d'investissement des entreprises privées, des entreprises commerciales publiques et des institutions non commerciales privées, ainsi que les dépenses de construction résidentielle neuve des particuliers. Par définition, les dépenses d'investissement comprennent tous les frais de mutation relatifs à la vente et à l'achat d'immobilisations existantes. (4) La valeur comptable des stocks est déflatée de façon à supprimer l'effet des variations de prix. La variation 'matérielle' ainsi obtenue est ensuite évaluée aux prix moyens de la période courante, ce qui permet d'obtenir la valeur de la variation matérielle. La différence entre cette valeur de la variation matérielle et la variation de la valeur comptable est appelée ajustement de la valeur des stocks (voir ligne 8, tableau 1).

| 11 | Personal income | 55,834 | 58,932 | 66,842 | 62,734 | 244,342 | 65,142 | 68,701 | 80,065 | 73,568 | 287,476 |

(1) This item differs from line 6, Table 1 by excluding the adjustment which has been made to take account of the accrued net earnings arising out of the operations of the Canadian Wheat Board ('adjustment on grain transactions'). (2) Includes all interest on the public debt paid by government to persons.

(3) Charitable and other contributions, and bad debt write-offs.

(1) Cette rubrique diffère de la ligne 6, tableau 1. La différence consiste en l'exclusion de l'ajustement qui a été apporté pour tenir compte du revenu comptable net au titre des activités de la Commission canadienne du blé ('ajustement relatif aux transactions de céréales').

(2) Y compris tous les intérêts sur la dette publique payés par les administrations publiques aux particuliers.

(3) Dons de charité, autres contributions et amortissement des mauvaises créances.

(1) Comprennent les versements des particuliers, les contributions officielles des administrations publiques et les pensions versées par celles-ci.

(2) Comprennent les retenues fiscales, les pensions reçues et les versements de particuliers reçus de l'étranger.

(3) Épargne des résidents au titre des opérations avec des non-résidents sur la base des comptes nationaux des revenus et des dépenses. Les chiffres négatifs désignent l'épargne des non-résidents mise à la disposition de l'économie (voir ligne 8, tableau 8).

(1) The implicit price deflators of the seasonally unadjusted components of Gross National Expenditure, derived by dividing the value figures in Table 2 by the constant dollar figures in Table 10, are not suitable as indicators of quarter-to-quarter price change. This is because they are currently weighted and therefore are affected by compositional shifts which occur within the unadjusted components of Gross National Expenditure on a quarter-to-quarter basis. Quarter-to-quarter movement in the implicit price deflators based on seasonally adjusted data are less subject to the problem of shifting weights and may be used as a measure of price change.

(1) Les indices implicites de déflation de prix des composantes non désaisonnalisées de la dépense nationale brute, obtenus en divisant les valeurs en dollars courants du tableau 2 par les valeurs en dollars constants du tableau 10, ne sont pas de bons indicateurs de la variation des prix d'un trimestre à l'autre car ils sont à pondération courante et, par conséquent, sensibles aux changements de composition d'un trimestre à l'autre des diverses composantes non désaisonnalisées de la dépense nationale brute. Toutefois, les indices implicites de déflation de prix basés sur les séries désaisonnalisées sont moins sujets à ces changements de pondération et peuvent donc servir à mesurer les variations de prix.

(1) See footnote 1, Table 1.

(2) See footnote 2, Table 1.

(3) See footnote 3, Table 1.

(4) Includes an arbitrary smoothing of crop production, and standard seasonal adjustments for withdrawals of grain from farm stocks and for the change in farm-held livestock and other inventories. Because of the arbitrary element, too precise an interpretation should not be given the seasonally adjusted figures of accrued net income of farm operators.

(5) See footnote 5, Table 1.

(6) See footnote 4, Table 2.

(1) Voir note 1, tableau 1.

(2) Voir note 2, tableau 1.

(3) Voir note 3, tableau 1.

(4) Comprend un lissage arbitraire de la production culturale et des ajustements saisonniers normalisés visant les prélèvements de céréales sur les stocks agricoles et la variation des cheptels et des autres stocks détenus dans les fermes. En raison de cet élément arbitraire, on ne devrait pas donner une interprétation trop rigoureuse des chiffres désaisonnalisés du revenu comptable net des exploitants agricoles.

(5) Voir note 5, tableau 1.

(6) Voir note 4, tableau 2.

(1) Includes defence expenditures. For amounts see line 45, Table 16. (2) See footnote 2, Table 2. (3) See footnote 3, Table 2. (4) See footnote 4, Table 2. (5) In the seasonally adjusted series, the value of grain crop production in each quarter is taken as one-fourth of the estimated value of crop production for the year as a whole (see footnote 4, Table 11). All other items in the farm inventories series are seasonally adjusted by standard techniques.

(1) Y compris les dépenses militaires. Pour les montants, voir rubrique 45, tableau 16. (2) Voir note 2, tableau 2. (3) Voir note 3, tableau 2. (4) Voir note 4, tableau 2. (5) Dans les séries désaisonnalisées, on suppose que la valeur de la production céréalière de chaque trimestre est égale au quart de la production totale de l'année (voir note 4 au bas du tableau 11). Tous les autres éléments de la série sur les stocks agricoles sont désaisonnalisés à l'aide de méthodes normalisées.

(1) See footnote 1, Table 6.

(2) The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four since real property taxes accrue uniformly throughout the taxation year. Because in recent years, changes in real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted taxes series.

(3) Includes capital consumption allowances as shown in line 92.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

System of National Accounts,
Gross National Product Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 995-0611) or to the Statistics Canada reference centre in:

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, K1A 0T6.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Système de comptabilité nationale,
Division du produit national brut,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-0611) ou au centre de consultation de Statistique Canada à:

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services in current and constant prices, is portrayed in the Input-Output tables of the System (Catalogue with prefix 15). The Catalogue Nos. carrying the prefix 61 provide constant dollar measures of the contribution of each industry to total Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue with prefix 14).

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by Financial Flow Accounts (Catalogue with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Levels of outstanding financial assets and liabilities are published annually as a major contribution towards a complete national balance sheet.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, *A System of National Accounts* (Studies in Methods, Series F, No. 2, Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le n° de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (n° de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services aux prix du marché et en dollars constants figure dans les tableaux d'entrées-sorties du système (n° de catalogue commençant par 15). Les publications dont les numéros de catalogue commencent par 61 comprennent les mesures en dollars constants de l'apport de chaque branche d'activité au total du produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le n° de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut par activité économique. Les comptes de flux financiers (publications dont les n°s de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les niveaux des actifs et passifs financiers en circulation sont disponibles annuellement; ils constituent un élément important d'un bilan national exhaustif.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, n° 2, rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

In 1983 Gross National Product at market prices rose 9.0% to a level of \$388.7 billion. After allowing for price increases real GNP rose 3.0% following a decline of 4.4% in 1982.

\$ billions — milliards

Le PNB aux prix du marché a augmenté de 9.0% en 1983 pour atteindre \$388.7 milliards. Après correction de la hausse des prix, le PNB réel a progressé de 3.0%, après une baisse de 4.4% en 1982.

\$ billions — milliards

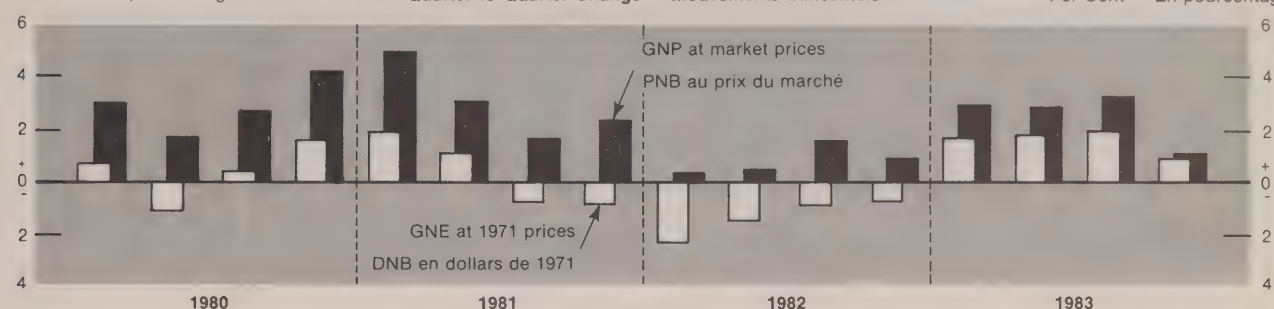

Gross National Product at market prices, seasonally adjusted at annual rates rose to a level of \$400.6 billion in the fourth quarter of 1983, an increase of 1.0%. In real terms the growth was 0.9%.

Après désaisonnalisation au taux annuel, le produit national brut aux prix du marché a augmenté de 1.0% au quatrième trimestre de 1983 pour atteindre \$400.6 milliards. La croissance a été de 0.9% en termes réels.

Per Cent — En pourcentage

Quarter-to-Quarter Change — Mouvements trimestriels

Per Cent — En pourcentage

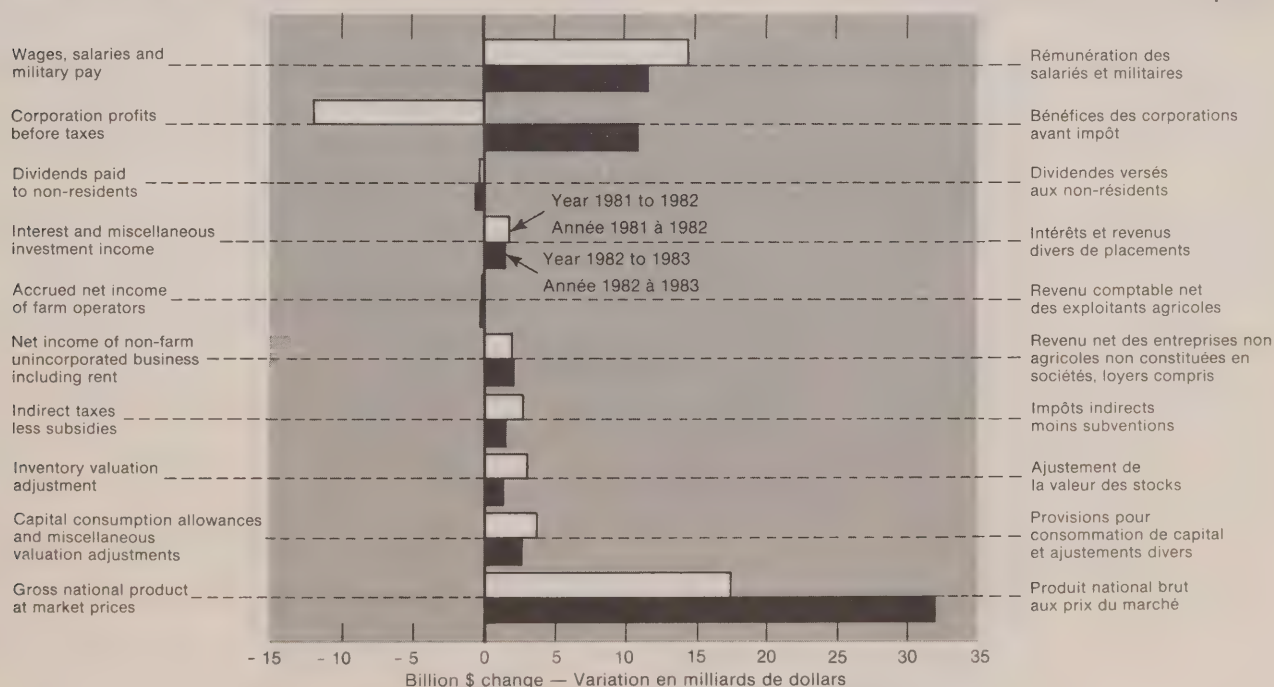

Wages, salaries and supplementary labour income and military pay and allowances increased 5.6% in 1983 compared to a 7.5% growth in 1982. Corporation profits before taxes showed a strong 52.8% increase following a decline of 36.1% in the previous year, while interest and miscellaneous investment income had increases of 6.7% and 5.2% in 1982 and 1983.

La rémunération des salariés et militaires a augmenté de 5.6% en 1983, en comparaison de 7.5% en 1982. Les bénéfices des sociétés avant impôts se sont fortement accrus de 52.8% après avoir baissé de 36.1% l'année précédente; les intérêts et revenus divers de placements ont enregistré des hausses de 6.7% et 5.2% en 1982 et 1983.

Annual changes in GNP and components

Mouvements annuels du PNB et de ses composantes

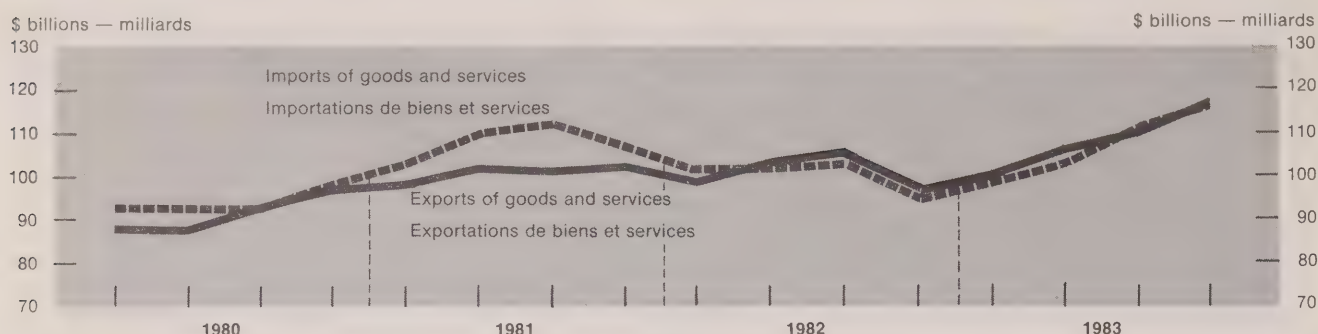

Note: All quarterly data adjusted for seasonal variation and annual rates.

Nota: Toutes les séries trimestrielles sont corrigées des variations saisonnières, aux taux annuels.

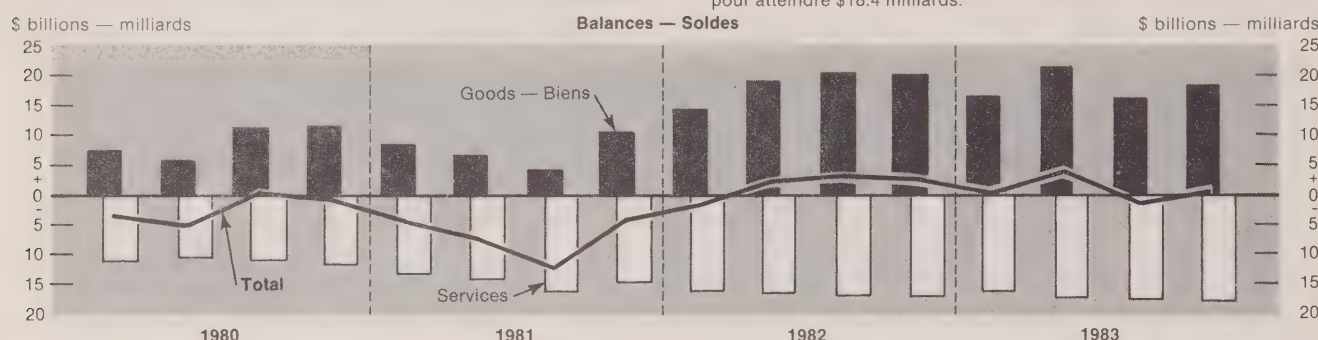

In 1983 exports and imports of goods and services rose 6.6% and 7.6% respectively resulting in a drop in the surplus on goods and services from \$1.6 billion in 1982 to \$0.7 billion in 1983.

Les exportations et importations de biens et services ont augmenté respectivement de 6.6% et 7.6% en 1983; l'excédent du commerce en biens et services est tombé de \$1.6 milliard en 1982 à \$0.7 milliard en 1983.

In the fourth quarter of 1983, exports of goods and services advanced 7.6% while imports rose 5.6%. The merchandise trade surplus increased by \$2.4 billion to a level of \$18.4 billion.

Les exportations et importations de biens et services se sont accrues respectivement de 7.6% et 5.6% au quatrième trimestre de 1983. Le surplus dans le commerce des marchandises a augmenté de \$2.4 milliards pour atteindre \$18.4 milliards.

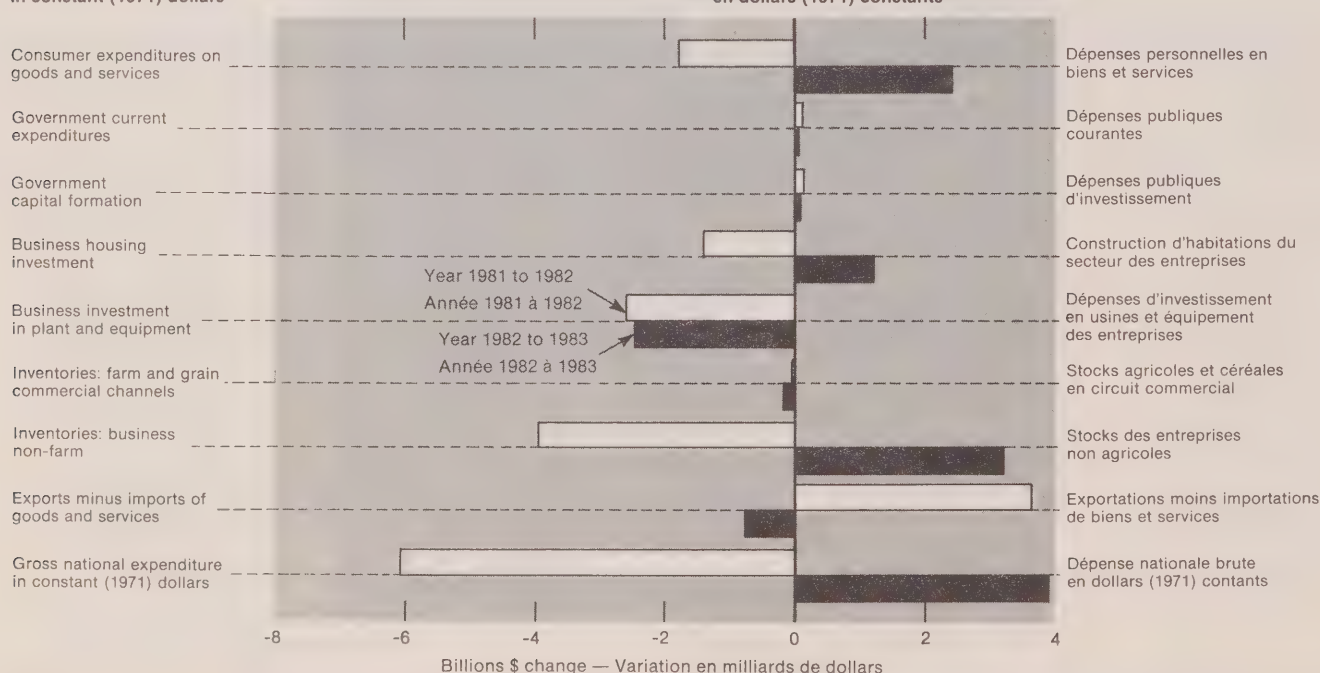

A sharply lower rate of inventory decumulation, a 3.1% increase in real personal expenditure, a 9.0% recovery in the volume of merchandise exports and a 27.6% increase in residential construction activity were the major contributors to the recovery of economic activity in 1983.

La reprise de l'activité économique en 1983 a été stimulée de façon importante par des taux beaucoup plus faibles de liquidation des stocks, une augmentation de 3.1% des dépenses personnelles réelles, une reprise de 9.0% du volume des exportations de marchandises et une hausse de 27.6% dans l'activité de la construction résidentielle.

Introduction

GROSS NATIONAL PRODUCT

Preliminary Annual and Fourth Quarter 1983

Gross National Product rose 1.0% in the fourth quarter of 1983 to a level of \$400.6 billion, seasonally adjusted at annual rates. Combined with virtually no change in the level of overall prices, real GNP rose 0.9%. Although this represented a slowing from the average rates of increase of 1.9% recorded in the first three quarters, the recovery phase of the business cycle was virtually completed as real GNP reached 99.7% of its peak level of the second quarter of 1981.

For the year as a whole, Gross National Product rose 9.0% to a level of \$388.7 billion. After allowing for an increase of 5.8% in the overall implicit deflator, real GNP rose 3.0% in the year. This followed a decline of 4.4% in real activity in 1982.

The recovery of economic activity in 1983 was broadly based with major contributions from a sharply lower rate of inventory decumulation, a 3.1% increase in real personal expenditure, a 9.0% recovery in the volume of merchandise exports, and a 27.6% increase in residential construction activity. Continued weakness in business investment in plant and equipment was the major restraining factor. A sharp reduction in inflation was evident as the overall implicit deflator rose 5.8% compared to 10.1% in 1982.

The swing in non-farm business inventories of \$3.3 billion (which was the result of a decline in stocks of \$3.4 billion in 1982 and virtually no change in 1983) was the equivalent of 83% of the increase in real GNP. The year was characterized by continued declines in stocks in the first two quarters and a resumption of inventory investment in the latter half of the year. Declining short-term interest costs associated with holding inventories was a major factor in the improvement of the profitability of firms in the year. The moderate recovery of stocks in the latter half of the year despite the more rapid improvement in final demand, probably indicated an attempt on the part of firms to keep associated interest costs low.

PRODUIT NATIONAL BRUT

Estimations annuelles provisoires et quatrième trimestre 1983

Après désaisonnalisation au taux annuel, le produit national brut augmente de 1.0 % au quatrième trimestre de 1983 pour atteindre \$400.6 milliards. Avec un niveau d'ensemble des prix pratiquement inchangé, le PNB réel progresse de 0.9 %. Même si cette hausse marque un ralentissement par rapport au taux moyen d'augmentation de 1.9 % enregistré au cours des trois premiers trimestres, la phase de reprise du cycle d'affaires est pratiquement terminée, le PNB réel se retrouvant à 99.7 % de son sommet du deuxième trimestre de 1981.

Pour l'ensemble de l'année, le produit national brut augmente de 9.0 % pour atteindre \$388.7 milliards. Compte tenu d'une augmentation de 5.8 % de l'indice implicite général de déflation, le PNB réel progresse de 3.0 % durant l'année. En 1982, l'activité réelle avait accusé une baisse de 4.4 %.

La reprise de l'activité économique a été générale; elle a été stimulée de façon importante par des taux beaucoup plus faibles de liquidation des stocks, une augmentation de 3.1 % des dépenses personnelles réelles, une reprise de 9.0 % du volume des exportations de marchandises et une hausse de 27.6 % dans l'activité de la construction résidentielle. Le principal facteur de freinage a été la faiblesse persistante des investissements des entreprises en usines et matériel. On observe une forte réduction de l'inflation, l'indice implicite général de déflation progressant de 5.8 % contre 10.1 % en 1982.

Le revirement de \$3.3 milliards des stocks commerciaux non agricoles (résultant d'une baisse de \$3.4 milliards en 1982 combinée à un niveau pratiquement inchangé en 1983) représente 83 % de l'augmentation du PNB réel. L'année a été caractérisée par une baisse continue des stocks au cours des deux premiers trimestres et une reprise des mises en stocks au cours de la deuxième moitié de l'année. La diminution des coûts d'intérêts à court terme pour le maintien des stocks a constitué un facteur important dans l'amélioration de la rentabilité des entreprises durant l'année. La reprise modérée des stocks au second semestre, malgré une plus grande amélioration de la demande finale, dénote sans doute un souci de la part des entreprises de minimiser les coûts d'intérêts.

The recovery of personal expenditures was concentrated in the interest-rate sensitive components as purchases of durables rose 10.7% in volume (most notably passenger cars, furniture and appliances) relative to the 1.6% increase in other expenditures. The underlying weakness in most categories of consumer spending is likely a result of weak income growth. Personal disposable income grew only 5.1% in 1983 in nominal terms. This was the second consecutive year in which disposable income did not grow as fast as the implicit deflator for personal expenditure, leaving real personal disposable income slightly below 1981 levels.

Residential construction, the other major interest-rate sensitive component of the economy, recovered sharply in the first half of the year, rising 38% in volume from the fourth quarter of 1982 to the second quarter of 1983. This corresponded to a drop in the five-year conventional mortgage rate from 15.0% to 13.1% and the impact of the Canadian Home Ownership Stimulation Program. Activity declined in the latter half of the year following the end of the program in May and the leveling off of mortgage rates.

Strength in export demand (up 6.6% in current dollars) corresponded to a recovery of economic activity in the United States, which proceeded with a similar momentum to that in Canada. Import demand also picked up in 1983 (up 7.6% in current dollars) in conjunction with improved demand in the Canadian economy. This left the nominal merchandise trade surplus down only \$297 million from the record \$18.3 billion surplus recorded in 1982, and total net exports in a surplus for the second consecutive year. In the volume measures, the recovery in imports of motor vehicles was particularly strong, up over 50%. Reflecting the weakness in overall investment, imports of industrial machinery declined around 8% in the year. The recovery in exports was most evident in fabricated materials and end-products, both up 11% in the year, largely attributable to increased demand for lumber and automobiles. The prices of imported goods and services declined 1.0% in 1983 reflecting weakness in prices on world commodity markets; export prices were stable such that the index of the terms of trade rose by 2.8% in the year.

Business investment in plant and equipment continued to decline in 1983, down 12.2% in real terms compared to a drop of 11.2% in 1982. Despite the sharp improvement in profits in the year (corporate profits before taxes rose 53% in 1983) corporate balance sheets had not fully recovered as debt to equity ratios remained high and liquidity ratios low. Capacity utilization rates in manufacturing increased with the

Dans les dépenses personnelles, la reprise a touché surtout les achats sensibles aux taux d'intérêt (notamment les voitures, les meubles et les appareils ménagers), alors que les achats de biens durables augmentent de 10.7 % en volume contre 1.6 % pour les autres dépenses. La faiblesse inhérente à la plupart des catégories de dépenses de consommation est sans doute imputable à la faible croissance des revenus. Le revenu personnel disponible n'augmente que de 5.1 % en 1983 en termes nominaux. Il s'agit de la deuxième année consécutive où le revenu disponible n'augmente pas aussi rapidement que l'indice implicite de déflation des dépenses personnelles, ce qui laisse le revenu personnel disponible réel à un niveau légèrement inférieur à celui de 1981.

L'autre composante importante de l'économie qui soit sensible aux taux d'intérêt, la construction résidentielle, s'est fortement redressée au premier semestre de l'année, progressant de 38 % en volume entre le quatrième trimestre de 1982 et le deuxième trimestre de 1983. Cette progression coïncide avec la chute du taux d'une hypothèque conventionnelle de cinq ans de 15.0 % à 13.1 % et à l'introduction du programme d'encouragement à l'accession à la propriété. L'activité a diminué au second semestre avec l'expiration du programme en mai et la stabilisation des taux hypothécaires.

La fermeté de la demande à l'exportation (+ 6.6 % en dollars courants) coïncide avec la reprise de l'activité économique qui s'est effectuée aux États-Unis à un rythme semblable à celle du Canada. La demande à l'importation a également progressé en 1983 (+ 7.6 % en dollars courants), avec l'amélioration de la demande au sein de l'économie canadienne. Par conséquent, l'excédent nominal du commerce de marchandises est inférieur de \$297 millions seulement au niveau record de \$18.3 milliards enregistré en 1982; les exportations totales nettes sont excédentaires pour la deuxième année consécutive. En termes réels, la reprise dans les importations de véhicules automobiles a été particulièrement forte; ces dernières ont augmenté de plus de 50 %. Conformément à la faiblesse de l'ensemble de l'investissement, les importations de machines industrielles ont baissé d'environ 8 % au cours de l'année. La reprise dans les exportations a été surtout concentrée dans les matières travaillées et produits finis, en hausse tous les deux de 11 % pour l'année; les hausses ont surtout touché le bois et les automobiles. Les prix des importations de biens et services ont baissé de 1.0 % en 1983, traduisant la faiblesse des prix sur les marchés mondiaux des produits; quant aux prix à l'exportation, ils sont restés stables de telle sorte que l'indice des termes de l'échange a augmenté de 2.8 % au cours de l'année.

Les investissements des entreprises en usines et matériel ont continué à se replier en 1983, en baisse de 12.2 % en termes réels, contre une diminution de 11.2 % en 1982. Malgré la forte amélioration des bénéfices (les bénéfices des sociétés avant impôts augmentent de 53 % en 1983), les bilans des sociétés ne se sont pas entièrement rétablis car les ratios d'endettement demeurent élevés et les ratios de liquidité bas. Les taux d'utilisation de la capacité dans le

recovery in activity but by the third quarter still remained 10 percentage points below pre-recession levels. Preliminary results of the Department of Regional and Industrial Expansion survey of investment intentions of large firms indicate that the weakness may continue into 1984.

Labour income continued to slow despite the upturn in employment for the year, rising 5.6% in 1983 following a 7.4% increase in 1982. Paid-worker employment rose 0.5%, following a 3.6% decline in the previous year. The implied sharp slowdown in average earnings in 1983 was due to a combination of lower wage increases in the year and a shift in the composition of employment to a higher proportion of part-time workers.

This slowdown in labour income growth was a major source of the weakness in personal income in the year. Consistent with the high levels of spending on durable goods, the flow of savings was reduced such that the personal savings fell from 15.1% of personal disposable income in 1982 to 12.9% in 1983.

The total government sector deficit rose to a level of \$22.7 billion on a national accounts basis, an increase of \$3.8 billion in 1983 following an increase of \$15.1 billion recorded in 1982. Total expenditures slowed to an increase of 10.0% following an increase of 16.4% in 1982, largely due to slower growth in wages and salaries, transfer payments and interest on the public debt. Government revenues rose at a slightly faster rate than in 1982, up 8.7%, largely due to the increase in corporate tax liabilities.

Fourth Quarter Detail

The major source of growth in real activity in the fourth quarter was the strong performance of merchandise exports, up 8.5% in volume following an increase of 1.2% in the third quarter. This largely reflected buoyant final domestic demand in the United States, which has risen on average 1.3% per quarter throughout the year of 1983. The slowing of the recovery in Canada in the fourth quarter was largely attributable to weak final domestic demand. Residential construction and business investment in plant and equipment declined at accelerated rates in the fourth quarter, and the recovery of consumer expenditure slowed. Concurrently with the slowing of final domestic demand, paid-worker employment decelerated to an increase of 0.5% from 1.2% in the third quarter. The pace of inventory investment continued at moderate rates in the quarter despite the sharp recovery in the volume of sales of goods since the fourth quarter of 1982.

secteur de la fabrication ont augmenté avec la reprise de l'activité, mais n'en demeuraient pas moins de 10 points inférieurs à leurs niveaux d'avant la récession au troisième trimestre. Les résultats provisoires de l'enquête sur les intentions d'investissements des grandes entreprises du Ministère de l'Expansion industrielle régionale laissent entrevoir que la faiblesse pourrait se poursuivre en 1984.

Le revenu du travail a continué de ralentir malgré le redressement de l'emploi au cours de l'année, avec une progression de 5.6 % en 1983 contre 7.4 % en 1982. L'emploi rémunéré augmente de 0.5 %, après une baisse de 3.6 % l'année précédente. Le brusque ralentissement des gains moyens en 1983 est le résultat conjugué de plus faibles augmentations de salaire et d'un changement dans la composition de l'emploi, soit une augmentation du travail à temps partiel.

Ce ralentissement du revenu du travail est une des principales causes de la faiblesse du revenu personnel durant l'année. En accord avec le niveau élevé des dépenses en biens durables, le flux de l'épargne s'est réduit et l'épargne personnelle est tombée de 15.1 % du revenu personnel disponible en 1982 à 12.9 % en 1983.

Le déficit total du secteur des administrations a atteint \$22.7 milliards sur la base des comptes nationaux, en hausse de \$3.8 milliards après l'augmentation de \$15.1 milliards en 1982. Les dépenses totales ne s'accroissent que de 10.0 % (contre 16.4 % en 1982) surtout à cause de la croissance plus faible des traitements et salaires, des paiements de transfert et de l'intérêt sur la dette publique. Les recettes des administrations progressent légèrement plus vite qu'en 1982 (+ 8.7 %) principalement à cause de l'accroissement des créances fiscales sur les sociétés.

Quatrième trimestre

La principale cause de croissance de l'activité réelle au quatrième trimestre a été la forte performance des exportations de marchandises, en hausse de 8.5 % en volume après une augmentation de 1.2 % au troisième trimestre. Ceci traduit principalement une demande intérieure finale dynamique aux États-Unis, laquelle a augmenté en moyenne de 1.3 % par trimestre au cours de l'année 1983. Le ralentissement de la reprise au Canada au quatrième trimestre est surtout imputable à la faiblesse de la demande intérieure finale. La baisse de la construction résidentielle et des investissements des entreprises en usines et matériel s'est accentuée au quatrième trimestre, et la reprise des dépenses de consommation s'est ralentie. En parallèle avec le ralentissement de la demande intérieure finale, la croissance de l'emploi rémunéré a fléchi, passant de 1.2 % au troisième trimestre à 0.5 % au quatrième. Les mises en stocks se sont poursuivies à un rythme modéré au cours du trimestre, malgré la forte reprise du volume des ventes de biens depuis le quatrième trimestre de 1982.

The acceleration of export demand was widespread across commodity groups with the largest increase recorded in exports of motor vehicle products. Import demand slowed in the fourth quarter so that the nominal merchandise trade balance rose \$2.4 billion to a level of \$18.4 billion at annual rates. With virtually no change in the non-merchandise deficit, net exports recorded a \$0.4 billion surplus, after a \$1.7 billion deficit in the third quarter.

The volume of personal expenditures rose 0.8% in the fourth quarter, a slight deceleration from the 1.3% increase recorded in the third. Demand for automobiles was the major source of strength and purchases of durable goods have surpassed pre-recession levels. When automobiles are excluded, personal expenditure on goods was unchanged in the fourth quarter (compared to an increase of 1.0% when they are included), indicating that Christmas spending was relatively sluggish in 1983. Personal expenditure on services continued to grow at moderate rates, up 0.6% in the quarter.

Business fixed investment fell 4.3% in volume in the fourth quarter following a decline of 1.5% in the third. Residential investment dropped 11.9% as new housing construction activity continued to decline following the rapid pace of the recovery recorded in the first half of 1983. The drop in construction was reinforced by declines in the volume of alterations and real estate commissions. Renewed weakness was recorded for business investment in plant and equipment in the fourth quarter. Investment in machinery and equipment fell slightly in volume following two quarters of increases. This largely reflected a slowing demand for industrial machinery and equipment as expenditures on commercial vehicles remained strong. Non-residential construction continued to decline in the fourth quarter, down a further 3.4% in real terms.

Inventory investment continued at moderate rates in the fourth quarter with accumulations recorded for virtually all industry groups. As mentioned above, the rate of inventory investment has been very sluggish to date, relative to the recovery in demand. This slow rate of inventory investment may continue into early 1984 given the most recent business conditions survey where the majority of manufacturers judged inventory levels to be "about right", despite the low stock-to-sales ratio.

The overall implicit deflator was virtually unchanged in the fourth quarter. Much of the deceleration, however, was due to weight shifts within inventories rather than price changes. The implicit deflator for GNE excluding inventories rose 0.6% relative to the

L'accélération de la demande à l'exportation a touché tous les groupes de marchandises, les exportations de produits automobiles progressant le plus. La demande à l'importation s'est ralentie au quatrième trimestre, et le solde nominal du commerce de marchandises augmente ainsi de \$2.4 milliards pour atteindre \$18.4 milliards au taux annuel. Avec un déficit sur invisibles pratiquement inchangé, les exportations nettes passent d'un déficit de \$1.7 milliard au troisième à un surplus de \$0.4 milliard.

Le volume des dépenses personnelles augmente de 0.8 % au quatrième trimestre, soit légèrement moins qu'au troisième (+ 1.3 %). La demande d'automobiles a été la principale cause de fermeté alors que les achats de biens durables ont dépassé leur niveau d'avant la récession. Lorsque l'on exclut les automobiles, les dépenses personnelles en biens demeurent inchangées au quatrième trimestre (contre une hausse de 1.0 % lorsqu'elles sont prises en compte), ce qui dénote que les dépenses de Noël ont été relativement lentes en 1983. Les dépenses personnelles en services ont continué d'augmenter à un taux modéré, en hausse de 0.6 % pour le trimestre.

Les dépenses en immobilisations des entreprises diminuent de 4.3 % en volume au quatrième trimestre, après avoir baissé de 1.5 % au troisième. Les investissements résidentiels chutent de 11.9 %, alors que la construction résidentielle neuve continue de se replier après les fortes progressions observées au premier semestre de 1983. Cette chute se trouve accentuée par une baisse en volume des modifications et des commissions immobilières. On observe de nouveau une faiblesse dans les investissements des entreprises en usines et matériel au quatrième trimestre. Les investissements en machines et matériel diminuent légèrement en volume, après deux trimestres de progressions. Cette baisse traduit dans une large mesure le ralentissement de la demande de machines et matériel industriels puisque les dépenses en véhicules commerciaux demeurent fortes. La construction non résidentielle diminue encore au quatrième trimestre (– 3.4 % en termes réels).

Les mises en stocks se sont poursuivies à un rythme modéré au quatrième trimestre, pratiquement tous les secteurs enregistrant une accumulation. Tel que mentionné précédemment, le taux de mise en stocks a été très lent depuis le début de l'année compte tenu de la reprise de la demande. Cette tendance pourrait se maintenir jusqu'au début de 1984, à la lumière de la dernière enquête sur les perspectives du monde des affaires, où la majorité des fabricants estimaient que le niveau des stocks était "à peu près satisfaisant", malgré un faible ratio des stocks aux ventes.

L'indice implicite général de déflation demeure pratiquement inchangé au quatrième trimestre. La plus grande partie du ralentissement, cependant, est imputable à des changements de pondération dans les stocks plutôt qu'à des variations de prix. L'indice implicite de déflation de la DNB

0.7% increase recorded in the third quarter. This is more reflective of the stabilization evident in other aggregate measures of inflation in the fourth quarter.

Labour income growth decelerated in tandem with employment growth in the fourth quarter, rising only 0.9%, following an increase of 2.3% in the previous quarter. The slowing was attributable to declines in the forestry, mining and construction industries due to lower employment. The personal savings rate dropped to 12.3% in the fourth quarter, a rate more reflective of the savings flows for the year. The savings rate was irregularly high in the third quarter due to the delay of personal income tax refunds this year.

The growth of corporate profits also slowed in the fourth quarter rising only 4.2% relative to average increases of 14.5% in the previous four quarters. While the increases in the previous quarters had been largely due to a combination of rising sales and declining interest costs, the increase in the fourth quarter was mainly attributable to higher sales. Lower profit increases were most evident in retail and wholesale trade industries, while the largest increase was recorded in the automobile industry.

à l'exclusion des stocks augmente de 0.6 % contre 0.7 % au troisième trimestre. Cet indice rend mieux compte de la stabilisation de l'inflation observable dans les autres mesures globales de prix au quatrième trimestre.

En parallèle avec l'emploi, la croissance du revenu du travail ralentit, en hausse de seulement 0.9 % après une augmentation de 2.3 % au trimestre précédent. Le ralentissement est imputable à des baisses dans les secteurs des forêts, des mines et de la construction où l'emploi a diminué. Le taux d'épargne personnelle baisse à 12.3 % au quatrième trimestre, un taux qui traduit mieux les flux de l'épargne pour l'année. Le taux d'épargne était inhabituellement élevé au troisième trimestre en raison du retard dans les remboursements d'impôt aux particuliers.

La croissance des bénéfices des sociétés ralentit également au quatrième trimestre, avec une hausse de 4.2 % seulement, contre une progression moyenne de 14.5 % au cours des quatre trimestres précédents. Bien que l'augmentation des trimestres précédents soit l'effet conjugué de la hausse des ventes et de la diminution des coûts d'intérêts, celle du quatrième trimestre est surtout imputable à des ventes accrues. Les hausses plus faibles de profits touchent surtout les secteurs du commerce de gros et de détail, alors que l'industrie automobile enregistre la plus forte progression.

Federal Government Petroleum-related Revenues and Expenditures

The petroleum-related programs of the federal government continued to have a significant effect on the movement of some of the federal income and expenditure items. The following table provides quarterly estimates, seasonally adjusted at annual rates, for 1983 of the major petroleum-related programs.

L'administration fédérale et le pétrole-Recettes et dépenses

Les programmes reliés au pétrole de l'administration fédérale ont continué d'influencer fortement les taux de variation de certaines rubriques de ses revenus et dépenses. Le tableau suivant montre les estimations trimestrielles de 1983, après désaisonnalisation au taux annuel, pour les principaux programmes reliés au pétrole.

(1) Actual change in millions of dollars. — Variation absolue en millions de dollars. (2) Implicit price indexes are currently weighted (Paasche) and therefore reflect changes in expenditure patterns as well as price changes of individual items. — Les indices implicites de prix sont des indices à pondération courante (Paasche); ils traduisent par conséquent les changements dans la structure des dépenses ainsi que les variations de prix individuelles des éléments.

(1) Excludes profits of government business enterprises. (2) Includes the withholding tax applicable to this item. (3) Includes profits (net of losses) of government business enterprises and other government investment income. (4) Includes value of physical change in farm inventories as shown in line 14, Table 5. An adjustment has been made to take account of the accrued earnings of farm operators arising out of the operations of the Canadian Wheat Board. (5) Includes net income of independent professional practitioners and imputed net rent on owner-occupied dwellings. (6) See footnote 4, Table 2.

(1) Sans les bénéfices des entreprises commerciales publiques. (2) Y compris les retenues fiscales. (3) Y compris les bénéfices (pertes déduites) des entreprises commerciales publiques ainsi que les autres revenus de placements des administrations. (4) Y compris la valeur de la variation des stocks agricoles telle qu'elle figure à la rubrique 14 du tableau 5. Un ajustement a été effectué pour tenir compte des gains comptables découlant des activités de la Commission canadienne du blé. (5) Y compris le revenu net des personnes exerçant une profession pour propre compte et les loyers nets imputés des logements occupés par leur propriétaire. (6) Voir note 4, tableau 2.

TABLE 2. Gross National Expenditure, by Quarters

(1) Includes defence expenditures. For amounts see line 45, Table 6. (2) Includes outlays on new durable assets such as building and highway construction by government, other than government business enterprises. Excludes defence construction and equipment which are defined as current expenditure. (3) Comprises capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. (4) The book value of inventories is deflated to remove the effect of price changes and the derived 'physical' change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment (see line 8, Table 1).

(1) Y compris les dépenses militaires présentées à la ligne 45, tableau 6. (2) Y compris les dépenses en biens durables neufs, comme les immeubles et les routes, des administrations publiques, sauf celles de leurs entreprises commerciales publiques. Ne comprend par les installations et le matériel militaires, considérés comme dépenses courantes. (3) Comprend les dépenses d'investissement des entreprises privées, des entreprises commerciales publiques et des institutions non commerciales privées, ainsi que les dépenses de construction résidentielle neuve des particuliers. Par définition, les dépenses d'investissement comprennent tous les frais de mutation relatifs à la vente et à l'achat d'immobilisations existantes. (4) La valeur comptable des stocks est déflatée de façon à supprimer l'effet des variations de prix. La variation 'matérielle' ainsi obtenue est ensuite évaluée aux prix moyens de la période courante, ce qui permet d'obtenir la valeur de la variation matérielle. La différence entre cette valeur de la variation matérielle et la variation de la valeur comptable est appelée ajustement de la valeur des stocks (voir ligne 8, tableau 1).

| 74,069 | 77,007 | 86,701 | 78,507 | 316,284 | 78,441 | 81,384 | 91,024 | 83,880 | 334,729 | Revenu personnel | 11 |

(1) Cette rubrique diffère de la ligne 6, tableau 1. La différence consiste en l'exclusion de l'ajustement qui a été apporté pour tenir compte du revenu comptable net au titre des activités de la Commission canadienne du blé ('ajustement relatif aux transactions de céréales').

(2) Y compris tous les intérêts sur la dette publique payés par les administrations publiques aux particuliers.

(3) Dons de charité, autres contributions et amortissement des mauvaises créances.

(1) The implicit price deflators of the seasonally unadjusted components of Gross National Expenditure, derived by dividing the value figures in Table 2 by the constant dollar figures in Table 10, are not suitable as indicators of quarter-to-quarter price change. This is because they are currently weighted and therefore are affected by compositional shifts which occur within the unadjusted components of Gross National Expenditure on a quarter-to-quarter basis. Quarter-to-quarter movement in the implicit price deflators based on seasonally adjusted data are less subject to the problem of shifting weights and may be used as a measure of price change.

(1) Les indices implicites de déflation de prix des composantes non désaisonnalisées de la dépense nationale brute, obtenus en divisant les valeurs en dollars courants du tableau 2 par les valeurs en dollars constants du tableau 10, ne sont pas de bons indicateurs de la variation des prix d'un trimestre à l'autre car ils sont à pondération courante et, par conséquent, sensibles aux changements de composition d'un trimestre à l'autre des diverses composantes non désaisonnalisées de la dépense nationale brute. Toutefois, les indices implicites de déflation de prix basés sur les séries désaisonnalisées sont moins sujets à ces changements de pondération et peuvent donc servir à mesurer les variations de prix.

(1) See footnote 1, Table 1.

(2) See footnote 2, Table 1.

(3) See footnote 3, Table 1.

(4) Includes an arbitrary smoothing of crop production, and standard seasonal adjustments for withdrawals of grain from farm stocks and for the change in farm-held livestock and other inventories. Because of the arbitrary element, too precise an interpretation should not be given the seasonally adjusted figures of accrued net income of farm operators.

(5) See footnote 5, Table 1.

(6) See footnote 4, Table 2.

(1) Voir note 1, tableau 1.

(2) Voir note 2, tableau 1.

(3) Voir note 3, tableau 1.

(4) Comprend un lissage arbitraire de la production culturale et des ajustements saisonniers normalisés visant les prélèvements de céréales sur les stocks agricoles et la variation des cheptels et des autres stocks détenus dans les fermes. En raison de cet élément arbitraire, on ne devrait pas donner une interprétation trop rigoureuse des chiffres désaisonnalisés du revenu comptable net des exploitants agricoles.

(5) Voir note 5, tableau 1.

(6) Voir note 4, tableau 2.

(1) Includes defence expenditures. For amounts see line 45, Table 16. (2) See footnote 2, Table 2. (3) See footnote 3, Table 2. (4) See footnote 4, Table 2. (5) In the seasonally adjusted series, the value of grain crop production in each quarter is taken as one-fourth of the estimated value of crop production for the year as a whole (see footnote 4, Table 11). All other items in the farm inventories series are seasonally adjusted by standard techniques.

(1) Y compris les dépenses militaires. Pour les montants, voir rubrique 45, tableau 16. (2) Voir note 2, tableau 2. (3) Voir note 3, tableau 2. (4) Voir note 4, tableau 2. (5) Dans les séries désaisonnalisées, on suppose que la valeur de la production céréalière de chaque trimestre est égale au quart de la production totale de l'année (voir note 4 au bas du tableau 11). Tous les autres éléments de la série sur les stocks agricoles sont désaisonnalisés à l'aide de méthodes normalisées.

(1) See footnote 1, Table 6.

(2) The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four since real property taxes accrue uniformly throughout the taxation year. Because in recent years, changes in real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted taxes series.

(3) Includes capital consumption allowances as shown in line 92.

(1) Voir note 1, tableau 6.

(2) Les estimations trimestrielles des impôts fonciers, à la fois non désaisonnalisées et désaisonnalisées, sont obtenues en divisant les chiffres annuels par quatre, étant donné que ces impôts s'accumulent de façon uniforme tout au long de l'année d'imposition. Toutefois, comme les révisions ont en général relevé le niveau des impôts immobiliers au cours des dernières années, il en est résulté une saisonnalité fictive entre le quatrième et le premier trimestre dans les séries désaisonnalisées.

(3) Comprennent les provisions pour consommation de capital figurant à la ligne 92.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

System of National Accounts,
Gross National Product Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9151) or to the Statistics Canada reference centre in:

| | | | |
|------------|------------|----------------|------------|
| St. John's | (772-4073) | Sturgeon Falls | (753-4888) |
| Halifax | (426-5331) | Winnipeg | (949-4020) |
| Montréal | (283-5725) | Regina | (359-5405) |
| Ottawa | (990-8116) | Edmonton | (420-3027) |
| Toronto | (966-6586) | Vancouver | (666-3691) |

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, K1A 0T6.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Système de comptabilité nationale,
Division du produit national brut,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9151) ou au centre de consultation de Statistique Canada à:

| | | | |
|------------|------------|----------------|------------|
| St. John's | (772-4073) | Sturgeon Falls | (753-4888) |
| Halifax | (426-5331) | Winnipeg | (949-4020) |
| Montréal | (283-5725) | Regina | (359-5405) |
| Ottawa | (990-8116) | Edmonton | (420-3027) |
| Toronto | (966-6586) | Vancouver | (666-3691) |

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services in current and constant prices, is portrayed in the Input-Output tables of the System (Catalogue with prefix 15). The Catalogue Nos. carrying the prefix 16 provide constant dollar measures of the contribution of each industry to total Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue with prefix 14).

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by Financial Flow Accounts (Catalogue with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Levels of outstanding financial assets and liabilities are published annually as a major contribution towards a complete national balance sheet.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, *A System of National Accounts* (Studies in Methods, Series F, No. 2, Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le n° de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (n° de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services aux prix du marché et en dollars constants figure dans les tableaux d'entrées-sorties du système (n° de catalogue commençant par 15). Les publications dont les numéros de catalogue commencent par 61 comprennent les mesures en dollars constants de l'apport de chaque branche d'activité au total du produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le n° de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut par activité économique. Les comptes de flux financiers (publications dont les n°s de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les niveaux des actifs et passifs financiers en circulation sont disponibles annuellement; ils constituent un élément important d'un bilan national exhaustif.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, n° 2, rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

NOTE

In order to obtain a complete quarterly historical record of the National Income and Expenditure Accounts, the following publications should be consulted:

National Income and Expenditure Accounts, Volume 2, The Quarterly Estimates, 1947 - 1974, Catalogue 13-533, for the years 1947 - 1970.

National Income and Expenditure Accounts, First Quarter 1978, Catalogue 13-001 for the years 1971 - 1973.

National Income and Expenditure Accounts, First Quarter 1981, Catalogue 13-001 for the years 1974 and 1975.

National Income and Expenditure Accounts, First Quarter 1983, Catalogue 13-001 for the year 1976.

NOTA

Pour disposer d'un dossier trimestriel historique complet des comptes nationaux des revenus et des dépenses, le lecteur est prié de consulter les publications suivantes:

Comptes nationaux des revenus et des dépenses, volume 2, Les estimations trimestrielles, 1947 - 1974, n° 13-533 au catalogue, pour la période 1947 - 1970.

Comptes nationaux des revenus et des dépenses, premier trimestre 1978, n° 13-001 au catalogue, pour la période 1971 - 1973.

In the first quarter of 1984, Gross National Product increased 2.1% to a level of \$411.6 billion seasonally adjusted at annual rates. In real terms GNP increased 0.8%.

Après désaisonnalisation au taux annuel, le produit national brut augmente de 2.1% au premier trimestre de 1984 et s'établit à \$411.6 milliards. En termes réels, le PNB progresse de 0.8%.

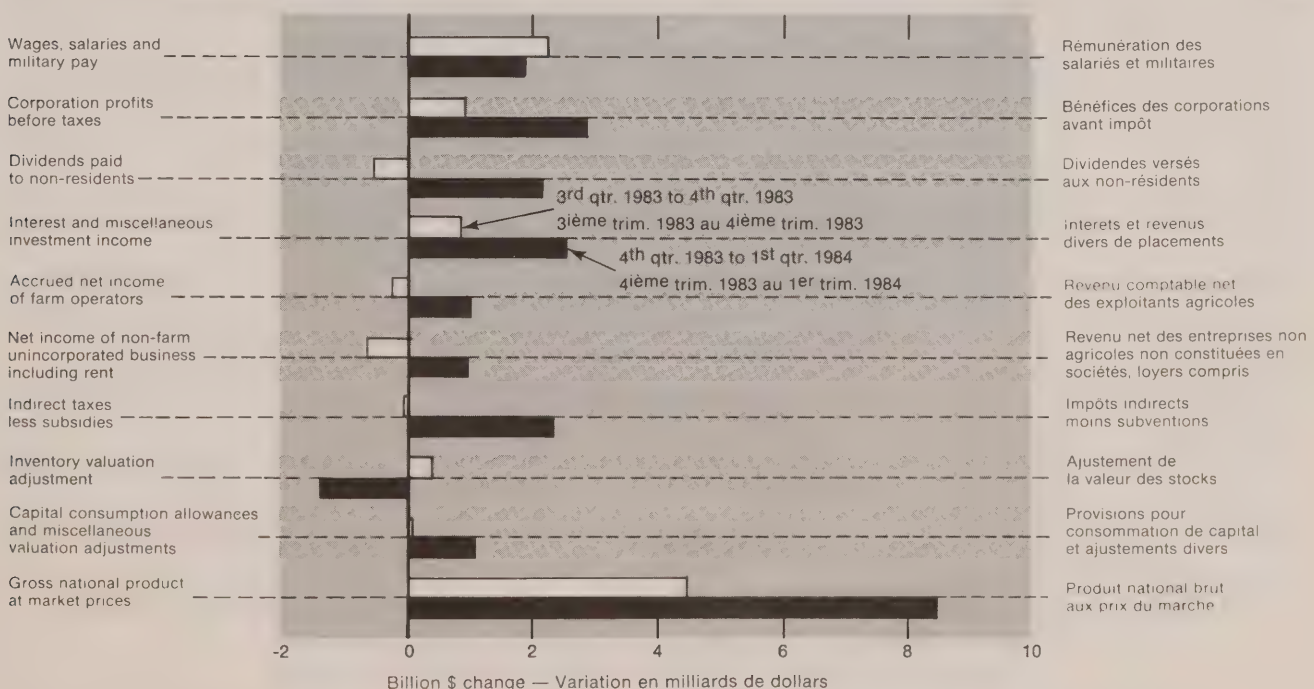

Wages, salaries and supplementary labour income and military pay and allowances increased 0.8%, compared to 1.0% in the fourth quarter of 1983. Corporation profits and interest and miscellaneous investment income both rose by about 8%.

La rémunération des salariés et militaires s'est accrue de 0.8%, en comparaison de 1.0% au quatrième trimestre de 1983. Les bénéfices des sociétés avant impôts et les intérêts et revenus divers de placements ont tous les deux augmenté d'environ 8%.

Quarterly changes in GNP and components

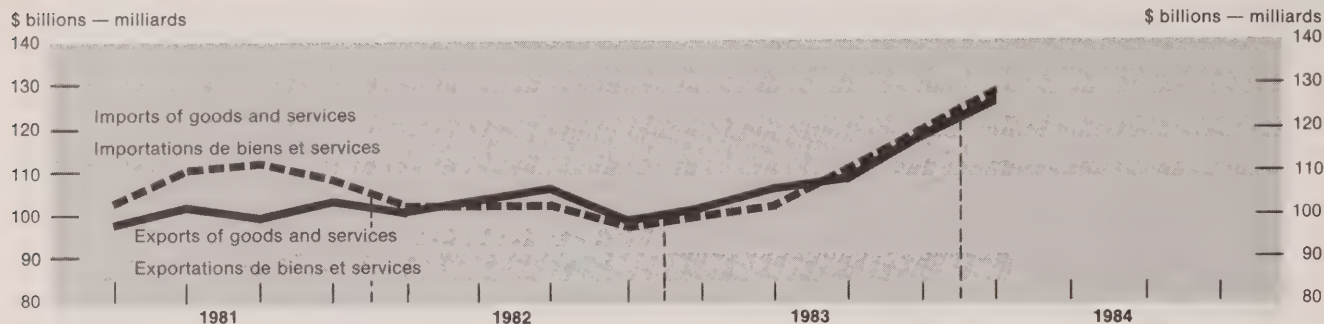

Mouvements trimestriels du PNB et de ses composantes

All quarterly data adjusted for seasonal variation and at annual rates. — Toutes les séries trimestrielles sont corrigées des variations saisonnières, aux taux annuels

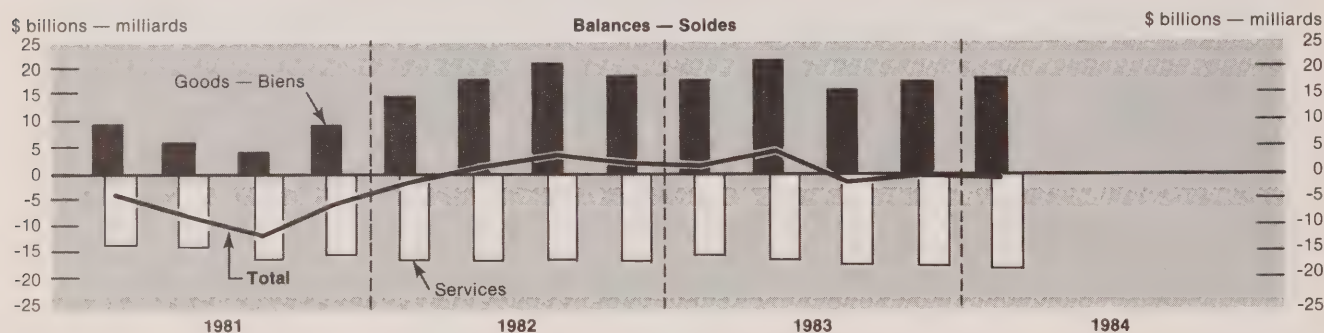

Exports and imports of goods and services rose 7.5% and 7.6% respectively, with the result that the deficit on goods and services rose to \$0.8 billion from \$0.6 billion, seasonally adjusted at annual rates.

Les exportations et importations de biens et services ont respectivement augmenté de 7.5% et 7.6%; le déficit du commerce en biens et services est donc passé de \$0.6 milliard à \$0.8 milliard, après désaisonnalisation au taux annuel.

Exports and imports of goods and services rose 7.5% and 7.6% respectively, with the result that the deficit on goods and services rose to \$0.8 billion from \$0.6 billion, seasonally adjusted at annual rates.

Les exportations et importations de biens et services ont respectivement augmenté de 7.5% et 7.6%; le déficit du commerce en biens et services est donc passé de \$0.6 milliard à \$0.8 milliard, après désaisonnalisation au taux annuel.

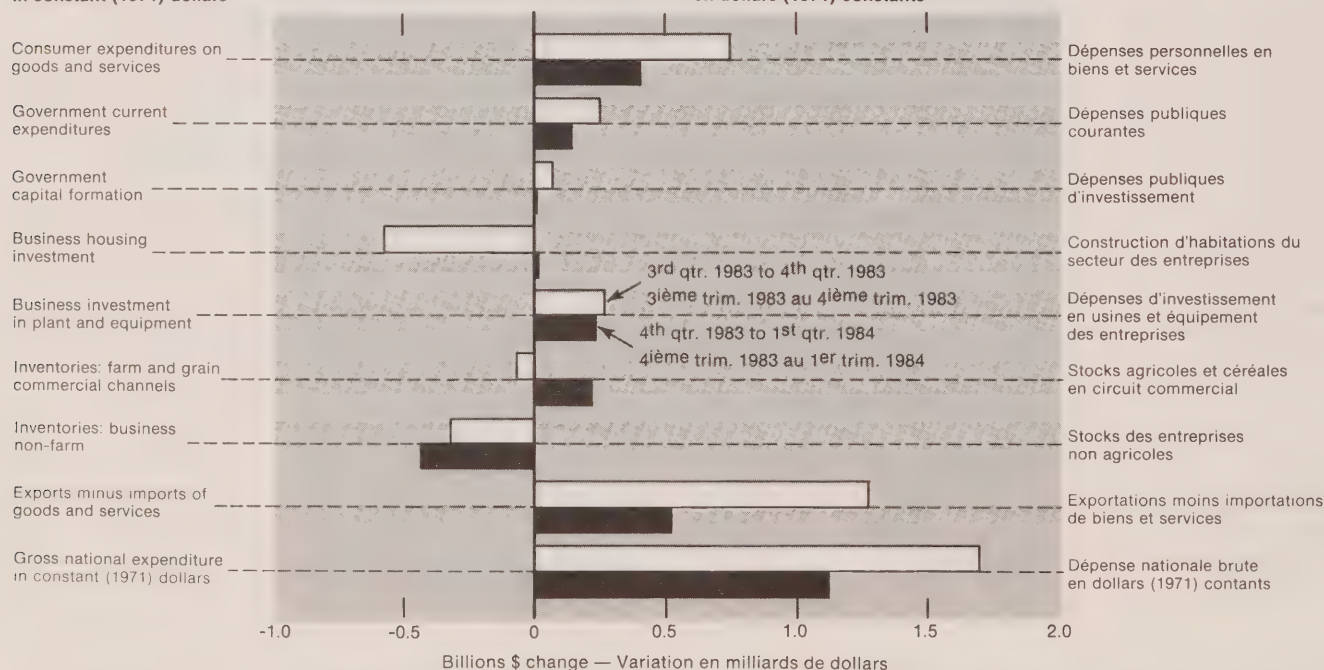

The volume of personal expenditure rose 0.5% in the first quarter, down from the 0.9% increase in the previous quarter. Real residential construction was virtually unchanged following the sharp decline of the fourth quarter while investment in plant and equipment increased 1.3% compared to 1.5% in the fourth quarter.

Le volume des dépenses personnelles s'accroît de 0.5% au premier trimestre, soit un ralentissement par rapport à l'augmentation de 0.9% observée au trimestre précédent. La construction résidentielle demeure pratiquement inchangée en termes réels, après la forte réduction du quatrième trimestre; quant aux dépenses réelles des entreprises en usines et matériel, elles augmentent de 1.3% au premier, contre 1.5% au quatrième.

Mouvements annuels du PNB et de ses composantes

Annual Changes in GNE and Components

Mouvements annuels de la DNB et de ses composantes

GROSS NATIONAL PRODUCT

First Quarter 1984

Gross National Product rose 2.1% in the first quarter of 1984 to a level of \$411.6 billion, seasonally adjusted at annual rates. After allowing for a 1.3% increase in overall prices, real GNP increased 0.8%, down slightly from the 1.2% increase of the fourth quarter of 1983. Real GNP is now about 1.0% above the level recorded at the peak of activity in the second quarter of 1981.

The major source of growth in the quarter was merchandise exports, up 8.9% in volume terms. This growth reflected to a large degree the continuing expansion of the U.S. economy and marks the second consecutive quarter that a strong U.S. economy has had a major influence on Canadian growth through export demand. The impact of the auto industry on the economy was pervasive as motor vehicle production and sales played dominant roles in exports, imports, consumer spending and inventory accumulation and were of major importance in profit growth of non-financial corporations. Final domestic demand advanced 0.6% with increases in all of the major components.

The growth in real merchandise exports, down slightly from the previous quarter, was concentrated in motor vehicles and parts which accounted for approximately two-thirds of the increase. Exports of crude materials such as petroleum and ores also advanced in the quarter. The growth in merchandise imports originated mainly in automotive products and machinery and equipment. The relatively greater growth of merchandise exports increased the nominal merchandise trade balance \$0.6 billion to \$17.7 billion at annual rates. Since the non-merchandise deficit increased by a slightly greater amount, the deficit on goods and services rose to \$0.8 billion from \$0.6 billion, seasonally adjusted at annual rates.

Real expenditures on business investment in plant and equipment increased 1.3% in the quarter. The machinery and equipment component advanced 1.9%, a continuation of the upturn which had commenced in mid-1983. Sources of supply for these capital goods included domestic production, imports and inventory drawdowns. The increase in non residential construction was more moderate, and included growth in both structures and engineering projects. These developments are con-

PRODUIT NATIONAL BRUT

Premier trimestre 1984

Après désaisonnalisation au taux annuel, le produit national brut augmente de 2.1% au premier trimestre de 1984 et s'établit à \$411.6 milliards. Compte tenu d'une augmentation de 1.3% du niveau d'ensemble des prix, le PNB réel progresse de 0.8%, soit une légère diminution comparative au taux de 1.2% observé au quatrième trimestre de 1983. Le PNB réel dépasse maintenant d'environ 1.0% le sommet atteint au deuxième trimestre de 1981.

Ce sont les exportations de marchandises, dont le volume s'est accru de 8.9%, qui constituent la principale source de croissance au cours du trimestre. Cette montée traduit dans une large mesure la poursuite de la reprise aux États-Unis et marque le deuxième trimestre consécutif au cours duquel la vigueur de l'économie américaine a exercé une influence importante sur la croissance économique au Canada par l'intermédiaire de la demande à l'exportation. L'impact exercé par l'industrie automobile sur l'économie est très marqué, la production et les ventes de véhicules automobiles dominant les exportations, les importations, les dépenses des consommateurs et l'accumulation des stocks, et contribuant largement au raffermissement des profits des entreprises non financières. La demande intérieure finale s'accroît de 0.6% et toutes ses principales composantes progressent.

L'augmentation des exportations réelles de marchandises, qui ralentit légèrement par rapport au trimestre précédent, touche surtout les produits automobiles, qui comptent pour environ les deux tiers de la hausse. Les exportations de matières brutes, comme le pétrole et les minerais, progressent également au cours du trimestre. La montée des importations de marchandises est surtout attribuable aux produits automobiles, aux machines et au matériel. La croissance relativement plus forte des exportations de marchandises fait monter le solde nominal du commerce des marchandises à \$17.7 milliards au taux annuel, soit une augmentation de \$0.6 milliard. Comme le déficit sur invisibles augmente un peu plus, le déficit au titre des biens et services, passe de \$0.6 milliard à \$0.8 milliard après désaisonnalisation au taux annuel.

Les dépenses réelles des entreprises en usines et matériel augmentent de 1.3% au cours du trimestre. La composante "machines et matériel" progresse de 1.9%, poursuivant ainsi le revirement amorcé au milieu de 1983. Les sources d'approvisionnement de ces biens de capital comprennent la production intérieure, les importations et les stocks. L'augmentation de la construction non résidentielle est plus modérée, et englobe les structures et les travaux de génie. Ces mouvements correspondent aux données de l'enquête sur les intentions d'investissements privés et publics, dont

sistent with the Private and Public Investment Intentions Survey which indicated that the large decline in business fixed investment in 1983 would not continue in 1984.

Real residential construction was virtually unchanged following the sharp decline of the fourth quarter of 1983. The volume of spending on new dwelling construction fell further, as housing starts have remained fairly weak following the large reduction in mid-1983. This lower spending on construction was offset by the growth in real estate commissions generated in an active market for resale homes during the quarter. Expenditure on alterations and improvements also increased modestly.

Business inventory accumulation moderated to about two-thirds the rate of the fourth quarter of 1983. In contrast to the widespread nature of the fourth quarter accumulation, automotive products held by retailers predominated in the first quarter. There was also some rebuilding of petroleum inventories, while stocks of wood and paper were reduced due to the interruption of production caused by labour disputes in British Columbia. Drawdowns of durable goods related to machinery and equipment investment also occurred, particularly at the wholesale level. The stock rebuilding of the past three quarters has only kept pace with the growth in demand over that period and stock-to-sales ratios have not moved significantly away from their trough levels. The most recent Statistics Canada business conditions survey underlined the continuing cautious attitude of the manufacturing sector to inventory build-up when it reported that more than 90% of firms surveyed thought finished goods stocks were either too high or about right.

The volume of personal expenditure rose 0.5% in the first quarter, down from the 0.9% increase in the previous quarter. Strong growth in demand for durable goods was almost entirely autos and auto related, as it was in the fourth quarter of 1983. Most other categories of durable expenditure fell in the first quarter. Spending on semi-durables (especially clothing) and non-durables declined while services spending recorded a moderate increase.

Labour income growth slowed to a 0.8% increase in the first quarter, down from 1.0% in the fourth, reflecting a slower pace of employment growth. A rise in personal expenditure in excess of income growth reduced the personal saving rate to 11.7% from the previous quarter's 12.6%.

il ressort que l'année 1984 marquerait la fin de l'importante baisse des investissements fixes des entreprises observée en 1983.

La construction résidentielle demeure pratiquement inchangée en termes réels, après la forte réduction du quatrième trimestre de 1983. Le volume des dépenses de construction de logements neufs a continué à fléchir, étant donné que les mises en chantier sont demeurées relativement faibles depuis la forte réduction du milieu de 1983. Le marché de la revente des maisons ayant été actif au cours du trimestre, la croissance des commissions immobilières a compensé la baisse des dépenses de construction. Les dépenses au titre des transformations et des améliorations progressent aussi légèrement.

Le taux d'accumulation des stocks des entreprises ralentit et se situe environ aux deux tiers du taux observé au quatrième trimestre de 1983. Alors que l'accumulation observée au quatrième trimestre était généralisée, ce sont les produits automobiles détenus par les détaillants qui dominent au premier trimestre. Il se produit également une certaine accumulation des stocks de pétrole, alors que les stocks de bois et de papier diminuent en raison de l'interruption de la production causée par des conflits de travail en Colombie-Britannique. On observe également une réduction des stocks de machines et matériel, surtout au niveau du commerce de gros. La reprise des stocks au cours des trois derniers trimestres n'a fait que suivre le rythme de croissance de la demande au cours de la période, et les ratios des stocks aux ventes ne sont pas encore remontés de façon notable. Selon la dernière enquête de Statistique Canada sur les perspectives du monde des affaires, les fabricants demeurent prudents quant à l'accumulation des stocks; plus de 90% d'entre eux estiment que les stocks de produits finis sont soit trop élevés, soit satisfaisants.

Le volume des dépenses personnelles s'accroît de 0.5% au premier trimestre, soit un ralentissement par rapport à l'augmentation de 0.9% observée au trimestre précédent. La forte croissance de la demande de biens durables est presque totalement imputable aux automobiles et aux produits connexes, tout comme au quatrième trimestre de 1983. La plupart des autres catégories de dépenses en biens durables chutent au premier trimestre. Les dépenses en biens semi-durables (surtout en vêtements) et en biens non durables diminuent, alors que les dépenses au titre des services affichent une progression modérée.

La progression du revenu du travail ralentit à 0.8% au premier trimestre, comparativement à 1.0% au quatrième, traduisant un fléchissement de la croissance de l'emploi. L'augmentation des dépenses personnelles, forte, alors qu'on observe dans le cas des sociétés non financières un

Corporate profits rose 8.0% compared to 2.6% in the fourth quarter. Profit growth of financial corporations was strong while a moderate rate of increase prevailed for non-financial corporations for the second consecutive quarter. Within these corporations, the main impetus to profit growth was the automobile industry. While profits of industrial corporations continued to grow, pre-tax profit margins remained virtually unchanged.

Revisions

The most significant revisions to previously published annual estimates occurred in labour income, corporation profits, income of non-farm unincorporated business including rent, gross fixed capital formation, inventories, and provincial government revenues and expenditures.

For labour income, revisions were the result of the incorporation of the Department of National Revenue tabulation of wages and salaries from "T-4" forms submitted by employers for 1982 and more recent information on supplementary labour income. Changes in corporate profits and depreciation resulted from the 1981 taxation data benchmarks and revised 1982 and 1983 projections. Higher estimates of capital expenditure reflected incorporation of the results of the survey of Public and Private Investment. Other changes were due to revised source data.

The net effect of these revisions has been to change overall annual growth rates of GNE as follows:

| | 1980 | 1981 | 1982 | 1983 |
|-----------|------|------|------|------|
| Published | 1.0 | 3.4 | -4.4 | 3.0 |
| Revised | 1.1 | 3.3 | -4.4 | 3.3 |

In addition to the annual revisions, monthly export and import data are now seasonally adjusted by commodity rather than at the total level. This change in method has resulted in revisions to the relevant quarterly expenditure and price series.¹

¹ A more detailed description of this change in methodology can be found in the Statistics Canada Daily of June 7, 1984.

taux de croissance modéré pour le deuxième trimestre consécutif. Parmi ces dernières, l'industrie automobile est celle qui a contribué le plus à l'expansion des bénéfices. Alors que les bénéfices des sociétés industrielles continuent leur croissance, les marges bénéficiaires avant impôts demeurent pratiquement inchangées au cours du trimestre.

Révisions

Les plus importantes révisions apportées aux estimations annuelles publiées antérieurement touchent le revenu du travail, les bénéfices des sociétés, les revenus des entreprises individuelles non agricoles, loyers compris, la formation brute de capital fixe, les stocks ainsi que les recettes et dépenses des administrations provinciales.

Dans le cas du revenu du travail, les révisions résultent de l'intégration des salaires et traitements compilés par Revenu Canada, à partir des formulaires "T-4" produits par les employeurs pour 1982 et de renseignements plus récents concernant le revenu supplémentaire du travail. Les révisions aux bénéfices et à l'amortissement des sociétés proviennent de l'introduction des données fiscales de référence de 1981 et de la révision des projections pour 1982 et 1983. L'intégration des résultats de l'enquête sur les investissements privés et publics a entraîné une hausse des estimations des dépenses d'investissement. D'autres changements ont été causés par une révision des données de base.

Ces révisions ont modifié les taux de croissance annuels globaux de la DNB comme suit:

| | 1980 | 1981 | 1982 | 1983 |
|------------------|------|------|------|------|
| Données publiées | 1.0 | 3.4 | -4.4 | 3.0 |
| Données révisées | 1.1 | 3.3 | -4.4 | 3.3 |

En plus des révisions annuelles, les données mensuelles sur les importations et les exportations sont maintenant désaisonnalisées par produit plutôt qu'au niveau total. Ce changement de méthode a engendré des révisions aux séries trimestrielles correspondantes des dépenses et des prix.¹

¹ On trouvera une description plus détaillée de ce changement de méthode dans le Quotidien de Statistique Canada du 7 juin 1984.

Federal Government Petroleum-related Revenues and Expenditures

The petroleum-related programs of the federal government continued to have a significant effect on the movement of some of the federal income and expenditure items. The following table provides quarterly estimates, seasonally adjusted at annual rates, for 1983 and 1984 of the major petroleum-related programs.

L'administration fédérale et le pétrole-Recettes et dépenses

Les programmes reliés au pétrole de l'administration fédérale ont continué d'influencer fortement les taux de variation de certaines rubriques de ses revenus et dépenses. Le tableau suivant montre les estimations trimestrielles de 1983 et 1984, après désaisonnalisation au taux annuel, pour les principaux programmes reliés au pétrole.

Petroleum-related Revenues and Expenditures (Seasonally Adjusted at Annual Rates)

Recettes et dépenses reliées au pétrole (Après désaisonnalisation au taux annuel)

(1) Actual change in millions of dollars. — Variation absolue en millions de dollars. (2) Implicit price indexes are currently weighted (Paasche) and therefore reflect changes in expenditure patterns as well as price changes of individual items. — Les indices implicites de prix sont des indices à pondération courante (Paasche); ils traduisent par conséquent les changements dans la structure des dépenses ainsi que les variations de prix individuelles des éléments.

TEXT TABLE II. Annual Percentage Rates of Change

(1) Excludes profits of government business enterprises. (2) Includes the withholding tax applicable to this item. (3) Includes profits (net of losses) of government business enterprises and other government investment income. (4) Includes value of physical change in farm inventories as shown in line 14, Table 5. An adjustment has been made to take account of the accrued earnings of farm operators arising out of the operations of the Canadian Wheat Board. (5) Includes net income of independent professional practitioners and imputed net rent on owner-occupied dwellings. (6) See footnote 4, Table 2.

| 89,745 | 95,593 | 99,887 | 101,543 | 386,768 | 98,780 | | | | | <i>Produit national brut aux prix du marché sans le revenu comptable net des exploitants agricoles.</i> | 14 |

(1) Sans les bénéfices des entreprises commerciales publiques. (2) Y compris les retenues fiscales. (3) Y compris les bénéfices (pertes déduites) des entreprises commerciales publiques ainsi que les autres revenus de placements des administrations. (4) Y compris la valeur de la variation des stocks agricoles telle qu'elle figure à la rubrique 14 du tableau 5. Un ajustement a été effectué pour tenir compte des gains comptables découlant des activités de la Commission canadienne du blé. (5) Y compris le revenu net des personnes exerçant une profession pour propre compte et les loyers nets imputés des logements occupés par leur propriétaire. (6) Voir note 4, tableau 2.

TABLE 2. Gross National Expenditure, by Quarters

(1) Includes defence expenditures. For amounts see line 45, Table 6. (2) Includes outlays on new durable assets such as building and highway construction by government, other than government business enterprises. Excludes defence construction and equipment which are defined as current expenditure. (3) Comprises capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. (4) The book value of inventories is deflated to remove the effect of price changes and the derived 'physical' change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment (see line 8, Table 1).

(1) Y compris les dépenses militaires présentées à la ligne 45, tableau 6. (2) Y compris les dépenses en biens durables neufs, comme les immeubles et les routes, des administrations publiques, sauf celles de leurs entreprises commerciales publiques. Ne comprend par les installations et le matériel militaires, considérés comme dépenses courantes. (3) Comprend les dépenses d'investissement des entreprises privées, des entreprises commerciales publiques et des institutions non commerciales privées, ainsi que les dépenses de construction résidentielle neuve des particuliers. Par définition, les dépenses d'investissement comprennent tous les frais de mutation relatifs à la vente et à l'achat d'immobilisations existantes. (4) La valeur comptable des stocks est déflatée de façon à supprimer l'effet des variations de prix. La variation 'matérielle' ainsi obtenue est ensuite évaluée aux prix moyens de la période courante, ce qui permet d'obtenir la valeur de la variation matérielle. La différence entre cette valeur de la variation matérielle et la variation de la valeur comptable est appelée ajustement de la valeur des stocks (voir ligne 8, tableau 1).

(1) The implicit price deflators of the seasonally unadjusted components of Gross National Expenditure, derived by dividing the value figures in Table 2 by the constant dollar figures in Table 10, are not suitable as indicators of quarter-to-quarter price change. This is because they are currently weighted and therefore are affected by compositional shifts which occur within the unadjusted components of Gross National Expenditure on a quarter-to-quarter basis. Quarter-to-quarter movement in the implicit price deflators based on seasonally adjusted data are less subject to the problem of shifting weights and may be used as a measure of price change.

(1) Les indices implicites de déflation de prix des composantes non désaisonnalisées de la dépense nationale brute, obtenus en divisant les valeurs en dollars courants du tableau 2 par les valeurs en dollars constants du tableau 10, ne sont pas de bons indicateurs de la variation des prix d'un trimestre à l'autre car ils sont à pondération courante et, par conséquent, sensibles aux changements de composition d'un trimestre à l'autre des diverses composantes non désaisonnalisées de la dépense nationale brute. Toutefois, les indices implicites de déflation de prix basés sur les séries désaisonnalisées sont moins sujets à ces changements de pondération et peuvent donc servir à mesurer les variations de prix.

(1) See footnote 1, Table 1.

(2) See footnote 2, Table 1.

(3) See footnote 3, Table 1.

(4) Includes an arbitrary smoothing of crop production, and standard seasonal adjustments for withdrawals of grain from farm stocks and for the change in farm-held livestock and other inventories. Because of the arbitrary element, too precise an interpretation should not be given the seasonally adjusted figures of accrued net income of farm operators.

(5) See footnote 5, Table 1.

(6) See footnote 4, Table 2.

(1) Voir note 1, tableau 1.

(2) Voir note 2, tableau 1.

(3) Voir note 3, tableau 1.

(4) Comprend un lissage arbitraire de la production culturelle et des ajustements saisonniers normalisés visant les prélèvements de céréales sur les stocks agricoles et la variation des cheptels et des autres stocks détenus dans les fermes. En raison de cet élément arbitraire, on ne devrait pas donner une interprétation trop rigoureuse des chiffres désaisonnalisés du revenu comptable net des exploitants agricoles.

(5) Voir note 5, tableau 1.

(6) Voir note 4, tableau 2.

(1) Includes defence expenditures. For amounts see line 45, Table 16. (2) See footnote 2, Table 2. (3) See footnote 3, Table 2. (4) See footnote 4, Table 2. (5) In the seasonally adjusted series, the value of grain crop production in each quarter is taken as one-fourth of the estimated value of crop production for the year as a whole (see footnote 4, Table 11). All other items in the farm inventories series are seasonally adjusted by standard techniques.

(1) Y compris les dépenses militaires. Pour les montants, voir rubrique 45, tableau 16. (2) Voir note 2, tableau 2. (3) Voir note 3, tableau 2. (4) Voir note 4, tableau 2. (5) Dans les séries désaisonnalisées, on suppose que la valeur de la production céréalière de chaque trimestre est égale au quart de la production totale de l'année (voir note 4 au bas du tableau 11). Tous les autres éléments de la série sur les stocks agricoles sont désaisonnalisés à l'aide de méthodes normalisées.

(1) See footnote 1, Table 6.

(2) The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four since real property taxes accrue uniformly throughout the taxation year. Because in recent years, changes in real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted taxes series.

(3) Includes capital consumption allowances as shown in line 92.

(1) Voir note 1, tableau 6.

(2) Les estimations trimestrielles des impôts fonciers, à la fois non désaisonnalisées et désaisonnalisées, sont obtenues en divisant les chiffres annuels par quatre, étant donné que ces impôts s'accumulent de façon uniforme tout au long de l'année d'imposition. Toutefois, comme les révisions ont en général relevé le niveau des impôts immobiliers au cours des dernières années, il en est résulté une saisonnalité fictive entre le quatrième et le premier trimestre dans les séries désaisonnalisées.

(3) Comprennent les provisions pour consommation de capital figurant à la ligne 92.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

System of National Accounts,
Gross National Product Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9151) or to the Statistics Canada reference centre in:

| | | | |

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, K1A 0T6.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Système de comptabilité nationale,
Division du produit national brut,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9151) ou au centre de consultation de Statistique Canada à:

| | | | |

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services in current and constant prices, is portrayed in the Input-Output tables of the System (Catalogue with prefix 15). The Catalogue Nos. carrying the prefix 16 provide constant dollar measures of the contribution of each industry to total Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue with prefix 14).

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by Financial Flow Accounts (Catalogue with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Levels of outstanding financial assets and liabilities are published annually as a major contribution towards a complete national balance sheet.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, *A System of National Accounts* (Studies in Methods, Series F, No. 2, Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le n° de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (n° de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services aux prix du marché et en dollars constants figure dans les tableaux d'entrées-sorties du système (n° de catalogue commençant par 15). Les publications dont les numéros de catalogue commencent par 61 comprennent les mesures en dollars constants de l'apport de chaque branche d'activité au total du produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le n° de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut par activité économique. Les comptes de flux financiers (publications dont les n°s de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les niveaux des actifs et passifs financiers en circulation sont disponibles annuellement; ils constituent un élément important d'un bilan national exhaustif.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, n° 2, rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

NOTE

In order to obtain a complete quarterly historical record of the National Income and Expenditure Accounts, the following publications should be consulted:

National Income and Expenditure Accounts, Volume 2, The Quarterly Estimates, 1947 - 1974, Catalogue 13-533, for the years 1947 - 1970.

National Income and Expenditure Accounts, First Quarter 1978, Catalogue 13-001 for the years 1971 - 1973.

National Income and Expenditure Accounts, First Quarter 1981, Catalogue 13-001 for the years 1974 and 1975.

National Income and Expenditure Accounts, First Quarter 1983, Catalogue 13-001 for the year 1976.

NOTA

Pour disposer d'un dossier trimestriel historique complet des comptes nationaux des revenus et des dépenses, le lecteur est prié de consulter les publications suivantes:

Comptes nationaux des revenus et des dépenses, volume 2, Les estimations trimestrielles, 1947 - 1974, n° 13-533 au catalogue, pour la période 1947 - 1970.

Comptes nationaux des revenus et des dépenses, premier trimestre 1978, n° 13-001 au catalogue, pour la période 1971 - 1973.

Comptes nationaux des revenus et des dépenses, premier trimestre 1981, n° 13-001 au catalogue, pour la période 1974 - 1975.

Comptes nationaux des revenus et des dépenses, premier trimestre 1983, n° 13-001 au catalogue, pour l'année 1976.

This publication was prepared under the direction of:

In the second quarter of 1984, Gross National Product increased 2.0% to a level of \$418.9 billion seasonally adjusted at annual rates. In real terms GNP rose 0.7%.

Après désaisonnalisation au taux annuel, le produit national brut augmente de 2.0% au deuxième trimestre de 1984 pour atteindre \$418.9 milliards. En termes réels, le PNB progresse de 0.7%.

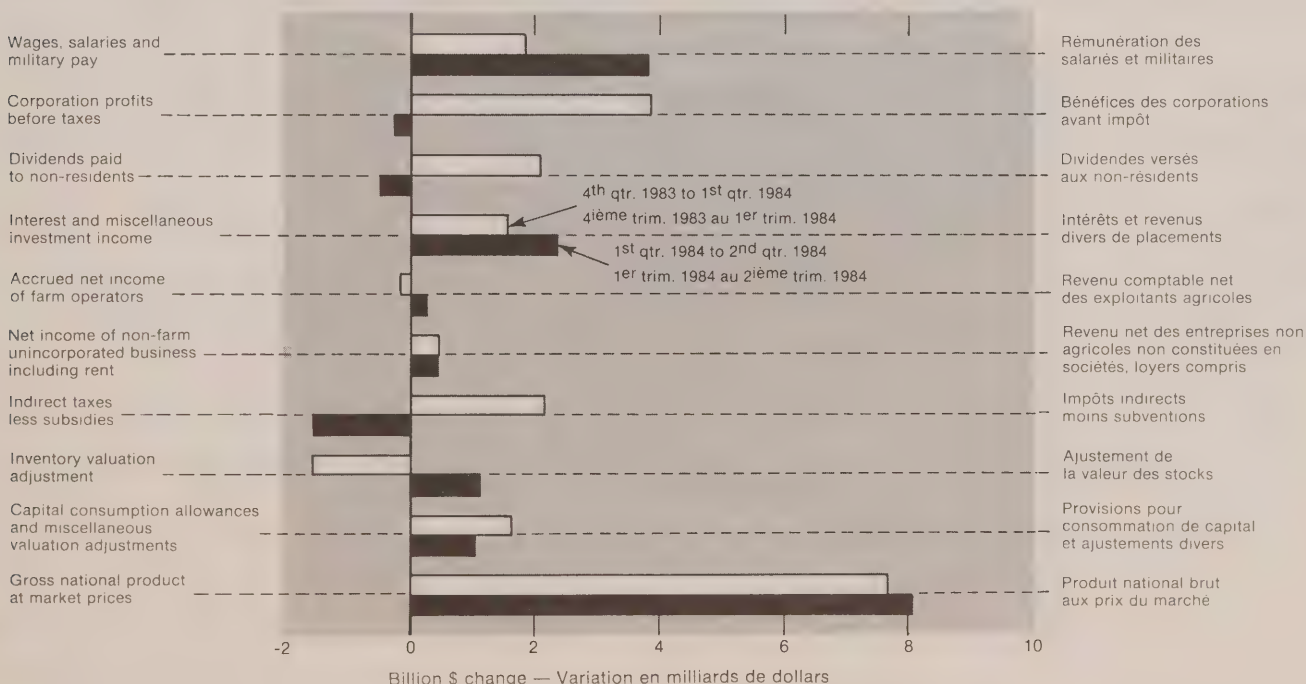

Wages, salaries and supplementary labour income and military pay and allowances rose 1.7%, compared to 0.8% in the first quarter of 1984. Interest and miscellaneous investment income rose sharply while corporation profits were little changed in the quarter, following a 10.8% growth in the first.

La rémunération des salariés et militaires s'est accrue de 1.7%, comparativement à 0.8% au premier trimestre de 1984. Les intérêts et revenus divers de placements ont enregistré une forte hausse pendant que les bénéfices des sociétés restaient pratiquement inchangés, après une progression de 10.8% au premier.

Quarterly changes in GNP and components

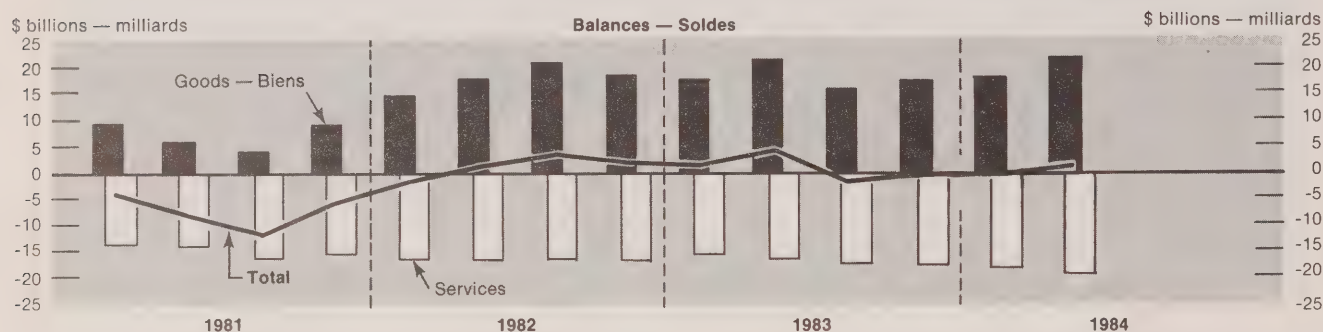

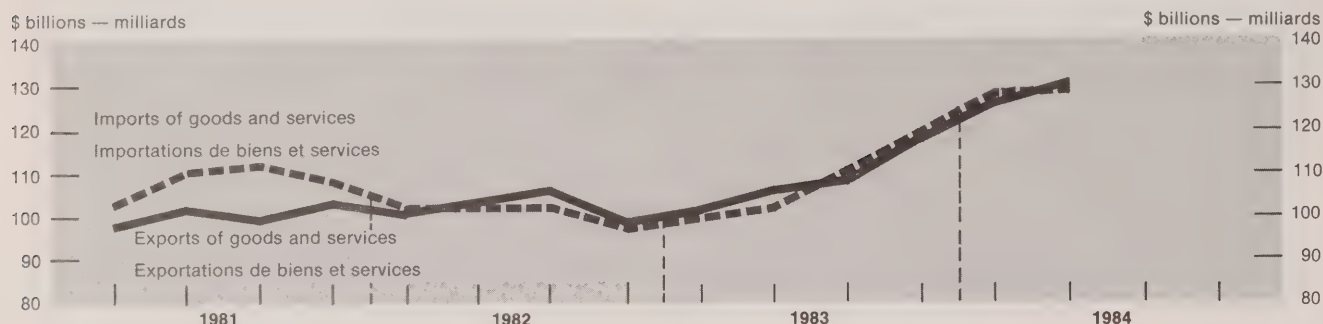

Mouvements trimestriels du PNB et de ses composantes

All quarterly data adjusted for seasonal variation and at annual rates. — Toutes les séries trimestrielles sont corrigées des variations saisonnières, aux taux annuels

Exports and imports of goods and services rose by 3.2% and 1.4% respectively with the result that the balance on goods and services swung from a deficit of \$0.5 billion in the first quarter to a surplus of \$1.9 billion in the second, seasonally adjusted at annual rates.

Les exportations et importations de biens et services ont respectivement augmenté de 3.2% et 1.4%; le solde des biens et services est donc passé d'un déficit de \$0.5 milliard au premier trimestre à un excédent de \$1.9 milliard au deuxième, après désaisonnalisation au taux annuel.

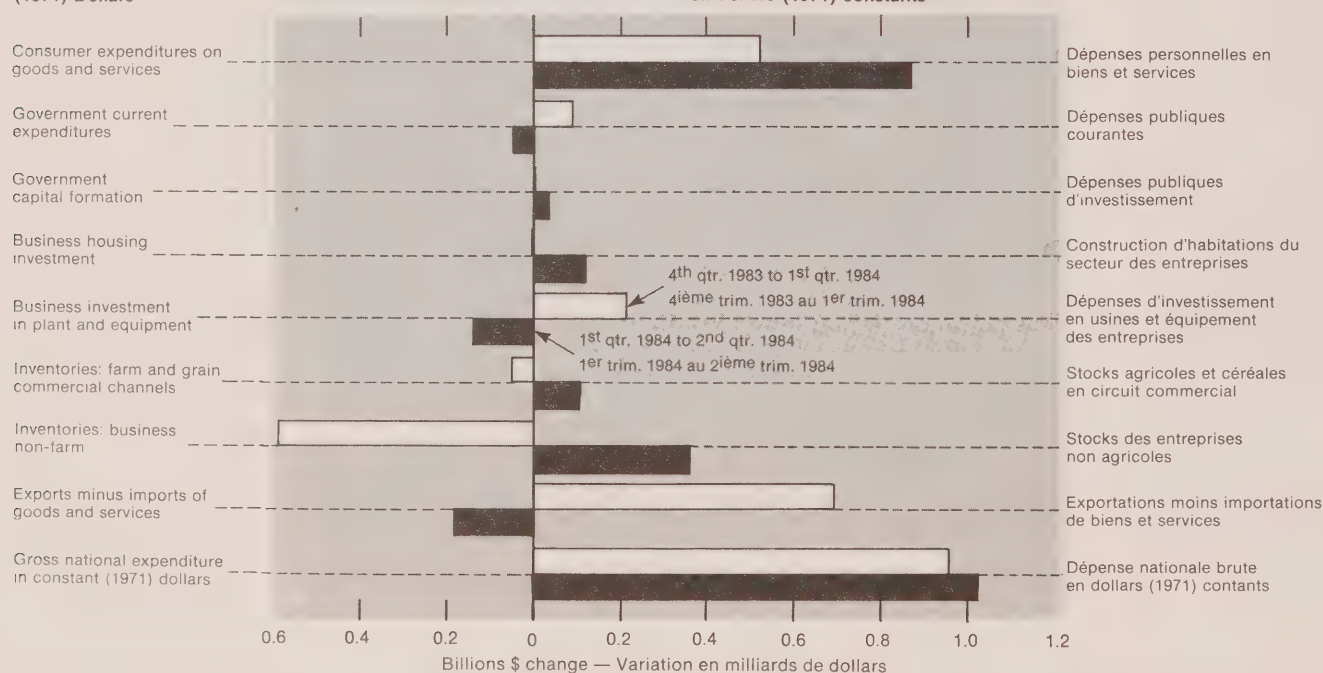

Growth in economic activity was moderate, but broadly based. Personal expenditure recorded modest growth and there was an increase in both residential and non-residential building activity. Investment in machinery and equipment fell, while inventory investment increased.

La croissance de l'activité économique a été modérée mais générale. Les dépenses personnelles ont enregistré une augmentation modeste et l'activité dans les secteurs de la construction résidentielle et non résidentielle a progressé. Les investissements en machines et matériel ont baissé tandis que les mises en stocks s'accroissaient.

Introduction

GROSS NATIONAL PRODUCT

Second Quarter 1984

Gross National Product rose 2.0% in the second quarter of 1984 to a level of \$418.9 billion, seasonally adjusted at annual rates. After allowing for a 1.2% increase in overall prices, real GNP increased 0.7%, the same rate of increase as in the first quarter. Real GNP, which had recovered to its pre recession level of activity during the fourth quarter of 1983, has now expanded a further 1.5% beyond this level.

Growth in economic activity in the second quarter was moderate in total, but was broadly based. This was in marked contrast to the first quarter when growth was dominated by the auto industry, both domestically and in the foreign sector. During the second quarter personal expenditure recorded modest growth, and there was an increase in building activity both non-residential and residential. Investment in machinery and equipment fell, while inventory investment increased largely due to an accumulation of durable goods.

The volume of personal expenditure on goods and services advanced 1.0% in the second quarter. In contrast to the dominance of auto and auto related purchases in the first quarter, expenditure growth was more diffuse in the second. A sharp increase in spending on semi-durable goods was led by clothing sales and supported by widespread increases in other categories. Expenditure on durable goods rose at about half the rate of growth as in the first quarter with increases in the non auto components only partly offsetting the weakness in new passenger car sales. Spending on non-durable goods rose 0.6% following two quarters of decline while spending on services rose 0.4% in the quarter.

Real residential construction activity increased 2.3% in the second quarter following three consecutive quarters of decline. The volume of spending on new dwelling construction rose as work continued on units previously started and construction

PRODUIT NATIONAL BRUT

Deuxième trimestre 1984

Après désaisonnalisation au taux annuel, le produit national brut augmente de 2.0% au deuxième trimestre de 1984 pour atteindre \$418.9 milliards. Compte tenu d'une augmentation de 1.2% de l'indice global de déflation, le PNB réel progresse de 0.7%, le même taux d'augmentation qu'au premier trimestre. Le PNB réel, qui avait retrouvé son niveau d'activité d'avant la récession au quatrième trimestre de 1983, le dépasse maintenant de 1.5%.

La croissance au deuxième trimestre a été modérée dans l'ensemble et a été générale alors qu'elle était dominée au premier trimestre par l'industrie automobile à tous les niveaux de l'activité économique. Les dépenses personnelles ont enregistré au deuxième trimestre une augmentation modeste, et l'activité dans les secteurs de la construction résidentielle et non résidentielle a progressé. Les investissements en machines et matériel ont baissé, tandis que les mises en stocks s'accroissaient, principalement à cause des biens durables.

Les dépenses personnelles en biens et services augmentent de 1.0% en volume au deuxième trimestre. Alors que les achats d'automobiles et produits connexes dominaient le premier trimestre, la croissance des dépenses a été plus généralisée au deuxième. La forte augmentation des dépenses en biens semi-durables est dominée par les achats de vêtements et alimentée par des progressions générales dans les autres catégories. Les dépenses en biens durables progressent à un taux inférieur environ de moitié à celui du premier trimestre, la croissance des composantes autres que celles reliées à l'automobile neutralisant en partie seulement la faiblesse des achats de voitures neuves. Les dépenses en biens non durables augmentent de 0.6% après deux trimestres de baisse et celles au titre des services montent de 0.4%.

L'activité réelle dans le secteur de la construction résidentielle progresse de 2.3% au deuxième trimestre, après avoir baissé pendant trois trimestres consécutifs. Les dépenses en volume en logements neufs progressent, avec la poursuite des travaux sur les unités déjà commencées et le début

commenced on a slightly lower number of new units in the second quarter. Also contributing to growth of residential construction were small increases in real estate commissions generated in the market for resale housing and in alterations and improvements.

Following three quarters of slow growth, real spending on business plant and equipment dropped 0.8% in the second quarter, due to a decline of almost 4% in machinery and equipment investment. While domestic production and imports of a wide variety of machinery and equipment grew substantially, these goods went largely into exports or inventories rather than into final domestic demand. The non residential construction component of investment advanced almost 3% in real terms. This strength appeared to be concentrated in small and medium sized building projects. In nominal terms, the growth in plant and equipment investment during the first half of the year is broadly in line with the increase indicated by the mid-year estimate from the Private and Public Investment Survey for 1984.

Inventory investment contributed to growth, as the rate of accumulation of non-farm inventories rose to \$1040 million from \$676 million in the previous quarter. Stock accumulation was almost entirely in manufacturing and included durable goods related to machinery and equipment investment. A substantial contribution was also made by the swing in wood and paper inventories following labour disputes in British Columbia which reduced production in the first quarter. These developments resulted in a small increase in stock-to-sales ratios in the quarter. While stock-to-sales ratios are historically low, this rise should probably not be taken as signalling the start of a sustained upturn as the most recent Statistics Canada business conditions survey reported a continuing cautious attitude by manufacturers with respect to inventory levels.

Following an 8.9% growth in the first quarter, real merchandise exports declined marginally in the second quarter. Exports of autos and auto parts were the main source of the downturn as they fell by almost 9%. Partly offsetting this decline were increased exports of paper products, industrial machinery, crude petroleum, transportation equipment and grains and grain products. Merchandise imports recorded a small decline in constant dollar terms, down sharply from the first quarter growth and again attributable to autos and auto parts. In nominal terms, higher export prices pushed the merchandise trade balance up \$3.7 billion to a record \$21.6 billion, at annual rates. The non-merchandise

des travaux pour un nombre légèrement plus petit de nouvelles unités au deuxième trimestre. Les investissements résidentiels ont également été stimulés par de faibles augmentations des commissions immobilières provenant du marché de la revente et des modifications et améliorations.

Après trois trimestres de croissance lente, les dépenses réelles en usines et matériel des entreprises baissent de 0.8% au deuxième trimestre, en raison d'un repli de presque 4% des investissements en machines et matériel. Pendant que la production intérieure et les importations d'une vaste gamme de machines et de matériel s'accroissent de façon appréciable, ces produits se sont surtout dirigés vers l'exportation ou les stocks plutôt que vers la demande intérieure finale. La composante construction non résidentielle des investissements augmente de presque 3% en termes réels. Cette fermeté s'observe pour les bâtiments non résidentiels et apparemment pour les bâtiments de taille petite et moyenne. En valeur nominale, la croissance des investissements en usines et matériel au premier semestre de 1984 correspond en gros à la hausse dans l'estimation de la mi-année provenant de l'enquête sur les investissements privés et publics pour 1984.

Les mises en stocks ont contribué à la croissance, puisque le taux d'accumulation des stocks non agricoles progresse, passant de \$676 millions au premier trimestre à \$1040 millions au deuxième. Les mises en stocks touchent presque uniquement le secteur de la fabrication et englobent les biens durables reliés aux investissements en machines et matériel. La croissance a été également alimentée dans une bonne mesure par la reprise des stocks de bois et de papier qui a suivi la fin des conflits de travail en Colombie-Britannique lesquels avaient réduit la production au premier trimestre. Le ratio des stocks aux ventes a pour ces raisons légèrement augmenté au cours du trimestre. Bien que les ratios des stocks aux ventes soient à des niveaux bas sur le plan historique, cette augmentation ne signifie pas pour autant le début d'un redressement soutenu puisque la dernière enquête sur les perspectives du monde des affaires de Statistique Canada révèle encore une attitude de prudence de la part du secteur de la fabrication pour ce qui est du niveau des stocks.

Après avoir augmenté de 8.9% au premier trimestre, les exportations réelles de marchandises baissent de façon minime au deuxième, principalement à cause des exportations d'automobiles et de pièces, qui diminuent de presque 9%. Cette baisse est en partie compensée par une augmentation des exportations de produits du papier, de machines industrielles, de pétrole brut, de matériel de transport et de céréales et produits céréaliers. Les importations de marchandises baissent légèrement en volume, alors qu'elles avaient fortement augmenté au premier trimestre, là encore à cause des importations d'automobiles et de pièces. En valeur nominale, l'augmentation des prix à l'exportation devait se solder par une progression de \$3.7 milliards de l'excédent du commerce de marchandises, qui

deficit increased by a smaller amount and the balance on goods and services swung from a deficit of \$0.5 billion to a surplus of \$1.9 billion.

In line with the continued moderate rate of increase of major price indexes in the economy, the GNE implicit price index grew 1.2%, unchanged from the first quarter rate of growth. The implicit index for final domestic demand increased by only 0.6%. The difference between this measure and the total implicit deflator is almost entirely due to a strong 3.4% rise in the terms of trade as prices of merchandise exports rose almost 5%. Price movements in other major aggregates included a slowing in the rate of increase in the deflators for personal expenditure and gross fixed capital formation.

Corporate profits were little changed in the second quarter following a 10.8% growth in the first. Profit growth in the non-financial sector was moderate in total, although much of this growth was attributable to a recovery of profits in the paper and allied industry following first quarter production disruptions due to labour disputes. Offsetting the moderate growth in non-financial sector profits was weakness in the financial sector.

Labour income rose 1.7% in the second quarter following a rate of increase of 0.8% in the first. This reflected primarily a faster pace of growth in employment during the second quarter. There was also a sharp 7.9% increase in personal investment income and a decline in personal income taxes, resulting in a 3.8% advance in personal disposable income, the first increase in three quarters. This increase, in excess of the growth in personal expenditure, caused the personal savings rate to return to the 1983 level.

The total government sector deficit, on a national accounts basis, rose \$6.2 billion to a seasonally adjusted rate of \$27.6 billion. Total expenditures increased 2.8%, largely due to higher transfers to persons, subsidies and capital assistance. Government revenues declined 0.4%, mainly as a result of lower collections of personal income taxes and petroleum-related indirect taxes.

atteint ainsi le niveau record de \$21.6 milliards au taux annuel; le déficit sur invisibles se dégradant légèrement, le solde des biens et services passe d'un déficit de \$0.5 milliard à un excédent de \$1.9 milliard.

S'alignant sur le taux d'augmentation toujours modéré des principaux indices de prix de l'économie, l'indice implicite de prix de la DNB monte de 1.2%, soit comme au premier trimestre. La progression de l'indice implicite de la demande intérieure finale n'est que de 0.6% seulement. La différence entre cette mesure et l'indice global de déflation est presque uniquement explicable par la forte hausse de 3.4% des termes de l'échange, puisque les prix des exportations de marchandises ont augmenté de presque 5%. Les mouvements des prix des autres principaux agrégats comprennent un taux d'augmentation moins élevé des indices de déflation des dépenses personnelles et de la formation brute de capital fixe.

Les bénéfices des sociétés restent pratiquement inchangés au deuxième trimestre, après avoir monté de 10.8% au premier. La croissance des bénéfices du secteur non financier a été dans l'ensemble modérée, bien qu'elle s'explique en grande partie par une reprise de ceux de la branche du papier et produits connexes qui a suivi les perturbations du premier trimestre imputables à des conflits de travail. Cette croissance modérée des bénéfices du secteur non financier est compensée par la faiblesse de ceux du secteur financier.

Le revenu du travail augmente de 1.7% au deuxième trimestre, comparativement à 0.8% au premier. Cette accélération traduit principalement un taux de croissance plus élevé de l'emploi au deuxième trimestre. On relève également une forte progression de 7.9% des revenus de placements des particuliers et une diminution des impôts sur le revenu des particuliers se soldant par une hausse de 3.8% du revenu personnel disponible, la première en trois trimestres. Comme cette hausse est supérieure à celle des dépenses personnelles, le taux de l'épargne personnelle est revenu à son niveau de 1983.

Le déficit de l'ensemble du secteur des administrations publiques sur la base des comptes nationaux augmente de \$6.2 milliards pour atteindre un taux désaisonnalisé de \$27.6 milliards. Le total des dépenses s'accroît de 2.8%, principalement à cause d'une augmentation des transferts aux particuliers, des subventions et de l'aide sous forme de capitaux. Les recettes des administrations publiques baissent de 0.4% en raison d'une diminution des perceptions de l'impôt sur le revenu des particuliers et des impôts indirects reliés au pétrole.

Federal Government Petroleum-related Revenues and Expenditures

The petroleum-related programs of the federal government continued to have a significant effect on the movement of some of the federal income and expenditure items. The following table provides quarterly estimates, seasonally adjusted at annual rates, for 1983 and 1984 of the major petroleum-related programs.

L'administration fédérale et le pétrole-Recettes et dépenses

Les programmes reliés au pétrole de l'administration fédérale ont continué d'influencer fortement les taux de variation de certaines rubriques de ses revenus et dépenses. Le tableau suivant montre les estimations trimestrielles de 1983 et 1984, après désaisonnalisation au taux annuel, pour les principaux programmes reliés au pétrole.

Petroleum-related Revenues and Expenditures (Seasonally Adjusted at Annual Rates)

Recettes et dépenses reliées au pétrole (Après désaisonnalisation au taux annuel)

| | 1983 | | | | 1984 | |
|----------------------------------------------------------------------------------------------------------------|-------------------------------------------|-------|-------|-------|-------|-------|
| | Year | | | | | |
| | II | III | IV | Année | I | II |
| | millions of dollars – millions de dollars | | | | | |
| Revenues – Recettes | | | | | | |
| Direct taxes – Corporations – Impôts directs – sociétés: | | | | | | |
| Petroleum and gas revenues tax ¹ – Impôt sur les recettes du pétrole et du gaz naturel ¹ | 1,588 | 1,716 | 1,996 | 1,791 | 2,280 | 2,036 |
| Incremental oil revenue tax ¹ – Impôt sur les recettes pétrolières supplémentaires ¹ | 100 | 76 | 72 | 86 | 68 | 64 |
| Indirect taxes – Impôts indirects: | | | | | | |
| Oil export charge – Taxe à l'exportation du pétrole | 224 | 396 | 420 | 341 | 444 | 736 |
| Gazoline excise tax – Taxe d'accise sur l'essence | 252 | 444 | 472 | 404 | 340 | 360 |
| Natural gas and gas liquids excise tax – Taxe d'accise sur le gaz naturel et les liquides tirés du gaz | 876 | 548 | 300 | 713 | 260 | 12 |
| Petroleum compensation charge – Prélèvement d'indemnisation du pétrole | 1,404 | 2,080 | 1,816 | 1,782 | 2,032 | 1,660 |
| Canadian ownership charge – Prélèvement de participation canadienne | 660 | 932 | 848 | 824 | 908 | 728 |
| Expenditures – Dépenses | | | | | | |
| Subsidies – Subventions: | | | | | | |
| Importers' compensation – Versements de compensation aux importateurs | 112 | 564 | 844 | 642 | 792 | 500 |
| Syncrude subsidies – Subventions Syncrude | 1,340 | 1,720 | 1,724 | 1,585 | 1,956 | 2,420 |
| Capital assistance – Subventions d'équipement: | | | | | | |
| Petroleum incentives program – Programme d'encouragement du secteur pétrolier | 784 | 1,528 | 1,836 | 1,466 | 1,436 | 2,252 |

¹ Estimated liabilities: collections include the incremental oil revenue tax and were \$2,124 million in the second quarter of 1983, \$1,756 million in the third quarter of 1983, \$2,396 million in the fourth quarter of 1983, and \$2,304 million in the first quarter of 1984 and \$2,124 million in the second quarter of 1984.

¹ Créances estimatives: les perceptions comprennent l'impôt sur les recettes pétrolières supplémentaires et se sont élevées respectivement à \$2,124 millions au deuxième trimestre de 1983, à \$1,756 millions au troisième trimestre de 1983, à \$2,396 millions au quatrième trimestre de 1983, à \$2,304 millions au premier trimestre de 1984 et à \$2,124 millions au deuxième trimestre de 1984.

(1) Excludes profits of government business enterprises. (2) Includes the withholding tax applicable to this item. (3) Includes profits (net of losses) of government business enterprises and other government investment income. (4) Includes value of physical change in farm inventories as shown in line 14, Table 5. An adjustment has been made to take account of the accrued earnings of farm operators arising out of the operations of the Canadian Wheat Board. (5) Includes net income of independent professional practitioners and imputed net rent on owner-occupied dwellings. (6) See footnote 4, Table 2.

(1) Sans les bénéfices des entreprises commerciales publiques. (2) Y compris les retenues fiscales. (3) Y compris les bénéfices (pertes déduites) des entreprises commerciales publiques ainsi que les autres revenus de placements des administrations. (4) Y compris la valeur de la variation des stocks agricoles telle qu'elle figure à la rubrique 14 du tableau 5. Un ajustement a été effectué pour tenir compte des gains comptables découlant des activités de la Commission canadienne du blé. (5) Y compris le revenu net des personnes exerçant une profession pour propre compte et les loyers nets imputés des logements occupés par leur propriétaire. (6) Voir note 4, tableau 2.

(1) Includes defence expenditures. For amounts see line 45, Table 6. (2) Includes outlays on new durable assets such as building and highway construction by government, other than government business enterprises. Excludes defence construction and equipment which are defined as current expenditure. (3) Comprises capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. (4) The book value of inventories is deflated to remove the effect of price changes and the derived 'physical' change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment (see line 8, Table 1).

(1) Y compris les dépenses militaires présentées à la ligne 45, tableau 6. (2) Y compris les dépenses en biens durables neufs, comme les immeubles et les routes, des administrations publiques, sauf celles de leurs entreprises commerciales publiques. Ne comprend par les installations et le matériel militaires, considérés comme dépenses courantes. (3) Comprend les dépenses d'investissement des entreprises privées, des entreprises commerciales publiques et des institutions non commerciales privées, ainsi que les dépenses de construction résidentielle neuve des particuliers. Par définition, les dépenses d'investissement comprennent tous les frais de mutation relatifs à la vente et à l'achat d'immobilisations existantes. (4) La valeur comptable des stocks est déflatée de façon à supprimer l'effet des variations de prix. La variation 'matérielle' ainsi obtenue est ensuite évaluée aux prix moyens de la période courante, ce qui permet d'obtenir la valeur de la variation matérielle. La différence entre cette valeur de la variation matérielle et la variation de la valeur comptable est appelée ajustement de la valeur des stocks (voir ligne 8, tableau 1).

| 3 | Net income received by farm operators from farm production(1). | - 469 | - 1,037 | 7,202 | - 1,009 | 4,687 | - 1,155 | - 910 | 6,844 | - 1,047 | 3,732 |
| 4 | Net income of non-farm unincorporated business including rent. | 2,388 | 3,173 | 3,439 | 3,199 | 12,199 | 2,745 | 3,734 | 4,306 | 4,057 | 14,842 |
| 5 | Interest, dividends, and miscellaneous investment income(2). | 8,700 | 9,129 | 10,112 | 11,103 | 39,044 | 11,071 | 11,114 | 11,161 | 10,458 | 43,804 |
| | Current transfers: | | | | | | | | | | |
| 6 | From government | 8,800 | 8,926 | 8,645 | 9,076 | 35,447 | 10,478 | 10,850 | 11,193 | 11,669 | 44,190 |
| 7 | Transfer payments to persons | 8,714 | 8,834 | 8,573 | 8,977 | 35,098 | 10,344 | 10,692 | 10,943 | 11,404 | 43,383 |
| 8 | Capital assistance | 86 | 92 | 72 | 99 | 349 | 134 | 158 | 250 | 265 | 807 |
| 9 | From corporations(3) | 159 | 163 | 162 | 162 | 646 | 121 | 121 | 122 | 124 | 488 |
| 10 | From non-residents | 124 | 130 | 149 | 142 | 545 | 151 | 150 | 150 | 149 | 600 |
| 11 | Personal income | 64,922 | 69,414 | 80,297 | 73,896 | 288,529 | 74,356 | 77,924 | 86,748 | 78,398 | 317,426 |

(1) This item differs from line 6, Table 1 by excluding the adjustment which has been made to take account of the accrued net earnings arising out of the operations of the Canadian Wheat Board ('adjustment on grain transactions'). (2) Includes all interest on the public debt paid by government to persons.

(3) Charitable and other contributions, and bad debt write-offs.

(1) Cette rubrique diffère de la ligne 6, tableau 1. La différence consiste en l'exclusion de l'ajustement qui a été apporté pour tenir compte du revenu comptable net au titre des activités de la Commission canadienne du blé ('ajustement relatif aux transactions de céréales').

(2) Y compris tous les intérêts sur la dette publique payés par les administrations publiques aux particuliers.

(3) Dons de charité, autres contributions et amortissement des mauvaises créances.

(1) The implicit price deflators of the seasonally unadjusted components of Gross National Expenditure, derived by dividing the value figures in Table 2 by the constant dollar figures in Table 10, are not suitable as indicators of quarter-to-quarter price change. This is because they are currently weighted and therefore are affected by compositional shifts which occur within the unadjusted components of Gross National Expenditure on a quarter-to-quarter basis. Quarter-to-quarter movement in the implicit price deflators based on seasonally adjusted data are less subject to the problem of shifting weights and may be used as a measure of price change.

(1) Les indices implicites de déflation de prix des composantes non désaisonnalisées de la dépense nationale brute, obtenus en divisant les valeurs en dollars courants du tableau 2 par les valeurs en dollars constants du tableau 10, ne sont pas de bons indicateurs de la variation des prix d'un trimestre à l'autre car ils sont à pondération courante et, par conséquent, sensibles aux changements de composition d'un trimestre à l'autre des diverses composantes non désaisonnalisées de la dépense nationale brute. Toutefois, les indices implicites de déflation de prix basés sur les séries désaisonnalisées sont moins sujets à ces changements de pondération et peuvent donc servir à mesurer les variations de prix.

(1) See footnote 1, Table 1.

(2) See footnote 2, Table 1.

(3) See footnote 3, Table 1.

(4) Includes an arbitrary smoothing of crop production, and standard seasonal adjustments for withdrawals of grain from farm stocks and for the change in farm-held livestock and other inventories. Because of the arbitrary element, too precise an interpretation should not be given the seasonally adjusted figures of accrued net income of farm operators.

(5) See footnote 5, Table 1.

(6) See footnote 4, Table 2.

(1) Voir note 1, tableau 1.

(2) Voir note 2, tableau 1.

(3) Voir note 3, tableau 1.

(4) Comprend un lissage arbitraire de la production culturale et des ajustements saisonniers normalisés visant les prélèvements de céréales sur les stocks agricoles et la variation des cheptels et des autres stocks détenus dans les fermes. En raison de cet élément arbitraire, on ne devrait pas donner une interprétation trop rigoureuse des chiffres désaisonnalisés du revenu comptable net des exploitants agricoles.

(5) Voir note 5, tableau 1.

(6) Voir note 4, tableau 2.

TABLE 12. Gross National Expenditure, by Quarters

Seasonally Adjusted at Annual Rates

(1) Includes defence expenditures. For amounts see line 45, Table 16. (2) See footnote 2, Table 2. (3) See footnote 3, Table 2. (4) See footnote 4, Table 2. (5) In the seasonally adjusted series, the value of grain crop production in each quarter is taken as one-fourth of the estimated value of crop production for the year as a whole (see footnote 4, Table 11). All other items in the farm inventories series are seasonally adjusted by standard techniques.

(1) Y compris les dépenses militaires. Pour les montants, voir rubrique 45, tableau 16. (2) Voir note 2, tableau 2. (3) Voir note 3, tableau 2. (4) Voir note 4, tableau 2. (5) Dans les séries désaisonnalisées, on suppose que la valeur de la production céréalière de chaque trimestre est égale au quart de la production totale de l'année (voir note 4 au bas du tableau 11). Tous les autres éléments de la série sur les stocks agricoles sont désaisonnalisés à l'aide de méthodes normalisées.

(1) See footnote 1, Table 6.

(2) The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four since real property taxes accrue uniformly throughout the taxation year. Because in recent years, changes in real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted taxes series.

(3) Includes capital consumption allowances as shown in line 92.

(1) Voir note 1, tableau 6.

(2) Les estimations trimestrielles des impôts fonciers, à la fois non désaisonnalisées et désaisonnalisées, sont obtenues en divisant les chiffres annuels par quatre, étant donné que ces impôts s'accumulent de façon uniforme tout au long de l'année d'imposition. Toutefois, comme les révisions ont en général relevé le niveau des impôts immobiliers au cours des dernières années, il en est résulté une saisonnalité fictive entre le quatrième et le premier trimestre dans les séries désaisonnalisées.

(3) Comprennent les provisions pour consommation de capital figurant à la ligne 92.

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

System of National Accounts,
Gross National Product Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9151) or to the Statistics Canada reference centre in:

| | | | |

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, K1A 0T6.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Système de comptabilité nationale,
Division du produit national brut,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9151) ou au centre de consultation de Statistique Canada à:

| | | | |

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services in current and constant prices, is portrayed in the Input-Output tables of the System (Catalogue with prefix 15). The Catalogue Nos. carrying the prefix 16 provide constant dollar measures of the contribution of each industry to total Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue with prefix 14).

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by Financial Flow Accounts (Catalogue with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Levels of outstanding financial assets and liabilities are published annually as a major contribution towards a complete national balance sheet.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, *A System of National Accounts* (Studies in Methods, Series F, No. 2, Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le n° de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (n° de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services aux prix du marché et en dollars constants figure dans les tableaux d'entrées-sorties du système (n° de catalogue commençant par 15). Les publications dont les numéros de catalogue commencent par 61 comprennent les mesures en dollars constants de l'apport de chaque branche d'activité au total du produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le n° de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut par activité économique. Les comptes de flux financiers (publications dont les n°s de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les niveaux des actifs et passifs financiers en circulation sont disponibles annuellement; ils constituent un élément important d'un bilan national exhaustif.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, n° 2, rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

NOTE

In order to obtain a complete quarterly historical record of the National Income and Expenditure Accounts, the following publications should be consulted:

National Income and Expenditure Accounts, Volume 2, The Quarterly Estimates, 1947 - 1974, Catalogue 13-533, for the years 1947 - 1970.

National Income and Expenditure Accounts, First Quarter 1978, Catalogue 13-001 for the years 1971 - 1973.

National Income and Expenditure Accounts, First Quarter 1981, Catalogue 13-001 for the years 1974 and 1975.

National Income and Expenditure Accounts, First Quarter 1983, Catalogue 13-001 for the year 1976.

NOTA

Pour disposer d'un dossier trimestriel historique complet des comptes nationaux des revenus et des dépenses, le lecteur est prié de consulter les publications suivantes:

Comptes nationaux des revenus et des dépenses, volume 2, Les estimations trimestrielles, 1947 - 1974, n° 13-533 au catalogue, pour la période 1947 - 1970.

Comptes nationaux des revenus et des dépenses, premier trimestre 1978, n° 13-001 au catalogue, pour la période 1971 - 1973.

Comptes nationaux des revenus et des dépenses, premier trimestre 1981, n° 13-001 au catalogue, pour la période 1974 - 1975.

Comptes nationaux des revenus et des dépenses, premier trimestre 1983, n° 13-001 au catalogue, pour l'année 1976.

Gross National Product at market prices rose 1.4% in the third quarter of 1984 to a level of \$425.4 billion seasonally adjusted at annual rates. Real GNP increased 1.9%, up from the 0.8% growth of the second quarter.

Après désaisonnalisation au taux annuel, le produit national brut aux prix du marché a augmenté de 1.4% au troisième trimestre de 1984 pour atteindre \$425.4 milliards. Le PNB réel s'est accru de 1.9%, après une hausse de 0.8% au deuxième.

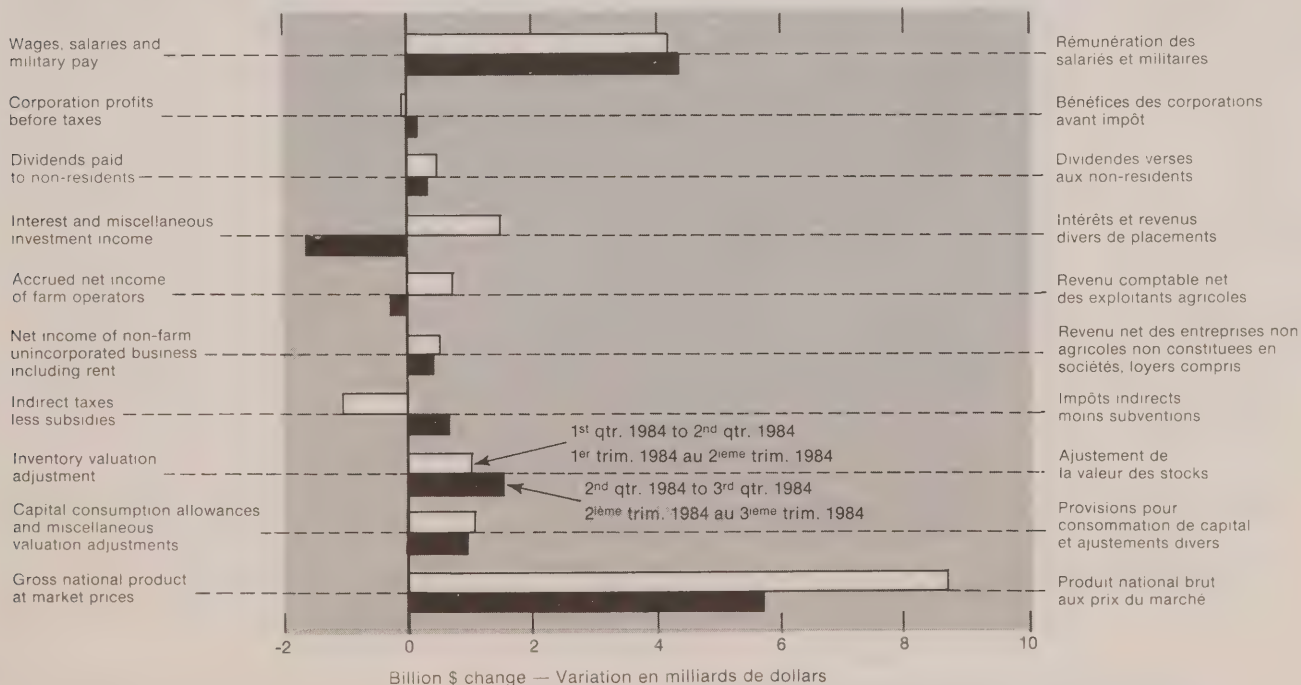

Wages, salaries and supplementary labour income and military pay and allowances rose 1.9%, virtually unchanged from the rate of increase in the second quarter. There was little change in corporation profits before taxes while interest and miscellaneous investment income fell 4.9% in third quarter of 1984.

La rémunération des salariés et militaires s'est accrue de 1.9%, soit pratiquement le même taux qu'au deuxième. Les bénéfices des sociétés avant impôts sont demeurés pratiquement inchangés pendant que les intérêts et revenus divers de placements baissant de 4.9% au troisième trimestre de 1984.

Quarterly changes in GNP and components

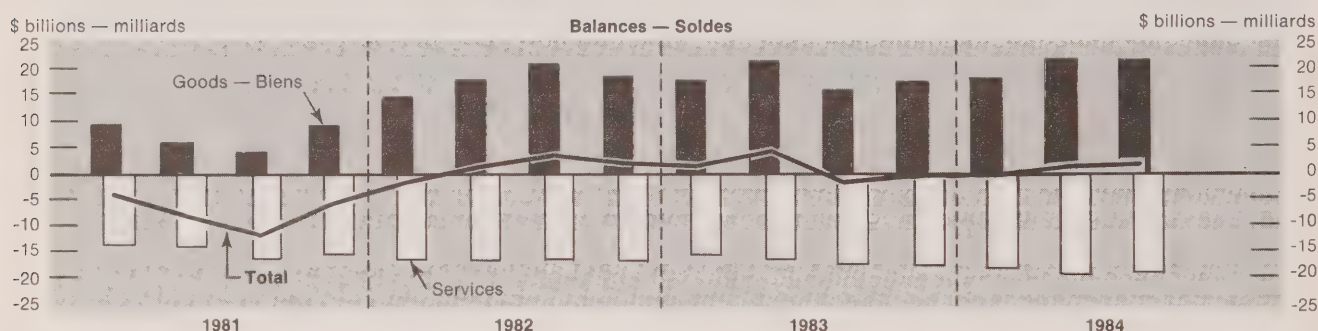

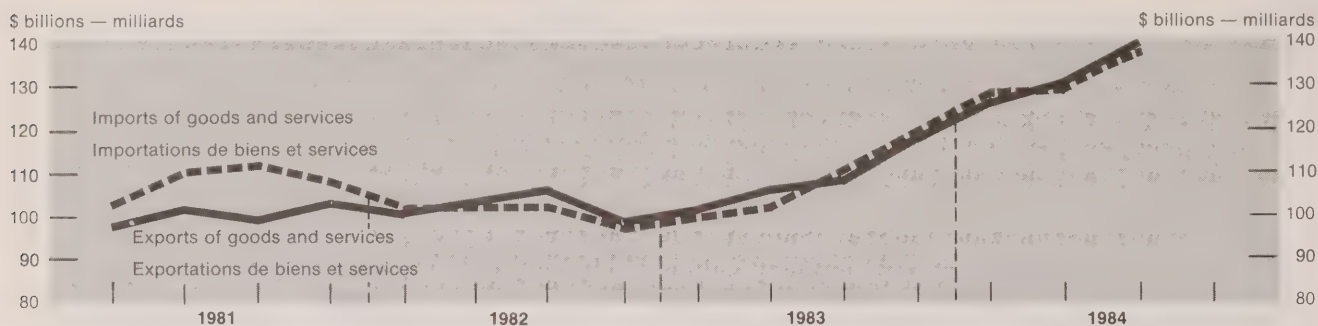

Mouvements trimestriels du PNB et de ses composantes

All quarterly data adjusted for seasonal variation and at annual rates. — Toutes les séries trimestrielles sont corrigées des variations saisonnières, aux taux annuels

Exports and Imports of goods and services each grew 5.9%. The nominal merchandise trade balance fell \$0.2 billion to \$21.5 billion at annual rates.

Les exportations et importations de biens et services se sont accrues de 5.9%. Le solde nominal du commerce de marchandises a baissé de \$0.2 milliard pour s'inscrire à \$21.5 milliards au taux annuel.

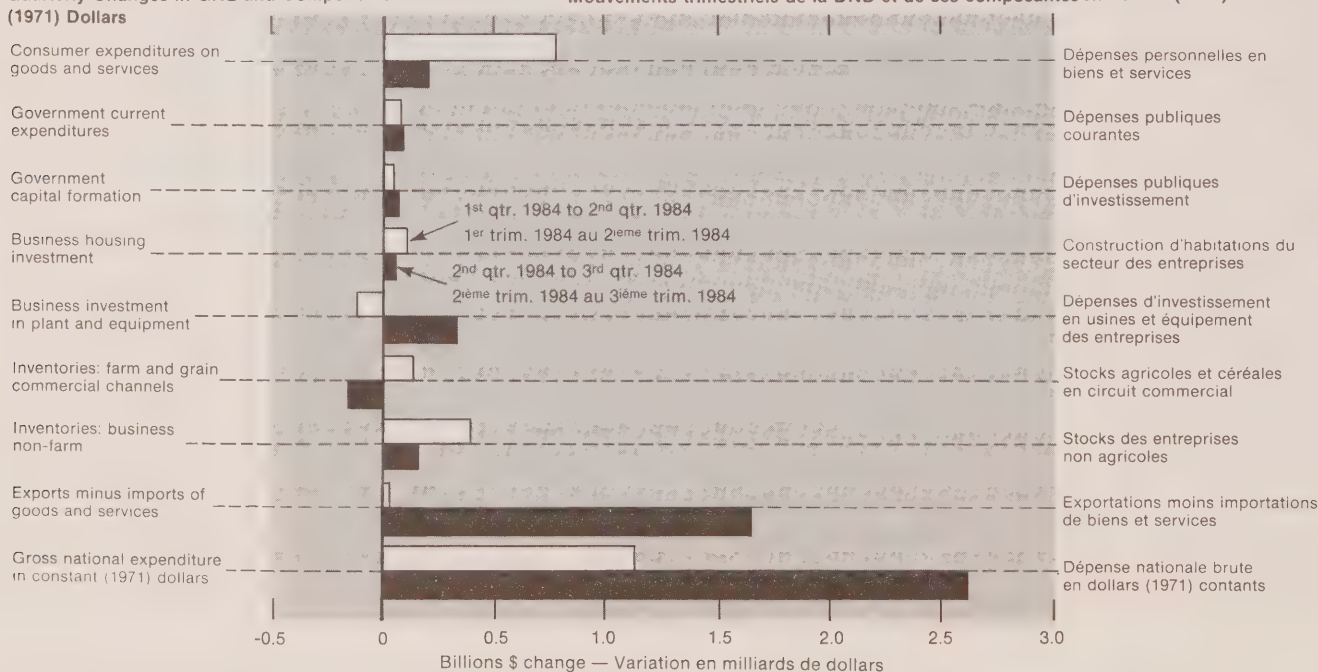

About half of the growth in economic activity was due to increased real net exports of goods. Real residential construction grew a modest 1.0%; as well, real business spending on plant and equipment continued its slow recovery in the third quarter. Personal expenditure rose marginally while the level of inventory accumulation was virtually unchanged.

Environ la moitié de la croissance de l'activité économique a été imputable à l'augmentation des exploitations réelles nettes de biens. La construction résidentielle en termes réels n'a progressé que légèrement (+1.0%) un peu comme les dépenses réelles des entreprises en usines et matériel qui ont poursuivi leur lente reprise au troisième trimestre. Les dépenses personnelles ont augmenté de façon minime tandis que le niveau des mises en stock reste pratiquement inchangé.

Quarterly Changes in GNE and Components

Mouvements trimestriels de la DNB et de ses composantes

Introduction

GROSS NATIONAL PRODUCT

Third Quarter 1984

Gross National Product rose 1.4% in the third quarter of 1984 to a level of \$425.4 billion, seasonally adjusted at annual rates. After allowing for a 0.5% decline in overall prices, real GNP increased 1.9%, more than double the 0.8% average increase of the first two quarters. Available monthly evidence suggests that most of the growth occurred early in the quarter. Real GNP, which completed its recovery in the fourth quarter of 1983, has since expanded 3.6% beyond its pre-recession peak in the second quarter of 1981.

About half of the strong growth in economic activity in the third quarter was due to increased real net exports of goods. Gross fixed capital formation contributed about one-fifth of the growth and advanced in all its major components. Personal expenditure rose marginally while the level of inventory accumulation was essentially unchanged. On the income side, most of the strength came from labour income as profit growth was weak for the second successive quarter. The fall in the implicit price index for GNE reflected declines in some prices and weight-shift effects among exports. More indicative of price movements in the domestic economy was the moderate 0.8% increase in the implicit price of final domestic demand.

Real merchandise exports rose 8.6% in the third quarter, following a marginal increase in the second quarter. This strength was most notable in motor vehicle and parts, but there was also considerable growth in wheat, woodpulp, lumber, newsprint, aircraft engines and parts and some electrical equipment. Merchandise imports, which also rose marginally in the second quarter, recorded a 5.3% growth in the third. As was the case in exports, motor vehicles and parts again predominated and

PRODUIT NATIONAL BRUT

Troisième trimestre 1984

Après désaisonnalisation au taux annuel, le produit national brut augmente de 1.4% au troisième trimestre de 1984 pour atteindre \$425.4 milliards. Compte tenu d'une baisse de 0.5% de l'ensemble des prix, le PNB réel s'accroît de 1.9%, plus du double de l'augmentation moyenne de 0.8% des deux premiers trimestres de l'année. Les données mensuelles disponibles semblent indiquer que la plus grande partie de cette croissance a eu lieu au début du trimestre. Le PNB réel, ayant terminé sa reprise au quatrième trimestre de 1983, a depuis dépassé de 3.6% son sommet d'avant la récession au deuxième trimestre de 1981.

Environ la moitié de la forte croissance de l'activité économique au troisième trimestre est imputable à l'augmentation des exportations réelles nettes de biens. La formation brute de capital fixe contribue pour un cinquième environ à la croissance et enregistre une progression de toutes ses principales composantes. Les dépenses personnelles augmentent de façon minime tandis que le niveau des mises en stocks reste pratiquement inchangé. Du côté des revenus, la plus grande partie de la vigueur observée provient du revenu du travail, alors que la croissance des bénéfices reste faible pour un deuxième trimestre consécutif. La baisse de l'indice implicite de prix de la DNB au troisième trimestre rend compte de la diminution de certains prix et de changements de pondération dans les exportations. L'augmentation modérée de 0.8% de l'indice implicite de la demande intérieure finale constitue une meilleure indication du mouvement des prix sur le plan intérieur.

Les exportations réelles de marchandises augmentent de 8.6% au troisième trimestre, après une progression minime au deuxième. Cette fermeté touche surtout les véhicules automobiles et les pièces, bien qu'on note une croissance marquée dans le blé, la pâte de bois, le bois de construction, le papier journal, les moteurs et pièces d'avions et certains équipements électriques. Les importations de marchandises, qui avaient elles aussi augmenté faiblement au deuxième trimestre, progressent de 5.3% au troisième. Là encore, ce sont les véhicules automobiles et les pièces qui

there were, as well, increases in industrial machinery and crude and fabricated metals. The relatively greater increase of goods exports caused the real merchandise balance to increase \$1.5 billion from the second quarter, half of which was auto-related. Because of a sharp decrease in the terms of trade the nominal merchandise trade balance did not increase but rather fell \$0.2 billion to \$21.5 billion at annual rates. This was offset by a small improvement in the non-merchandise deficit so that the surplus on both goods and services increased to \$1.9 billion from \$1.7 billion in the second quarter.

Following a small decline in the second quarter, real business spending on plant and equipment continued its slow recovery in the third quarter, and is still 19% below the pre-recession peak in the second quarter of 1981. Non-residential construction spending grew 1.9% following a 3.0% increase in the previous quarter. In the absence of major construction projects, building activity continues to be supported by a myriad of small and medium-sized projects. Exploration and development activity also advanced. Real expenditure on machinery and equipment increased after a decline in the second quarter.

Real residential construction activity grew a modest 1.0% in the third quarter following the previous quarter's 2.2% advance. Construction of new single detached dwellings led the growth as starts of these units increased by more than 10% in the quarter. Offsetting this strength was reduced building activity of apartments and lower real estate commissions generated in the market for resale housing.

Concurrent with the lack of growth in personal disposable income, the volume of expenditure on goods and services increased fractionally in the third quarter. Personal spending thus contributed about 8% to the growth of GNP in contrast to an average contribution of almost 50% in the previous six quarters. The sources of weakness were declines in outlays on durable goods (down 1.2%) and on semi-durable goods (down 0.4%). Lower spending on durables was mainly in household furniture, appliances and new passenger cars. Clothing and footwear accounted for the bulk of the decline in semi-durables spending. Expenditure on non-durables rose 0.8% following three quarters of declines or marginal growth while spending on services also rose 0.8%.

The rate of non-farm business inventory accumulation of \$1.3 billion in the third quarter was about the same as in the second quarter. However,

prédominant; on remarque aussi une hausse dans le cas des machines industrielles et des métaux bruts et travaillés. Étant donné l'augmentation relativement plus forte des exportations de biens, le solde réel du commerce de marchandises est en hausse de \$1.5 milliard par rapport au deuxième trimestre, dont la moitié au titre du secteur automobile. En raison d'une brusque chute des termes de l'échange, le solde nominal du commerce de marchandises, au lieu de s'accroître, baisse de \$0.2 milliard pour s'inscrire à \$21.5 milliards au taux annuel. Cette baisse se trouve compensée par une légère amélioration du déficit sur invisibles, et l'excédent du commerce des biens et services augmente, passant de \$1.7 milliard au deuxième trimestre à \$1.9 milliard au troisième.

Après avoir légèrement baissé au deuxième trimestre, les dépenses réelles des entreprises en usines et matériel ont poursuivi leur lente reprise, et sont encore inférieures de 19% à leur sommet d'avant la récession au deuxième trimestre de 1981. Les dépenses en construction non résidentielle neuve s'accroissent de 1.9%, après avoir augmenté de 3.0% le trimestre précédent. En l'absence de grands projets, l'activité dans le secteur du bâtiment continue d'être alimentée par une foule de petits et moyens projets. L'exploration et la mise en valeur des ressources ont également progressé au troisième trimestre. Les dépenses réelles en machines et matériel augmentent après avoir baissé au deuxième trimestre.

L'activité réelle dans le secteur de la construction résidentielle ne progresse que légèrement (+ 1.0%) au troisième trimestre, après s'être accrue de 2.2% au deuxième. La construction de maisons détachées unifamiliales prédomine, avec une augmentation supérieure à 10% dans les mises en chantier. Cet élément de fermeté est neutralisé par une baisse dans le cas de la construction d'appartements et par une diminution des commissions immobilières sur le marché de la revente.

En parallèle avec la faible croissance du revenu personnel disponible, le volume des dépenses personnelles en biens et services augmente très légèrement au troisième trimestre. Les dépenses personnelles contribuent ainsi pour environ 8% seulement à la croissance du PNB, contre presque 50% en moyenne au cours des six trimestres précédents. Cette faiblesse provient de la baisse des biens durables (- 1.2%) et semi-durables (- 0.4%). La baisse des dépenses en biens durables touche principalement les meubles, les appareils ménagers et les voitures neuves. Dans le cas des biens semi-durables, la baisse est surtout imputable aux vêtements et aux chaussures. Les dépenses en biens non durables augmentent de 0.8%, après être restées pratiquement inchangées pendant trois trimestres, tandis que celles au titre des services progressaient également de 0.8%.

L'accumulation de \$1.3 milliard des stocks commerciaux non agricoles au troisième trimestre est pratiquement égale à celle du deuxième. Cependant, pour le total, la baisse

within the total, the slide in the rate of non-durable goods build-up offset the surge in durable goods inventories. The higher durable goods inventories were concentrated in retail and wholesale trade, reflecting weak final domestic demand and strong import growth. At the manufacturing level, durable goods inventories rose only moderately and may have reflected the sharp increase in exports. The moderate inventory accumulation together with the stronger growth in the economy moved the aggregate stock-to-sales ratio down further, a continuation of the steep decline emerging in recent years.

There was a decumulation in farm inventories, including grain in commercial channels; liquidations in grain stocks, reflecting export demand, was partially offset by accumulations of livestock.

The implicit price index for GNE has been distorted in the quarter by weight-shift effects among exports. If these effects are discounted, overall prices appear to have risen about 0.4%, compared to the 0.5% decline currently shown for the GNE implicit price index. The implicit deflator for final domestic demand, a measurement more reflective of price movements in the domestic economy, increased 0.8% in the third quarter and the growth continued to decrease to 3.7% on a year-over-year basis. Of note are recent moderations in construction prices.

On the income side, labour income rose 1.9% in the third quarter, basically unchanged from the rate of growth in the previous quarter. Much of the increase reflected a 1.0% advance in employment. Personal disposable income was virtually unchanged in the quarter, as dividend payments declined and income tax collections rose sharply. As a result the personal savings rate fell from 13.8% in the second quarter to 12.7% in the third. There was little change in corporation profits before taxes. Profits of industrial corporations continued to grow slowly while those of financial corporations recorded a second consecutive decline. The profit share of GNP has fallen slightly in the past two quarters and currently stands at 9.3%, considerably below the share maintained throughout most of the 1970's.

The government sector deficit, on a national accounts basis, decreased \$3.1 billion to a seasonally adjusted rate of \$26.1 billion in the third quarter. Government revenues advanced 3.4%, mainly due to higher personal direct taxes. The increase in total expenditure was 1.4% and reflected increased payments on the public debt, spending on goods and services and transfers to persons.

des mises en stocks de biens non durables a neutralisé la poussée dans les stocks de biens durables. L'augmentation de ces derniers s'observe surtout au niveau du commerce de gros et de détail, traduisant la faiblesse de la demande intérieure finale et la forte croissance des importations. Au niveau de la fabrication, les stocks de biens durables n'ont augmenté que modérément, ce qui pourrait rendre compte de la forte croissance des exportations. Le taux modéré de mise en stocks conjugué à une plus forte croissance de l'économie ont réduit davantage le ratio global des stocks aux ventes, ce qui marque la poursuite de la forte baisse observée ces dernières années.

Il y a eu liquidation des stocks agricoles, y compris les céréales en circuit commercial; la liquidation des stocks de céréales, traduisant la demande à l'exportation, a été en partie compensée par une accumulation dans les stocks de bétail.

L'indice implicite de prix de la DNB a été affecté au cours du trimestre par des changements de pondération dans les exportations. Si l'on ne tient pas compte de ces distorsions, il semble que les prix d'ensemble aient augmenté d'environ 0.4%, alors que l'indice implicite de la DNB enregistre une baisse de 0.5%. L'indice implicite de déflation de la demande intérieure finale, mesure qui traduit mieux les mouvements de prix sur le plan intérieur, progresse de 0.8% au troisième trimestre et continue de ralentir pour s'inscrire à 3.7% sur une base annuelle. La modération récente des prix dans la construction mérite d'être soulignée.

S'agissant des revenus, le revenu du travail augmente de 1.9% au troisième trimestre, soit pratiquement le même taux qu'au deuxième. La plus grande partie de cette augmentation traduit une hausse de 1.0% de l'emploi. Le revenu personnel disponible reste à peu près au même niveau au troisième trimestre, compte tenu de la baisse des paiements de dividendes et de la forte augmentation des perceptions fiscales. Il en résulte une diminution du taux de l'épargne personnelle, qui passe de 13.8% au deuxième trimestre à 12.7% au troisième. Les bénéfices des sociétés avant impôts demeurent pratiquement inchangés au troisième trimestre. Les bénéfices des sociétés industrielles continuent de croître lentement tandis que ceux des entreprises financières baissent pour un deuxième trimestre consécutif. La part des bénéfices dans le PNB a légèrement baissé au cours des deux derniers trimestres et s'établit actuellement à 9.3%, bien en dessous de son niveau pendant la plus grande partie des années 70.

Le déficit du secteur des administrations publiques, sur la base des comptes nationaux, diminue de \$3.1 milliards pour s'inscrire au troisième trimestre à \$26.1 milliards au taux désaisonnalisé. Les recettes progressent de 3.4%, surtout à cause de l'augmentation des impôts directs des particuliers. La hausse de 1.4% des dépenses totales traduit l'accroissement des paiements au titre de la dette publique, des dépenses en biens et services et des transferts aux particuliers.

Federal Government Petroleum-related Revenues and Expenditures

The petroleum-related programs of the federal government continued to have a significant effect on the movement of some of the federal income and expenditure items. The following table provides quarterly estimates, seasonally adjusted at annual rates, for 1983 and 1984 of the major petroleum-related programs.

L'administration fédérale et le pétrole-Recettes et dépenses

Les programmes reliés au pétrole de l'administration fédérale ont continué d'influencer fortement les taux de variation de certaines rubriques de ses revenus et dépenses. Le tableau suivant montre les estimations trimestrielles de 1983 et 1984, après désaisonnalisation au taux annuel, pour les principaux programmes reliés au pétrole.

Petroleum-related Revenues and Expenditures (Seasonally Adjusted at Annual Rates)

Recettes et dépenses reliées au pétrole (Après désaisonnalisation au taux annuel)

| | 1983 | | | 1984 | | |
|----------------------------------------------------------------------------------------------------------------|-------------------------------------------|-------|-------|-------|-------|-------|
| | Year | | | | | |
| | III | IV | Année | I | II | III |
| | millions of dollars – millions de dollars | | | | | |
| Revenues – Recettes | | | | | | |
| Direct taxes – Corporations – Impôts directs – sociétés: | | | | | | |
| Petroleum and gas revenues tax ¹ – Impôt sur les recettes du pétrole et du gaz naturel ¹ | 1,716 | 1,996 | 1,791 | 2,280 | 2,004 | 2,040 |
| Incremental oil revenue tax ¹ – Impôt sur les recettes pétrolières supplémentaires ¹ | 76 | 72 | 86 | 68 | 64 | 68 |
| Indirect taxes – Impôts indirects: | | | | | | |
| Oil export charge – Taxe à l'exportation du pétrole | 396 | 420 | 341 | 456 | 776 | 600 |
| Gasoline excise tax – Taxe d'accise sur l'essence | 444 | 472 | 404 | 340 | 360 | 456 |
| Natural gas and gas liquids excise tax – Taxe d'accise sur le gaz naturel et les liquides tirés du gaz | 548 | 300 | 713 | 260 | 12 | – |
| Petroleum compensation charge – Prélèvement d'indemnisation du pétrole | 2,080 | 1,816 | 1,782 | 2,032 | 1,732 | 1,956 |
| Canadian ownership charge – Prélèvement de participation canadienne | 932 | 848 | 824 | 908 | 744 | 864 |
| Expenditures – Dépenses | | | | | | |
| Subsidies – Subventions: | | | | | | |
| Importers' compensation – Versements de compensation aux importateurs | 564 | 844 | 642 | 792 | 500 | 756 |
| Petroleum compensation – Indemnisation pétrolière | 1,720 | 1,724 | 1,585 | 1,952 | 2,420 | 2,796 |
| Capital assistance – Subventions d'équipement: | | | | | | |
| Petroleum incentives program – Programme d'encouragement du secteur pétrolier | 1,528 | 1,836 | 1,466 | 1,436 | 1,764 | 1,716 |

¹ Estimated liabilities: collections include the incremental oil revenue tax and were \$1,756 million in the third quarter of 1983, \$2,396 million in the fourth quarter of 1983, \$2,304 million in the first quarter of 1984, \$2,124 million in the second quarter of 1984 and \$2,336 million in the third quarter of 1984.

¹ Créances estimatives: les perceptions comprennent l'impôt sur les recettes pétrolières supplémentaires et se sont élevées respectivement à \$1,756 millions au troisième trimestre de 1983, à \$2,396 millions au quatrième trimestre de 1983, \$2,304 millions au premier trimestre de 1984, à \$2,124 millions au deuxième trimestre de 1984 et à \$2,336 millions au troisième trimestre de 1984.

(1) Excludes profits of government business enterprises. (2) Includes the withholding tax applicable to this item. (3) Includes profits (net of losses) of government business enterprises and other government investment income. (4) Includes value of physical change in farm inventories as shown in line 14, Table 5. An adjustment has been made to take account of the accrued earnings of farm operators arising out of the operations of the Canadian Wheat Board. (5) Includes net income of independent professional practitioners and imputed net rent on owner-occupied dwellings. (6) See footnote 4, Table 2.

(1) Sans les bénéfices des entreprises commerciales publiques. (2) Y compris les retenues fiscales. (3) Y compris les bénéfices (pertes déduites) des entreprises commerciales publiques ainsi que les autres revenus de placements des administrations. (4) Y compris la valeur de la variation des stocks agricoles telle qu'elle figure à la rubrique 14 du tableau 5. Un ajustement a été effectué pour tenir compte des gains comptables découlant des activités de la Commission canadienne du blé. (5) Y compris le revenu net des personnes exerçant une profession pour propre compte et les loyers nets imputés des logements occupés par leur propriétaire. (6) Voir note 4, tableau 2.

TABLE 2. Gross National Expenditure, by Quarters

(1) Includes defence expenditures. For amounts see line 45, Table 6. (2) Includes outlays on new durable assets such as building and highway construction by government, other than government business enterprises. Excludes defence construction and equipment which are defined as current expenditure. (3) Comprises capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. (4) The book value of inventories is deflated to remove the effect of price changes and the derived 'physical' change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment (see line 8, Table 1).

(1) Y compris les dépenses militaires présentées à la ligne 45, tableau 6. (2) Y compris les dépenses en biens durables neufs, comme les immeubles et les routes, des administrations publiques, sauf celles de leurs entreprises commerciales publiques. Ne comprend pas les installations et le matériel militaires, considérés comme dépenses courantes. (3) Comprend les dépenses d'investissement des entreprises privées, des entreprises commerciales publiques et des institutions non commerciales privées, ainsi que les dépenses de construction résidentielle neuve des particuliers. Par définition, les dépenses d'investissement comprennent tous les frais de mutation relatifs à la vente et à l'achat d'immobilisations existantes. (4) La valeur comptable des stocks est déflatée de façon à supprimer l'effet des variations de prix. La variation 'matérielle' ainsi obtenue est ensuite évaluée aux prix moyens de la période courante, ce qui permet d'obtenir la valeur de la variation matérielle. La différence entre cette valeur de la variation matérielle et la variation de la valeur comptable est appelée ajustement de la valeur des stocks (voir ligne 8, tableau 1).

(1) Cette rubrique diffère de la ligne 6, tableau 1. La différence consiste en l'exclusion de l'ajustement qui a été apporté pour tenir compte du revenu comptable net au titre des activités de la Commission canadienne du blé ('ajustement relatif aux transactions de céréales').

(2) Y compris tous les intérêts sur la dette publique payés par les administrations publiques aux particuliers.

(3) Dons de charité, autres contributions et amortissement des mauvaises créances.

(1) Comprennent les versements des particuliers, les contributions officielles des administrations publiques et les pensions versées par celles-ci.

(2) Comprennent les retenues fiscales, les pensions reçues et les versements de particuliers reçus de l'étranger.

(3) Épargne des résidents au titre des opérations avec des non-résidents sur la base des comptes nationaux des revenus et des dépenses. Les chiffres négatifs désignent l'épargne des non-résidents mise à la disposition de l'économie (voir ligne 8, tableau 8).

(1) The implicit price deflators of the seasonally unadjusted components of Gross National Expenditure, derived by dividing the value figures in Table 2 by the constant dollar figures in Table 10, are not suitable as indicators of quarter-to-quarter price change. This is because they are currently weighted and therefore are affected by compositional shifts which occur within the unadjusted components of Gross National Expenditure on a quarter-to-quarter basis. Quarter-to-quarter movement in the implicit price deflators based on seasonally adjusted data are less subject to the problem of shifting weights and may be used as a measure of price change.

(1) Les indices implicites de déflation de prix des composantes non désaisonnalisées de la dépense nationale brute, obtenus en divisant les valeurs en dollars courants du tableau 2 par les valeurs en dollars constants du tableau 10, ne sont pas de bons indicateurs de la variation des prix d'un trimestre à l'autre car ils sont à pondération courante et, par conséquent, sensibles aux changements de composition d'un trimestre à l'autre des diverses composantes non désaisonnalisées de la dépense nationale brute. Toutefois, les indices implicites de déflation de prix basés sur les séries désaisonnalisées sont moins sujets à ces changements de pondération et peuvent donc servir à mesurer les variations de prix.

(1) See footnote 1, Table 1.

(2) See footnote 2, Table 1.

(3) See footnote 3, Table 1.

(4) Includes an arbitrary smoothing of crop production, and standard seasonal adjustments for withdrawals of grain from farm stocks and for the change in farm-held livestock and other inventories. Because of the arbitrary element, too precise an interpretation should not be given the seasonally adjusted figures of accrued net income of farm operators.

(5) See footnote 5, Table 1.

(6) See footnote 4, Table 2.

(1) Voir note 1, tableau 1.

(2) Voir note 2, tableau 1.

(3) Voir note 3, tableau 1.

(4) Comprend un lissage arbitraire de la production culturale et des ajustements saisonniers normalisés visant les prélèvements de céréales sur les stocks agricoles et la variation des cheptels et des autres stocks détenus dans les fermes. En raison de cet élément arbitraire, on ne devrait pas donner une interprétation trop rigoureuse des chiffres désaisonnalisés du revenu comptable net des exploitants agricoles.

(5) Voir note 5, tableau 1.

(6) Voir note 4, tableau 2.

TABLE 12. Gross National Expenditure, by Quarters

Seasonally Adjusted at Annual Rates

(1) Includes defence expenditures. For amounts see line 45, Table 16. (2) See footnote 2, Table 2. (3) See footnote 3, Table 2. (4) See footnote 4, Table 2. (5) In the seasonally adjusted series, the value of grain crop production in each quarter is taken as one-fourth of the estimated value of crop production for the year as a whole (see footnote 4, Table 11). All other items in the farm inventories series are seasonally adjusted by standard techniques.

(1) Y compris les dépenses militaires. Pour les montants, voir rubrique 45, tableau 16. (2) Voir note 2, tableau 2. (3) Voir note 3, tableau 2. (4) Voir note 4, tableau 2. (5) Dans les séries désaisonnalisées, on suppose que la valeur de la production céréalière de chaque trimestre est égale au quart de la production totale de l'année (voir note 4 au bas du tableau 11). Tous les autres éléments de la série sur les stocks agricoles sont désaisonnalisés à l'aide de méthodes normalisées.

(1) See footnote 1, Table 6.

(2) The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four since real property taxes accrue uniformly throughout the taxation year. Because in recent years, changes in real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted taxes series.

(3) Includes capital consumption allowances as shown in line 92.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

System of National Accounts,
Gross National Product Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9151) or to the Statistics Canada reference centre in:

| | | | |
|------------|------------|----------------|------------|
| St. John's | (772-4073) | Sturgeon Falls | (753-4888) |
| Halifax | (426-5331) | Winnipeg | (949-4020) |
| Montréal | (283-5725) | Regina | (359-5405) |
| Ottawa | (990-8116) | Edmonton | (420-3027) |
| Toronto | (966-6586) | Vancouver | (666-3691) |

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0T6.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Système de comptabilité nationale,
Division du produit national brut,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9151) ou au centre de consultation de Statistique Canada à:

| | | | |
|------------|------------|----------------|------------|
| St. John's | (772-4073) | Sturgeon Falls | (753-4888) |
| Halifax | (426-5331) | Winnipeg | (949-4020) |
| Montréal | (283-5725) | Regina | (359-5405) |
| Ottawa | (990-8116) | Edmonton | (420-3027) |
| Toronto | (966-6586) | Vancouver | (666-3691) |

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services in current and constant prices, is portrayed in the Input-Output tables of the System (Catalogue with prefix 15). The Catalogue Nos. carrying the prefix 16 provide constant dollar measures of the contribution of each industry to total Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue with prefix 14).

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by Financial Flow Accounts (Catalogue with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Levels of outstanding financial assets and liabilities are published annually as a major contribution towards a complete national balance sheet.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, *A System of National Accounts* (Studies in Methods, Series F, No. 2, Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le n° de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (n° de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services aux prix du marché et en dollars constants figure dans les tableaux d'entrées-sorties du système (n° de catalogue commençant par 15). Les publications dont les numéros de catalogue commencent par 61 comprennent les mesures en dollars constants de l'apport de chaque branche d'activité au total du produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le n° de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut par activité économique. Les comptes de flux financiers (publications dont les n° de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les niveaux des actifs et passifs financiers en circulation sont disponibles annuellement; ils constituent un élément important d'un bilan national exhaustif.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, n° 2, rév. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

NOTE

In order to obtain a complete quarterly historical record of the National Income and Expenditure Accounts, the following publications should be consulted:

National Income and Expenditure Accounts, Volume 2, The Quarterly Estimates, 1947-1974, Catalogue 13-533, for the years 1947-1970.

National Income and Expenditure Accounts, First Quarter 1978, Catalogue 13-001 for the years 1971-1973.

National Income and Expenditure Accounts, First Quarter 1981, Catalogue 13-001 for the years 1974 and 1975.

National Income and Expenditure Accounts, First Quarter 1983, Catalogue 13-001 for the year 1976.

NOTA

Pour disposer d'un dossier trimestriel historique complet des comptes nationaux des revenus et des dépenses, le lecteur est prié de consulter les publications suivantes:

Comptes nationaux des revenus et des dépenses, volume 2, Les estimations trimestrielles, 1947-1974, n^o 13-533 au catalogue, pour la période 1947-1970.

Comptes nationaux des revenus et des dépenses, premier trimestre 1978, n^o 13-001 au catalogue, pour la période 1971-1973.

Comptes nationaux des revenus et des dépenses, premier trimestre 1981, n^o 13-001 au catalogue, pour la période 1974-1975.

Comptes nationaux des revenus et des dépenses, premier trimestre 1983, n^o 13-001 au catalogue, pour l'année 1976.

Beginning with the First Quarter 1985 issue, data unadjusted for seasonal variation (Tables 1 to 10) will no longer be included in this publication. These data will, however, still be available through CANSIM or directly from the Gross National Product Division.

Avec la publication du 1^{er} trimestre de 1985, les données non désaisonnalisées (tableaux 1 à 10) ne seront plus incluses dans cette publication; elles pourront toujours cependant être obtenues de CANSIM ou directement de la Division du produit national brut.

This publication was prepared under the direction of:

- **Barbara Clift**, Director, Gross National Product Division
- **Douglas Clancy**, Chief, Investment Income
- **Ellen Buckley**, Head, Capital Formation
- **Michel Pascal**, Head, Deflation and Consumer Expenditures

Cette publication a été rédigée sous la direction de:

- **Barbara Clift**, directrice, Division du produit national brut
- **Douglas Clancy**, chef, Section des revenus de placements
- **Ellen Buckley**, chef, Section de la formation de capital
- **Michel Pascal**, chef, Section de la déflation et des dépenses de consommation

For the year as a whole, Gross National Product, at market prices increased 7.8% to a level of \$420.8 billion. Real GNP rose 4.7% compared to 3.3% in 1983.

Pour l'ensemble de l'année, le produit national brut aux prix du marché augmente de 7.8% pour atteindre \$420.8 milliards. Le PNB réel progresse de 4.7%, contre 3.3% en 1983

Gross National Product rose 1.4% in the fourth quarter of 1984 to a level of \$429.9 billion, seasonally adjusted at annual rates. After allowing for a 0.8% increase in prices, real GNP rose 0.6%.

Après désaisonnalisation au taux annuel, le produit national brut augmente de 1.4% au quatrième trimestre de 1984 pour atteindre \$429.9 milliards. Compte tenu d'une hausse des prix de 0.8%, le PNB réel s'accroît de 0.6%.

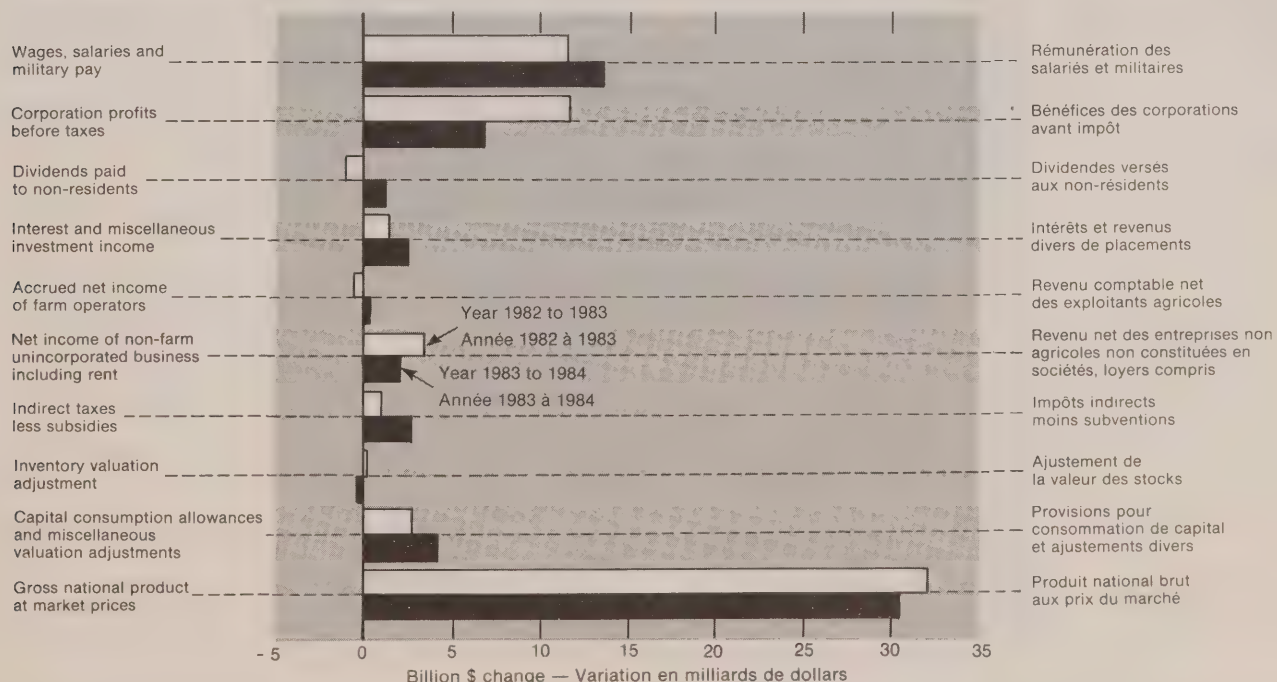

Wages, salaries and supplementary labour income and military pay and allowances increased by 6.2% in 1984, up slightly from the gain in 1983. Corporate profits before taxes rose 21.3% to a level of \$39.7 billion. Interest and miscellaneous investment income rose 8.5% over the 1983 level.

La rémunération des salariés et militaires augmente de 6.2% en 1984, soit un peu plus qu'en 1983. Les bénéfices des sociétés avant impôts s'accroissent de 21.3% pour atteindre \$39.7 milliards. Les intérêts et revenus divers de placements augmentent de 8.5% par rapport à 1983.

Annual changes in GNP and components

Mouvements annuels du PNB et de ses composantes

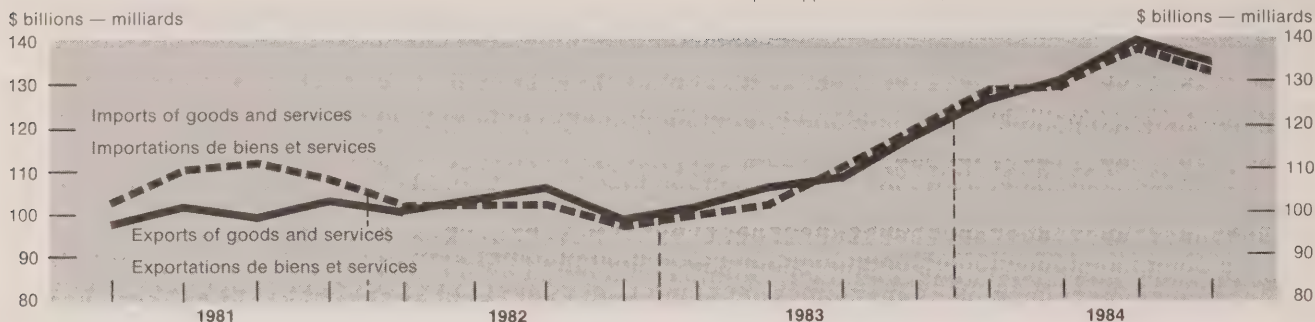

Note: All quarterly data adjusted for seasonal variation and annual rates.

Nota: Toutes les séries trimestrielles sont corrigées des variations saisonnières, aux taux annuels.

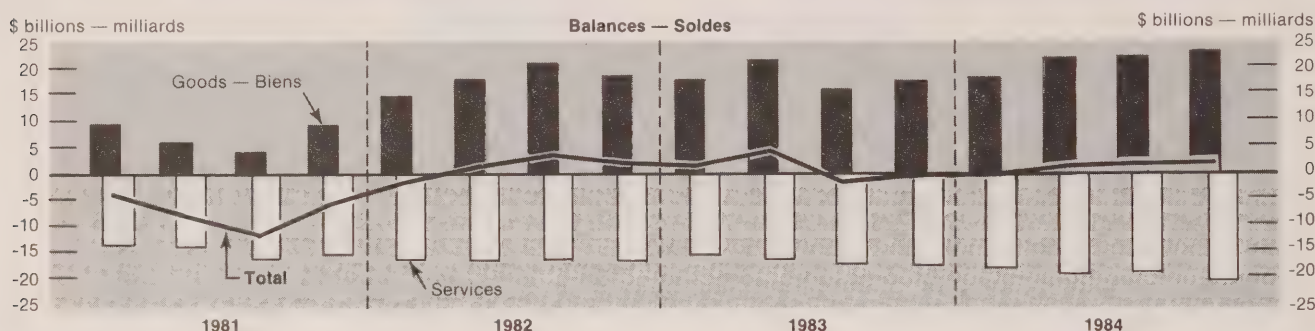

In 1984, both exports and imports of goods and services rose by 21.9% following 6.3% and 6.8% increases in 1983 respectively resulting in an increase in the surplus of goods and services of \$1.2 billion in 1984, up from \$0.9 billion in 1983.

En 1984, les exportations et importations de biens et services augmentent toutes deux de 21.9%, après des hausses respectives de 6.3% et 6.8% en 1983; il en résulte une augmentation de \$1.2 milliards de l'excédent du commerce en biens et services, en hausse par rapport à celui de \$0.9 milliard en 1983.

In the fourth quarter of 1984, exports and imports of goods and services fell 2.3% and 3.1% respectively following third quarter increase of 6.3% and 6.1% respectively.

Au quatrième trimestre de 1984, les exportations et importations de biens et services baissent respectivement de 2.3% et 3.1%, après des hausses de 6.3% et 6.1% au troisième trimestre.

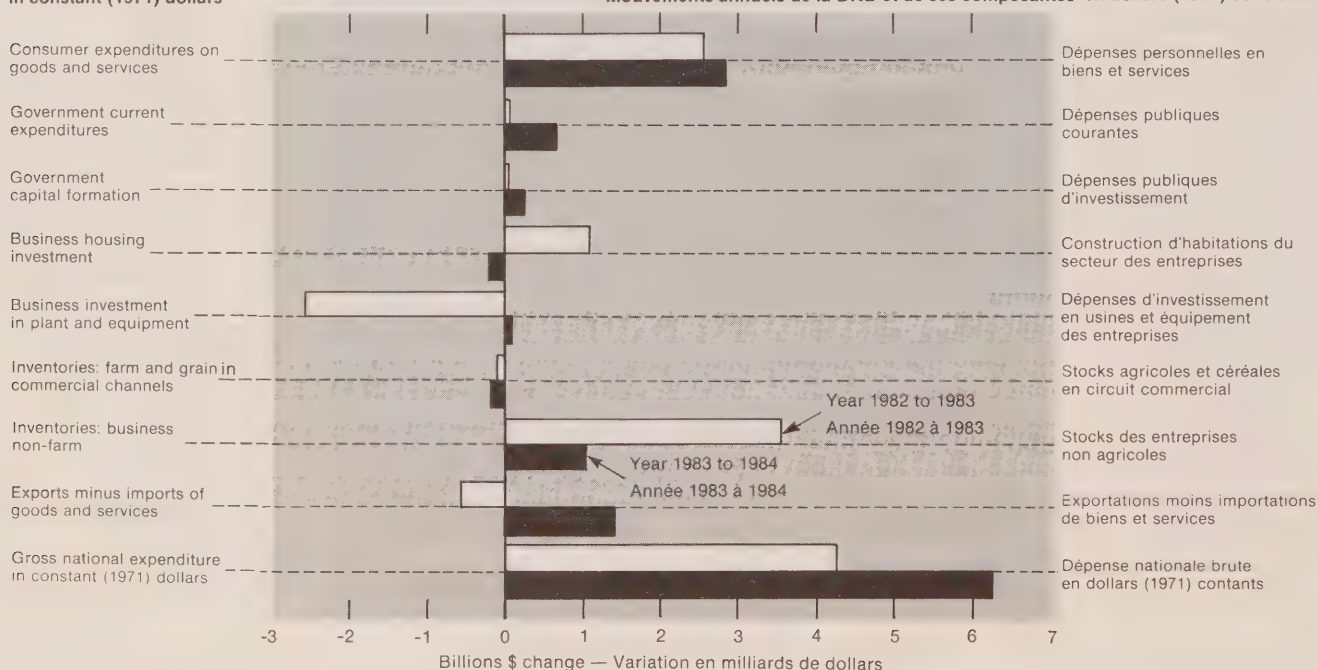

The growth of consumer expenditure and net exports of goods and services provided the major source of strength in real GNP in 1984. Business investment in plant and equipment changed little and residential construction fell. Following a substantial contribution to growth in 1983 by stock rebuilding, inventories grew in line with sales in 1984.

La plus grande partie de la fermeté dans le PNB réel en 1984 émane des dépenses de consommation et des exportations nettes de biens et services. Les investissements des entreprises en usines et matériel restent pratiquement inchangés et on enregistre une baisse dans la construction résidentielle. Alors que la reconstitution des stocks avait joué un rôle appréciable dans la croissance de la production en 1983, ceux-ci ont suivi les ventes en 1984.

Introduction

GROSS NATIONAL PRODUCT

Preliminary Annual and Fourth Quarter 1984

Gross National Product rose 1.4% in the fourth quarter of 1984 to a level of \$429.9 billion, seasonally adjusted at annual rates. After allowing for a 0.8% increase in prices, the volume of GNP rose 0.6% in the fourth quarter, after a strong 1.6% gain in the third. For the year as a whole, Gross National Product increased 7.8%. Discounting a moderate 3.0% price increase, real GNP rose 4.7%, compared to 3.3% in 1983. On a domestic basis the growth rate was closer to 5%; on either basis, the increase is the largest since 1976.

Much of the increase in economic activity in 1984 originated in sales of motor vehicle products. Half of the increase in export demand was in these commodities. Higher car purchases continued to drive sales of durable goods upward at a rapid rate, and purchases of commercial vehicles rose strongly. Aside from the gains in motor vehicle sales, demand rose slowly in most sectors of the economy. Consumer spending on semi-durable goods and on services rose at rates similar to 1983. Business investment in plant and equipment changed little in 1984 following two years of steep decline, and housing construction fell. By year end, overall, final domestic demand had only just regained its 1981 peak. Following the substantial contribution to growth in output in 1983 by post-recession stock rebuilding, inventories grew in line with sales through most of 1984. Price inflation continued to moderate, as the GNE implicit price index decelerated from a 5.5% increase in 1983 to 3.0% in 1984, the smallest annual increase since 1971.

In real terms, the strongest rates of growth during the year were recorded in the external sector. Exports of goods and services rose nearly 20% while imports rose over 15%. In nominal terms, both merchandise exports and imports rose by nearly 25%, resulting in an increase in the merchandise trade balance of \$3.1 billion. This was largely offset by a deterioration in the non-merchandise deficit, mainly due to a higher net outflow of interest and dividend payments, so that the overall balance of trade in goods and services rose slightly to \$1.2 billion.

Consumer demand rose 3.4% in volume, about the same rate as in 1983. A surge in demand for durable goods early in 1984 helped to boost purchases for the year as a whole by 11.0%, almost the same rate as in 1983. The gain in durable goods was concentrated in vehicle sales, as in 1983, while demand for furniture and appliances levelled off at a time of weak housing activity.

Introduction

PRODUIT NATIONAL BRUT

Estimations annuelles provisoires et quatrième trimestre 1984

Après désaisonnalisation au taux annuel, le produit national brut augmente de 1.4% au quatrième trimestre de 1984 pour atteindre \$429.9 milliards. Compte tenu d'une hausse des prix de 0.8%, l'augmentation en volume du PNB est de 0.6%, faisant suite à une progression de 1.6% au troisième trimestre. Pour l'ensemble de l'année, le produit national brut augmente de 7.8%. Après correction d'une augmentation modérée des prix de 3.0%, le PNB réel progresse de 4.7%, contre 3.3% en 1983. Le taux de croissance est plus près de 5% sur une base intérieure; sur une base nationale ou intérieure, la hausse est la plus forte depuis 1976.

La plus grande partie de l'augmentation de l'activité économique en 1984 émane des produits automobiles; la moitié de l'accroissement de la demande à l'exportation est imputable à ces derniers. La hausse des achats de voitures a continué de pousser à la hausse les dépenses de biens durables à un rythme rapide, tandis que les ventes de véhicules commerciaux augmentaient fortement. À part la progression des ventes de véhicules, la demande s'est accrue lentement dans la plupart des secteurs de l'économie. Les dépenses de consommation en biens semi-durables et en services augmentent à des taux semblables à ceux de 1983. Les investissements des entreprises en usines et matériel restent pratiquement inchangés en 1984, après deux années de fortes baisses; on note une diminution de l'activité dans le secteur de la construction résidentielle. En fin d'année, la demande intérieure finale avait à peine retrouvé son sommet de 1981. Alors que la reconstitution des stocks après la récession avait joué un rôle appréciable dans la croissance de la production en 1983, ceux-ci ont suivi les ventes pendant la majeure partie de l'année. Le taux d'inflation a continué de ralentir, l'indice implicite de prix de la DNB s'étant accru de 3.0% en 1984 contre 5.5% en 1983, l'augmentation annuelle la plus faible depuis 1971.

En termes réels, les plus forts taux de croissance au cours de l'année s'observent dans le secteur extérieur. Les exportations de biens et services s'accroissent de près de 20% alors que les importations augmentent de plus de 15%. En termes nominaux, les exportations et les importations de marchandises augmentent toutes deux de près de 25%, résultant en une augmentation de \$3.1 milliards du solde du commerce de marchandises. Celle-ci est neutralisée dans une large mesure par la dégradation du déficit sur invisibles, surtout imputable à un accroissement des sorties nettes sous forme de paiements d'intérêts et de dividendes; le solde de l'ensemble du commerce en biens et services s'est donc accru légèrement, atteignant \$1.2 milliard.

La demande de consommation augmente de 3.4% en volume, à peu près autant qu'en 1983. Une poussée de la demande de biens durables en début d'année a servi à relever les achats de 11.0% pour l'ensemble de l'année, taux semblable à celui de 1983. La progression dans les biens durables touche surtout les ventes de véhicules comme en 1983, alors que la demande de meubles et d'articles ménagers plafonne en raison de la faiblesse de l'activité dans le secteur résidentiel.

Residential construction declined 3.8% in 1984, following a strong recovery in 1983. Weakness in housing demand was particularly evident in western Canada. The softness in demand conditions for housing was reflected in only a 1% gain in prices; in 1984 the implicit price index for residential construction was still slightly below its 1982 level.

Business investment in plant and equipment rose marginally in volume to \$18.3 billion. Following two years of substantial decline, this left the share of GNE devoted to plant and equipment at 13% in 1984, compared to a peak of 17% in 1981. The restraint in capital spending coincided with substantial excess capacity in most industries and with the efforts of firms to restructure balance sheets.

The change in non-farm business inventories was about \$1 billion in constant dollars, contributing substantially less to the growth of real GNP in 1984 than in 1983. Moderate stock accumulation was evident in virtually all industries with the result that the aggregate stock-to-sales ratio was essentially unchanged during the year.

Wages, salaries, and supplementary labour income increased by 6.1% in 1984, up slightly from the gain in 1983. Over the past two years, the share of labour income has eased from 57.9% to 55.2%. The slower growth of labour income reflects a marked deceleration of negotiated wage settlements and continued restraint in demand for full-time employees, notably in goods-producing industries where employment has not returned to pre-recession levels.

Corporate profits before taxes rose 21.3% in 1984 to a level of \$39.7 billion. The share of profits in GNP continued to recover slowly and now stands at 9.4% compared to 8.4% in 1983 and 5.9% in 1982.

The total government sector deficit, on a national accounts basis, rose \$2.6 billion, to a level of \$26.9 billion in 1984. Total government revenue increased by 10.1%, as a result of higher indirect taxes, investment income and corporate taxes. Total expenditures rose by 10.1%, as it did in 1983, with slower rates of increase in spending on goods and services and transfer payments to persons offsetting rapidly growing interest payments on the public debt.

Fourth Quarter Detail

A slowdown of real GNP growth in the fourth quarter to 0.6%, from the rapid gain of 1.6% in the third, reflected a slowing of export demand and inventory accumulation. Much of the upsurge in growth in the third quarter had originated in exports, particularly in the motor vehicle sector. Strikes in the auto industry limited its contribution to growth in the fourth quarter, after dominating growth through most of 1984. Higher consumer spending led a 0.9% increase in final domestic demand, while housing expenditures slackened and business investment in plant and equipment remained weak.

La construction résidentielle baisse de 3.8% en 1984, après un redressement marqué en 1983. La faiblesse de la demande de logements s'observe en particulier dans l'ouest du pays. L'hésitation de la demande sur le marché du logement se retrouve dans la faible augmentation des prix (1%); l'indice implicite de prix de la construction résidentielle en 1984 demeure légèrement en-dessous de son niveau de 1982.

Les investissements des entreprises en usines et matériel augmentent très peu en volume, à \$18.3 milliards; après deux années de fortes baisses, leur part dans la DNB s'établit maintenant à 13% en 1984, contre un sommet de 17% en 1981. La modération des dépenses d'investissement coïncide avec l'existence d'une capacité excédentaire importante dans la plupart des branches d'activité et avec les efforts des entreprises pour restructurer leurs bilans.

La variation des inventaires commerciaux non agricoles s'élève à environ \$1 milliard en dollars constants, contribuant beaucoup moins à la croissance du PNB en 1984 qu'en 1983. On observe des mises en stocks modérées dans la plupart des branches d'activité, ce qui laisse le ratio global des stocks aux ventes à peu près inchangé au cours de l'année.

La rémunération des salariés augmente de 6.1% en 1984, soit un peu plus qu'en 1983. Au cours des deux dernières années, la part du revenu du travail dans le PNB est tombée de 57.9% à 55.2%. La croissance plus lente du revenu du travail traduit la décélération marquée des ententes salariales négociées et la demande toujours faible de travailleurs à plein temps, notamment dans les branches productrices de biens où l'emploi n'a pas retrouvé son niveau d'avant la récession.

Les bénéfices des sociétés avant impôts s'accroissent de 21.3% en 1984 pour atteindre \$39.7 milliards. La part des profits dans le PNB continue de remonter lentement et s'élève maintenant à 9.4%, contre 8.4% en 1983 et 5.9% en 1982.

Le déficit de l'ensemble du secteur des administrations publiques, sur la base des comptes nationaux, augmente de \$2.6 milliards pour atteindre \$26.9 milliards en 1984. Le total des recettes publiques est en hausse de 10.1%, en raison de l'augmentation des impôts indirects, des revenus de placements et des impôts des sociétés. Le total des dépenses s'accroît de 10.1%, comme en 1983, alors qu'un taux d'accroissement plus lent des paiements de transfert aux particuliers et des dépenses en biens et services est venu compenser la hausse rapide des paiements d'intérêts sur la dette publique.

Quatrième trimestre de 1984

Le ralentissement de la croissance du PNB réel au quatrième trimestre (0.6%), comparativement à la progression rapide de 1.6% observée au troisième, rend compte d'un relâchement de la demande à l'exportation et des mises en stocks. La majeure partie de la poussée de croissance au troisième trimestre provenait des exportations, notamment dans le secteur automobile. Les grèves dans ce dernier secteur ont toutefois limité sa contribution à la croissance au quatrième, après l'avoir alimentée pendant la plus grande partie de 1984. Des dépenses de consommation accrues dominent l'accroissement de 0.9% de la demande intérieure finale, alors que les dépenses en logements et les immobilisations des entreprises en usines et matériel restent faibles.

Following exceptional growth over the first three quarters of the year, the volume of total exports declined by 2.2% in the fourth quarter. Most of the decline reflected lower exports of motor vehicle products, as well as slowing American industrial demand for many fabricated materials. The real balance of trade in goods and services continued to rise however, as import demand declined by 3.5% in the quarter. The drop reflected weak demand for machinery and equipment as well as lower imports of motor vehicle parts.

In real terms, consumer demand rebounded from a weak third quarter to post a 1.4% gain in the fourth, the largest quarterly gain of the year. Spending on durable goods led the upturn, as car sales recovered from a decline in the third quarter and as numerous price reductions continued to stimulate demand for a number of the other durable components. Demand for semi-durable goods also recovered from a dip in the previous quarter, rising 1.1%. The growth of consumption of non-durable goods and services picked up slightly to 0.8% and 1.3% respectively.

Residential construction expenditures declined by 2.4% in the fourth quarter. This drop offset the slow gains earlier in the year, and left the level of residential construction little changed from the fourth quarter of 1983. The decline reflected lower work-put-in-place, as total housing starts dropped by 17.4% in the quarter.

The volume of business investment in plant and equipment was little changed in the fourth quarter, after a marginal gain in the third. The level of business investment was essentially unchanged from a year earlier, as outlays for both non-residential construction and machinery and equipment remained weak.

The hesitancy of firms to increase capital spending also was evident in the change in non-farm business inventories, which was \$256 million, the smallest accumulation in over a year. The restraint in stock accumulation was most evident in the retail and manufacturing industries, particularly in reduced holdings of raw materials.

Corporate profits before taxes rose 4.4% in the fourth quarter, the first increase since the first quarter. Much of the increase appears to have originated in windfall inventory gains, notably in the petroleum industry where price increases resulted, in part, from an increase in the petroleum compensation charge.

Wages, salaries and supplementary labour income slowed to 1.5% growth from close to 2.0% in the previous two quarters. Most of the slowdown originated in lower employment growth. Personal disposable income grew 1.3% in the fourth quarter, less rapidly than consumer outlays, resulting in a decline in the personal savings to 12.5%.

The government sector deficit, on a national accounts basis, decreased \$2.5 billion to a seasonally adjusted rate of \$27.2 billion in the fourth quarter. Government revenues advanced 4.6%, as a result of increases in corporate taxes, indirect taxes (reflecting a rise in the manufacturer's sales

Après une croissance exceptionnelle au cours des trois premiers trimestres, le volume des exportations baisse de 2.2% au quatrième. La plus grande partie de cette baisse traduit la diminution des exportations de produits automobiles ainsi que le ralentissement de la demande industrielle aux États-Unis pour un grand nombre de matières travaillées. Le solde commercial réel des biens et services continue d'augmenter cependant, puisque la demande à l'importation baisse de 3.5% au cours du trimestre. Cette diminution traduit la faiblesse de la demande de machines et matériel ainsi qu'un repli des importations de pièces automobiles.

En termes réels, la demande de consommation se redresse après un faible troisième trimestre pour afficher une progression de 1.4% au quatrième, la plus forte de l'année. Les dépenses en biens durables dominent cette reprise avec l'amélioration des ventes de voitures qui avaient baissé au troisième, et alors que de nombreuses réductions de prix continuent de stimuler la demande pour d'autres biens durables. La demande de biens semi-durables se redresse également après le repli du trimestre précédent et augmente de 1.1%. La croissance de la consommation en biens non durables et en services reprend légèrement, s'établissant à 0.8% et 1.3% respectivement.

Les dépenses en construction résidentielle se replient de 2.4% au quatrième trimestre, ce qui neutralise les faibles progressions plus tôt au cours de l'année et laisse le niveau de la construction résidentielle pratiquement inchangé par rapport au quatrième trimestre de 1983. La diminution rend compte de la baisse des travaux mis en place, car les mises en chantier de logements au total diminuent de 17.4% au cours du trimestre.

Le volume des investissements des entreprises en usines et matériel reste pratiquement inchangé au quatrième trimestre, après une augmentation minime au troisième. Leur niveau ne change pratiquement pas par rapport à l'année précédente, étant donné la faiblesse des dépenses en construction non résidentielle et en machines et matériel.

L'hésitation des entreprises à accroître les dépenses en capital s'observe également dans la variation des stocks commerciaux non agricoles, qui s'élève à \$256 millions, la plus faible accumulation en plus d'un an. L'accumulation modérée des stocks se manifeste surtout au niveau du commerce de détail et dans la fabrication où sont maintenus des stocks réduits de matières brutes.

Les bénéfices des sociétés avant impôts augmentent de 4.4% au quatrième trimestre, pour la première fois depuis le premier trimestre. La majeure partie de cette augmentation semble provenir d'une croissance imprévue des gains sur stocks, notamment dans l'industrie pétrolière où les prix ont augmenté, entre autres, à cause du relèvement de la taxe d'indemnisation pétrolière.

Après avoir été proche de 2.0% au cours des deux trimestres précédents, la croissance de la rémunération des salariés tombe à 1.5%. L'essentiel de ce ralentissement est imputable à une diminution de la croissance de l'emploi. Le revenu personnel disponible s'accroît de 1.3% au quatrième trimestre, moins rapidement que les dépenses des consommateurs, ce qui fait baisser le taux d'épargne personnelle à 12.5%.

Le déficit du secteur des administrations publiques, sur la base des comptes nationaux, diminue de \$2.5 milliards pour atteindre \$27.2 milliards au quatrième trimestre, après désaisonnalisation au taux annuel. Les recettes des administrations progressent de 4.6% en raison de l'augmentation des impôts des sociétés, des impôts

tax rate in October and in the petroleum compensation charge in November) and personal direct taxes. The increase of 2.7% in total expenditure was widespread.

des particuliers et des impôts indirects (traduisant le relèvement du taux de la taxe de vente à la fabrication en octobre et de la taxe d'indemnisation pétrolière en novembre). L'accroissement de 2.7% dans le total des dépenses traduit des augmentations dans la plupart des catégories.

Federal Government Petroleum-related Revenues and Expenditures

The petroleum-related programs of the federal government continued to have a significant effect on the movement of some of the federal income and expenditure items. The following table provides quarterly estimates, seasonally adjusted at annual rates, for 1984 of the major petroleum-related programs.

L'administration fédérale et le pétrole-Recettes et dépenses

Les programmes reliés au pétrole de l'administration fédérale ont continué d'influencer fortement les taux de variation de certaines rubriques de ses revenus et dépenses. Le tableau suivant montre les estimations trimestrielles de 1984, après désaisonnalisation au taux annuel, pour les principaux programmes reliés au pétrole.

Petroleum-related Revenues and Expenditures (Seasonally Adjusted at Annual Rates)

Recettes et dépenses reliées au pétrole (Après désaisonnalisation au taux annuel)

| | 1983 | 1984 | | | | |
|----------------------------------------------------------------------------------------------------------------|---------------|-------------------------------------------|-------|-------|-------|---------------|
| | Year Année | I | II | III | IV | Year Année |
| | | millions of dollars - millions de dollars | | | | |
| Revenues - Recettes | | | | | | |
| Direct taxes - Corporations - Impôts directs - sociétés: | | | | | | |
| Petroleum and gas revenues tax ¹ - Impôt sur les recettes du pétrole et du gaz naturel ¹ | 1,791 | 2,280 | 2,004 | 2,036 | 2,188 | 2,127 |
| Incremental oil revenue tax ¹ - Impôt sur les recettes pétrolières supplémentaires ¹ | 86 | 68 | 64 | 68 | 44 | 61 |
| Indirect taxes - Impôts indirects: | | | | | | |
| Oil export charge - Taxe à l'exportation du pétrole | 341 | 456 | 776 | 668 | 848 | 687 |
| Gasoline excise tax - Taxe d'accise sur l'essence | 404 | 340 | 360 | 456 | 476 | 408 |
| Natural gas and gas liquids excise tax - Taxe d'accise sur le gaz naturel et les liquides tirés du gaz | 713 | 260 | 12 | - | - | 68 |
| Petroleum compensation charge - Prélèvement d'indemnisation du pétrole | 1,782 | 2,032 | 1,732 | 1,872 | 2,404 | 2,010 |
| Canadian ownership charge - Prélèvement de participation canadienne | 824 | 908 | 744 | 860 | 888 | 850 |
| Expenditures - Dépenses | | | | | | |
| Subsidies - Subventions: | | | | | | |
| Importers' compensation - Versements de compensation aux importateurs | 642 | 792 | 500 | 756 | 916 | 741 |
| Petroleum compensation - Indemnisation pétrolière | 1,585 | 1,956 | 2,428 | 2,800 | 2,752 | 2,484 |
| Capital assistance - Subventions d'équipement: | | | | | | |
| Petroleum incentives program - Programme d'encouragement du secteur pétrolier | 1,466 | 1,436 | 1,764 | 1,716 | 2,116 | 1,758 |

¹ Estimated liabilities: collections include the incremental oil revenue tax and were \$2,304 million in the first quarter of 1984, \$2,124 million in the second quarter of 1984, \$2,336 million in the third quarter of 1984 and \$2,236 in the fourth quarter of 1984.

¹ Créances estimatives: les perceptions comprennent l'impôt sur les recettes pétrolières supplémentaires et se sont élevées respectivement à \$2,304 millions au premier trimestre de 1984, \$2,124 millions au deuxième trimestre de 1984, à \$2,336 millions au troisième trimestre de 1984 et à \$2,236 millions au quatrième trimestre de 1984.

(1) Excludes profits of government business enterprises. (2) Includes the withholding tax applicable to this item. (3) Includes profits (net of losses) of government business enterprises and other government investment income. (4) Includes value of physical change in farm inventories as shown in line 14, Table 5. An adjustment has been made to take account of the accrued earnings of farm operators arising out of the operations of the Canadian Wheat Board. (5) Includes net income of independent professional practitioners and imputed net rent on owner-occupied dwellings. (6) See footnote 4, Table 2.

(1) Sans les bénéfices des entreprises commerciales publiques. (2) Y compris les retenues fiscales. (3) Y compris les bénéfices (pertes déduites) des entreprises commerciales publiques ainsi que les autres revenus de placements des administrations. (4) Y compris la valeur de la variation des stocks agricoles telle qu'elle figure à la rubrique 14 du tableau 5. Un ajustement a été effectué pour tenir compte des gains comptables découlant des activités de la Commission canadienne du blé. (5) Y compris le revenu net des personnes exerçant une profession pour propre compte et les loyers nets imputés des logements occupés par leur propriétaire. (6) Voir note 4, tableau 2.

(1) Includes defence expenditures. For amounts see line 45, Table 6. (2) Includes outlays on new durable assets such as building and highway construction by government, other than government business enterprises. Excludes defence construction and equipment which are defined as current expenditure. (3) Comprises capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. (4) The book value of inventories is deflated to remove the effect of price changes and the derived 'physical' change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment (see line 8, Table 1).

(1) Y compris les dépenses militaires présentées à la ligne 45, tableau 6. (2) Y compris les dépenses en biens durables neufs, comme les immeubles et les routes, des administrations publiques, sauf celles de leurs entreprises commerciales publiques. Ne comprend pas les installations et le matériel militaires, considérés comme dépenses courantes. (3) Comprend les dépenses d'investissement des entreprises privées, des entreprises commerciales publiques et des institutions non commerciales privées, ainsi que les dépenses de construction résidentielle neuve des particuliers. Par définition, les dépenses d'investissement comprennent tous les frais de mutation relatifs à la vente et à l'achat d'immobilisations existantes. (4) La valeur comptable des stocks est déflatée de façon à supprimer l'effet des variations de prix. La variation 'matérielle' ainsi obtenue est ensuite évaluée aux prix moyens de la période courante, ce qui permet d'obtenir la valeur de la variation matérielle. La différence entre cette valeur de la variation matérielle et la variation de la valeur comptable est appelée ajustement de la valeur des stocks (voir ligne 8, tableau 1).

| | Current transfers: | | | | | | | | | | |
| 6 | From government | 8,800 | 8,926 | 8,645 | 9,076 | 35,447 | 10,478 | 10,850 | 11,193 | 11,669 | 44,190 |
| 7 | Transfer payments to persons | 8,714 | 8,834 | 8,573 | 8,977 | 35,098 | 10,344 | 10,692 | 10,943 | 11,404 | 43,383 |
| 8 | Capital assistance | 86 | 92 | 72 | 99 | 349 | 134 | 158 | 250 | 265 | 807 |
| 9 | From corporations(3) | 159 | 163 | 162 | 162 | 646 | 121 | 121 | 122 | 124 | 488 |
| 10 | From non-residents | 124 | 130 | 149 | 142 | 545 | 151 | 150 | 150 | 149 | 600 |
| 11 | Personal income | 64,922 | 69,414 | 80,297 | 73,896 | 288,529 | 74,356 | 77,924 | 86,748 | 78,398 | 317,426 |

(1) This item differs from line 6, Table 1 by excluding the adjustment which has been made to take account of the accrued net earnings arising out of the operations of the Canadian Wheat Board ('adjustment on grain transactions'). (2) Includes all interest on the public debt paid by government to persons.

(3) Charitable and other contributions, and bad debt write-offs.

(1) Cette rubrique diffère de la ligne 6, tableau 1. La différence consiste en l'exclusion de l'ajustement qui a été apporté pour tenir compte du revenu comptable net au titre des activités de la Commission canadienne du blé ('ajustement relatif aux transactions de céréales').

(2) Y compris tous les intérêts sur la dette publique payés par les administrations publiques aux particuliers.

(3) Dons de charité, autres contributions et amortissement des mauvaises créances.

(1) Comprennent les versements des particuliers, les contributions officielles des administrations publiques et les pensions versées par celles-ci.

(2) Comprennent les retenues fiscales, les pensions reçues et les versements de particuliers reçus de l'étranger.

(3) Épargne des résidents au titre des opérations avec des non-résidents sur la base des comptes nationaux des revenus et des dépenses. Les chiffres négatifs désignent l'épargne des non-résidents mise à la disposition de l'économie (voir ligne 8, tableau 8).

(1) The implicit price deflators of the seasonally unadjusted components of Gross National Expenditure, derived by dividing the value figures in Table 2 by the constant dollar figures in Table 10, are not suitable as indicators of quarter-to-quarter price change. This is because they are currently weighted and therefore are affected by compositional shifts which occur within the unadjusted components of Gross National Expenditure on a quarter-to-quarter basis. Quarter-to-quarter movement in the implicit price deflators based on seasonally adjusted data are less subject to the problem of shifting weights and may be used as a measure of price change.

(1) Les indices implicites de déflation de prix des composantes non désaisonnalisées de la dépense nationale brute, obtenus en divisant les valeurs en dollars courants du tableau 2 par les valeurs en dollars constants du tableau 10, ne sont pas de bons indicateurs de la variation des prix d'un trimestre à l'autre car ils sont à pondération courante et, par conséquent, sensibles aux changements de composition d'un trimestre à l'autre des diverses composantes non désaisonnalisées de la dépense nationale brute. Toutefois, les indices implicites de déflation de prix basés sur les séries désaisonnalisées sont moins sujets à ces changements de pondération et peuvent donc servir à mesurer les variations de prix.

| 13 | Gross National Product at market prices | 328,308 | 337,476 | 343,192 | 350,212 | 339,797 | 352,220 | 354,740 | 360,680 | 365,568 | 358,302 |
| 14 | <i>Gross National Product at market prices excluding accrued net income of farm operators.</i> | 323,692 | 332,276 | 339,316 | 346,636 | 335,480 | 348,024 | 350,480 | 356,596 | 361,952 | 354,263 |

(1) See footnote 1, Table 1.

(2) See footnote 2, Table 1.

(3) See footnote 3, Table 1.

(4) Includes an arbitrary smoothing of crop production, and standard seasonal adjustments for withdrawals of grain from farm stocks and for the change in farm-held livestock and other inventories. Because of the arbitrary element, too precise an interpretation should not be given the seasonally adjusted figures of accrued net income of farm operators.

(5) See footnote 5, Table 1.

(6) See footnote 4, Table 2.

(1) Voir note 1, tableau 1.

(2) Voir note 2, tableau 1.

(3) Voir note 3, tableau 1.

(4) Comprend un lissage arbitraire de la production culturale et des ajustements saisonniers normalisés visant les prélèvements de céréales sur les stocks agricoles et la variation des cheptels et des autres stocks détenus dans les fermes. En raison de cet élément arbitraire, on ne devrait pas donner une interprétation trop rigoureuse des chiffres désaisonnalisés du revenu comptable net des exploitants agricoles.

(5) Voir note 5, tableau 1.

(6) Voir note 4, tableau 2.

(1) Includes defence expenditures. For amounts see line 45, Table 16. (2) See footnote 2, Table 2. (3) See footnote 3, Table 2. (4) See footnote 4, Table 2. (5) In the seasonally adjusted series, the value of grain crop production in each quarter is taken as one-fourth of the estimated value of crop production for the year as a whole (see footnote 4, Table 11). All other items in the farm inventories series are seasonally adjusted by standard techniques.

(1) Y compris les dépenses militaires. Pour les montants, voir rubrique 45, tableau 16. (2) Voir note 2, tableau 2. (3) Voir note 3, tableau 2. (4) Voir note 4, tableau 2. (5) Dans les séries désaisonnalisées, on suppose que la valeur de la production céréalière de chaque trimestre est égale au quart de la production totale de l'année (voir note 4 au bas du tableau 11). Tous les autres éléments de la série sur les stocks agricoles sont désaisonnalisés à l'aide de méthodes normalisées.

(1) See footnote 1, Table 6.

(2) The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four since real property taxes accrue uniformly throughout the taxation year. Because in recent years, changes in real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted taxes series.

(3) Includes capital consumption allowances as shown in line 92.

(1) Voir note 1, tableau 6.

(2) Les estimations trimestrielles des impôts fonciers, à la fois non désaisonnalisées et désaisonnalisées, sont obtenues en divisant les chiffres annuels par quatre, étant donné que ces impôts s'accumulent de façon uniforme tout au long de l'année d'imposition. Toutefois, comme les révisions ont en général relevé le niveau des impôts immobiliers au cours des dernières années, il en est résulté une saisonnalité fictive entre le quatrième et le premier trimestre dans les séries désaisonnalisées.

(3) Comprennent les provisions pour consommation de capital figurant à la ligne 92.
